## Safety notes

Be sure to read this user guide and the safety precautions before using your telephone.
Explain their content and the potential hazards associated with using the device to your children.
The device cannot be used in the event of a power failure. It is not possible either to make emergency calls.
Emergency numbers also cannot be called when the keypad lock is activated.
Do not use the device in environments with a potential explosion hazard (e.g. paint shops).

The devices are not splash-proof. For this reason, do not install them in a damp environment such as bathrooms or shower rooms.

Use only the power adapter indicated on the device.
Use only rechargeable batteries that correspond to the specification (see "Technical data"), as this could otherwise result in significant health risks and personal injury. Rechargeable batteries that are noticeably damaged must be replaced.

If you give your handset to a third party, make sure you also give them the user guide.
Remove faulty devices from use or have them repaired by our Service team, as they could interfere with other wireless services.

Do not use the device if the display is cracked or broken. Broken glass or plastic can cause injury to the hands or face. Send the device to our Service department to be repaired.

Do not hold the rear of the handset to your ear when it is ringing or when speaker mode is activated. Otherwise you may seriously and permanently impair your hearing.
Your handset is compatible with the majority of digital hearing aids on the market. However, perfect function with all hearing aids cannot be guaranteed.
The telephone may cause interference in analog hearing aids (humming or whistling) or cause them to overload. If you require assistance, please contact the hearing aid supplier.

Using your telephone may affect nearby medical equipment. Be aware of the technical conditions in your particular environment, e.g. doctor's surgery.
If you use a medical device (e.g. a pacemaker), please contact the device manufacturer. They will be able to advise you regarding the susceptibility of the device to external sources of high frequency energy (for the specifications of your handset, see "Technical data").
To prevent loss of hearing, avoid listening at high volume over long periods of time.

## Getting started

## Contents of the package

- One handset,
- One battery cover,
- Two batteries,
- One charging cradle,
- One belt clip,
- One user guide.

## Installing the charging cradle

The charging cradle is designed for operation in closed, dry rooms within a temperature range of $+5^{\circ} \mathrm{C}$ to $+45^{\circ} \mathrm{C}$.
The phone's feet do not usually leave any marks on surfaces. However, due to the multitude of different varnishes and polishes used on today's furnishings, the occurrence of marks on the surfaces cannot be completely ruled out.

Never expose the telephone to the influence of heat sources, direct sunlight or other electrical devices.
Protect the telephone from moisture, dust, corrosive liquids and fumes.
Pay attention to the range of the base station. This is up to 300 m in unobstructed outdoor areas and up to 50 m inside buildings. The range is reduced when Maximum Range is deactivated.

## Connecting the charging cradle (if included)

- Connect the flat plug of the power adapter 1 .
- Plug the power adapter into the power socket 2 .

To remove the plug from the charging cradle again:

- Disconnect the power adapter from the mains power supply.
- Press the release button 3 .
- Pull out the plug 4 .

## Setting up the handset for use

The display is protected by a plastic film. $>$ Please remove the protective film!

## Inserting the batteries

Only use rechargeable batteries as this could otherwise result in significant health risks and personal injury. For example, the outer casing of the batteries could be destroyed or the batteries could explode. The phone could also malfunction or be damaged as a result of using batteries that are not of the recommended type.

| Insert the batteries（for correct <br> ＋／－direction，see diagram）． | Fit the battery cover from the <br> To re－open the battery cover： <br> top． |
| :--- | :--- |
| Press the cover until it clicks into <br> place． | Insert a fingernail behind the <br> notch at the top of the cover |
| and slide the cover downwards． |  |

## Charging the batteries

－Charge the batteries fully prior to first use in the base station／charging cradle．The batteries are fully charged when the power icon 4 disappears from the display．

The handset may only be placed on the designated base station or charging cradle．

The battery may heat up during charging．This is not dangerous．
After a while，the charge capacity of the battery will decrease for technical reasons． Handsets contained in the package have already been registered to the base station．In the event that a handset is not registered however（indicated by＂Please register handset＂），please contact the administrator．

## Attaching the belt clip

The handset has notches on each side for attaching the belt clip．
－Attaching the belt clip：Press the belt clip onto the back of the handset until the tabs on the clip engage in the notches．
－Removing the belt clip：Press the center of the belt clip firmly with your thumb．Press the nail of the thumb on your other hand up between the clip and the casing．Slide the clip upwards to remove．

## Changing the display language

You can change the display language if the telephone has been set to an incomprehensible language．
－Press the middle of the control key $\square$ ．
－Press the keys 9 and 5 slowly in succession ．．．the language settings display appears and the set language（e．g．English）is highlighted （ O ＝selected）．
－Select a different language：Press the control key［ $\square$

| Deutsch | O |
| :--- | ---: |
| English | O |
| Francais | O | language is marked in the display，e．g．French $>$ press the key on the right directly underneath the display to activate the language．

－To revert to idle status：Press the End call key $\square$ and hold

## Setting the date and time

Set the date and time so that the date and time can be assigned correctly to incoming calls and to enable the alarm to be used．
－Press the display key Time
or，if the date and time have already been set：

The active cursor position flashes $1 .$. use to change the cursor position $\downarrow$ ．．．use $[\boxed{\square}]$ to switch between cursor positions

## Enter date：

－．．．．use 朋to enter the day，month and year in 8－digit format，

Enter the time．
－．．．use 膘 to enter hours and minutes in 4－digit format，e．g． $0=7$ 1 © 5 for 07：15．

To save settings：

| Date／Time |  |
| :--- | :--- | :--- |
| Date： |  |
| 关／15／2014 |  |
| Time： |  |
| 12：00 AM |  |
|  |  |
|  |  |
| Back | Save |

[^0]
## Connecting the headset

- Connect a headset with a 2.5 mm jack to the left side of the handset 1 .

The headset volume corresponds to the setting for the earpiece volume ( $\rightarrow$ p. 31) .

## Connecting the USB data cable

For exchanging data between the handset and PC:

- Connect the USB data cable with micro-USB plug into the USB socket at the bottom of the handset 1 .

## i Connect the handset directly to the PC , not via a USB hub.

## Getting to know your telephone

## Switching the handset on/off <br> Switch on: When the handset is switched off, press the End call key and hold <br> Switch off: When the telephone is in idle status, press the End call key $\sigma$ and hold

## Locking/unlocking the keypad

The keypad lock prevents any accidental use of the telephone. Lock/unlock the keypad: \# $\quad$ Press and hold

1) When a call is indicated on the handset, the keypad It is not possible to call emergency numbers either when the keypad lock is activated.

## Control key

The control key enables you to navigate the menus and input fields and also to call up certain functions depending on the situation.

In the description below, the side of the control key (up, down, left, right) that you have to press in the different operating situations is marked in black, for example $\square$ for "press right on the control key" or $\square$ for "press the center of the control key".

## In idle status

Open the directory
Open the main menu
Open the system menu

In submenus, selection and entry fields
Confirm a function

## During a conversation

Open the directory
Switch the microphone off/on
Select the left display

(only for HiPath Cordless Enterprise)
Adjust the loudspeaker volume for receiver and handsfree $\square$ mode

## Volume keys

Set volume for receiver/headset, ringtone, handsfree mode and indicating appointments: Press the volume keys $\square$ on the right side of the handset

## Display keys

The display keys perform a range of functions depending on the operating situation.

Current display key
functions
Display keys
Display key icons $\rightarrow$ p. 40

[^1]
## Menu guidance

The functions of your telephone are displayed on a menu that consists of several levels. Menu overview $\Rightarrow$ p. 41 .

Main menu
In idle status: Press the center $\square$ of the control key $\downarrow$. . use the control key or number keys 1 to 9 to select a submenu $\downarrow$ OK

The main menu functions are shown in the display as icons. The icon for the selected function is highlighted in color and the name of the associated function appears in the display header.

Back

## Submenus

The functions in the submenus are displayed as lists.
To access a function: $\downarrow$. . use the control key $[\boxed{\square}]$ to select a function OK
Return to the previous menu level:

- Press the display key Back
or
- Press the End call key briefly

## Returning to idle status

Example

| Settings |  |
| :--- | :--- |
| Date/Time |  |
| Display \& Keypad |  |
| Language |  |
| Registration |  |
| Telephony $\vee$ |  |
| Back | OK |

- Press the End call key $\qquad$ and hold

## Entering text

## Input position

- Use [ $\square$ to select an input field. A field is activated when the cursor is flashing inside it.
- Use to move the position of the cursor.

## Correcting incorrect entries

- Delete characters to the left of the cursor: $\downarrow<\mathrm{C}$ Press briefly
- Delete words to the left of the cursor: $>\mathrm{C}$ Press and hold

## Entering letters/characters

Multiple letters and numbers are assigned to each key between 2 and 9 and the 0 key. As soon as a key is pressed, the possible characters

| New Entry |  |
| :--- | ---: |
| First Name: |  |
| Peter\| |  |
| Surname: |  |
| Phone (Home): |  |
|  | Abc |
| $<C$ | Save | are displayed at the bottom of the display. The selected character is highlighted.

- Select letters/digits: Press the key briefly several times in succession
- Switch between lowercase, uppercase and number entry mode: Press the hash \# $\quad$ mey When editing a directory entry, the first letter and each letter following a space are automatically in uppercase.
- Enter special characters: Press the star key * $\rightarrow \ldots$ use to navigate to the desired character Insert
i
The availability of special characters depends on the character set of the handset, $\rightarrow$ Character set tables p. 38 .

## Making calls

## Making calls

- ... use 腊 to enter a number $>$ press the Talk key $\sigma_{1}$ briefly

Cancel dialing: Press the End call key

When the display backlight is off ( $\rightarrow$ p. 30), the display lights up again the next time any key is pressed. Digit keys appear on the display for pre-dialing, other keys have no further function.

## Dialing from the directory

$\rightarrow \ldots$ use $\square$ to open the directory $\triangleright \ldots$ use $[\square$ to select an entry $\downarrow$ press the Talk key $\rightarrow$
If multiple numbers are entered:

- ... use to select a number $\rightarrow$ press the Talk key $\ldots$... the number is dialed

```
i For fast access (quick dial): Assign numbers from the directory to the digit or display keys
1 (-> p.32).
```

## Dialing from the redial list

The redial list contains the 20 numbers last dialed with the handset.
 Talk key 6
If a name is displayed:
View . . . the number is displayed $\downarrow$ to browse numbers if required $\quad \ldots$ when the desired number is reached, press the Talk key $/ 1$

## Managing entries in the redial list

- Press the Talk key $\quad$ fid briefly ... the redial list is opened $\downarrow$. . use $\square$ to select an entry Options ... possible options:
Copy an entry to the directory: $\square \square$ Copy to Directory $>$ OK
Copy the number to the display:
 as an entry in the directory
Delete the selected entry: $\quad\left[\begin{array}{l}\square \\ \square\end{array}\right]$ Delete entry $D$ OK
Delete all entries: $[\triangle]$ Delete all $>$ OK
Set automatic line seizure:
- 4 Automatic Redial ... The selected number is automatically dialed at fixed intervals (at least every 20 seconds). The handsfree key flashes; "open listening" is activated.
The participant answers: Press the Talk key 7 . . . the function is terminated
The participant does not answer: The call is terminated after approx. 30 seconds. The function is terminated after pressing any key or after ten unsuccessful attempts.

## Dialing in to extension systems (Delayed Extension Dialing)

When dialing in to a large corporate network (PBX systems), it is possible to dial an extension number directly after dialing the dial-up number.

The telephone number is saved in the directory as follows: Dial-in number, 2 stars, extension number (e.g. 1234567** 128 ).

```
\square\squareO Open directory ....use [可to select an entry press the Talk key \(\quad\) II.. the phone dials the number before the \({ }^{* *} \ldots\) possible options:
Dial a saved extension: Dial Ext.
Dial a different extension: .... use \({ }^{\text {n }}\) to enter a number \(>\) Dial Ext.
```

## Incoming calls

An incoming call is indicated by ringing, by a display on the screen and by the flashing Talk key $\sigma_{11}$. Accept a call:

- Press the Talk key or $\quad$ or 1 Accept
- If Auto Answer is activated $(\rightarrow$ p. 31): Remove the handset from the charging cradle
- Accept a call on the bluetooth headset $\rightarrow$ p. 25

Switch off ringtone: Silence ... the call can be accepted for as long as it is shown on the display

## Information about the caller

The caller's phone number is displayed. If the caller's phone number is saved in the directory, the name is displayed.

## During a conversation

## Handsfree mode

Activating/deactivating handsfree mode during a call and when establishing a connection:

- Press the handsfree key

Placing the handset in the charging cradle during a call:

- Press the handsfree key $\quad$ and hold down $>\ldots$. place the handset in the charging cradle hold ... 11 for a further 2 seconds

## Call volume

Applies for the current mode (handsfree, receiver or headset):

1 The setting is automatically saved after around 3 seconds, even if Save is not pressed.

## Muting the microphone

When the microphone is switched off, callers will no longer hear you.
Switch the microphone on/off during a call:

- Press and hold the microphone key

## Directory

The local directory is unique to the handset. However, it is possible to send entries to other handsets $(\rightarrow$ p. 18) .

## Opening the directory

- Press $\square$ briefly in idle status
or
$\square \square \ldots$ use $\square$ to select $\square$ Directory $\rightarrow$ OK

## Directory entries

| Number of entries: | up to 500 |
| :--- | :--- |
| Information: | First name and surname, up to three telephone numbers, e-mail address, <br> anniversary with alert, VIP ringtone with VIP icon, CLIP picture |
| Length of the entries: | Numbers: max. 32 digits. <br>  <br>  <br> First name, surname: max. 16 characters <br> E-mail address: max. 64 characters. |

## Creating an entry

 entry fields and enter data for the entry:.

Names / numbers:
 (personal, office or mobile) and an e-mail address, if applicable
Anniversary:

- ....use to activate/deactivate Anniversary . ... use nth to enter the date and time $\downarrow$ use to select the type of alert (Visual only or a ringtone)
Caller Melody (VIP):
- ....use to select the ringtone that will indicate a call from the participant . . . if a Caller Melody (VIP) has been assigned, the entry will appear in the directory with the VIP icon.
Caller Picture:
- ... use to select a picture that is to be displayed during a call from the participant ( $\rightarrow$ Resource Directory, p. 24).
Save entry: Save

1. An entry is only valid if it contains at least one number.

For Caller Melody (VIP) and Caller Picture: the telephone number of the caller must be supplied.

## Searching for/selecting a directory entry

- $\square$. ... use $\square \square$ to browse searched names
or
$\square$... use $\quad$ to enter initial letters (max. 8 letters) ... the display jumps to the first name starting with these initial letters $\ldots$ use $[\square]$ to continue browsing to the desired entry, if needed
Scroll through directory: $\square \square\left[\begin{array}{l}\square \\ \square\end{array}\right]$ Press and hold

## Displaying/changing an entry

 or
$\square \square \ldots$ use $\square \square$ to select an entry $>$ Options $>$ Edit entry $>$ OK

## Deleting entries

Delete the selected entry: $\square \square . .$. use $[\square$ to select an entry $\rightarrow$ Options $\downarrow \square \square$ Delete entry $>$ OK Delete all entries: $\square \square$ Options $\downarrow \square \square$

## Setting the order of the directory entries

Directory entries can be sorted by first name or surname.
$\square \square$ Options $\square$ Sort by Surname / Sort by First Name
If no name was entered, the default telephone number is shown in the surname field. These entries appear at the beginning of the list, regardless of how the entries are sorted.
The sort order is as follows:
Space \| Digits (0-9) | Letters (alphabetically) | Other characters.
Displaying the number of entries available in the directory

## Copying number to the directory

The number is displayed or highlighted.

- When dialing a number:
- Press the display key $\rightarrow>1$.
- From a list, e.g. the call list or the redial list.
$\rightarrow$ Options $>[\boxed{\square}]$ Copy to Directory $>$ OK.
Create a new entry:
$\rightarrow$ <New Entry> $>$ OK $>\ldots$ use to select a number type $>$ OK $>$ complete entry $>$ Save
Add number to an existing entry:
 entered or a prompt to overwrite an existing number is displayed $>\ldots$ if required, answer the prompt with Yes/No Save

## vCard

(1) An external call interrupts the transfer.

Caller pictures and sounds are not transferred. Only the date is transferred for an anniversary.
Both handsets support vCards:

- No entry with the name is available: a new entry is created.
- An entry with the name is already available: the entry is expanded to include the new numbers. If the entry contains more numbers than allowed by the recipient handset, a second entry is created with the same name.
The recipient handset does not support vCards:
A separate entry is created and sent for each number.
The sending handset does not support vCards:
A new entry is created on the receiving handset and the transferred number is added to the Phone (Home) field. If an entry with this number already exists, the copied number is discarded.

## Copying a vCard using Bluetooth

Copy directory entries in vCard format, for example to exchange entries with a mobile phone.

$$
\begin{aligned}
& \text { Bluetooth mode is activated ( } \rightarrow \text { p. 25) } \\
& \text { The other handset/mobile phone supports Bluetooth. }
\end{aligned}
$$

 Bluetooth ... the Known Devices list is displayed $\left(\rightarrow\right.$ p. 26) $\downarrow \ldots$ use $\left[\begin{array}{l}\Delta \\ \square\end{array}\right]$ to select a device $\longrightarrow$ OK

## Receiving a vCard using Bluetooth

If a device in the Known Devices list ( $\rightarrow$ p. 26) sends a vCard to your handset, a directory entry is automatically created and a message is shown on the display.
If the sending device is not in the list: $\rightarrow \ldots$ use $n$ to enter the PIN of the sending Bluetooth device $>$ OK $\ldots$. the copied vCard is available as a directory entry

## Calendar

You can remind yourself of up to 30 appointments.
The current day is outlined in white in the calendar, while numbers are highlighted in color on days with appointments. When a day is selected, it will be outlined in color.

Assign calendar call-up to a display key $\rightarrow$ p. 33 .

| July 2014 |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Mo Tu | We Th | Fr | Sa | Su |  |  |
| 01 | 02 | 03 | 04 | 05 | 06 |  |
| 07 | 08 | 09 | 10 | 11 | 12 | 13 |
| 14 | 15 | 16 | 17 | 18 | 19 | 20 |

| 28 | 29 | 30 | 31 |  |  |  |
| Back |  |  |  |  |  | OK |

## Saving appointments to the calendar

The date and time have been set.

| Switch on/off: | - Activation: |
| :---: | :---: |
| Enter date: | - $\square$ Date . . . the selected date is set by default . . . use 服to enter a new date |
| Enter the time: |  |
| Set the name: | $\square$ Text • ... use ${ }^{n}$ to enter a description of the appointment (e.g. evening meal, meeting) |
| Set alarm tone: | $\square$ Signal ... use to select the melody of the reminder alarm or deactivate acoustic signaling |

Enter information for the appointment:
Save appointment: $\quad$ Save

```
i)
If an appointment has already been entered: \(\downarrow[\square]<\) New Entry \(>\) OK \(\downarrow \ldots\) then enter infor-
mation for the appointment.
```

## Notification of appointments/anniversaries

Anniversaries are transferred from the directory and displayed as an appointment. An appointment/ anniversary is displayed in idle status and the selected ringtone plays for 60 seconds as a notification.

- Acknowledge and stop the reminder: Press the display key OFF
- Modify the ringtone volume permanently: ... Press the volume keys + / - during the reminder
(1) During a call, a reminder is indicated once with an advisory tone on the handset.

## Displaying missed (unacknowledged) appointments/anniversaries

The following appointments and anniversaries are saved in the Missed Alarms list:

- The appointment/anniversary call was not acknowledged.
- The appointment/anniversary was notified during a call.
- The handset was switched off at the time of the appointment/anniversary.

The last 10 entries are stored. The 블 icon and the number of new entries are shown on the display. The most recent entry appears at the top of the list.

## Opening the list

- Press the message key $\square \vee[\square$ Missed Alarms: $\square$ OK $>\ldots$ use $\square \square$ to browse through the list of any appointments
or
$\square \square \ldots$ use $\square$ to select

Every entry is displayed with number or name, date and time. The most recent entry appears at the top of the list.

- Delete an appointment/anniversary: Delete

## Displaying/changing/deleting stored appointments

 day $>$ OK $\ldots$. the appointment list is displayed $\rightarrow \ldots$ use $[\square$ to select the date $\ldots$ possible options: Display appointment details:

- View ... The appointment settings are displayed

Change $\quad$ View Edit
appointment:
or $>$ Options $-\square$ Edit entry $>$ OK
Activate/deactivate appointment:

- Options $>\left[\begin{array}{l}- \\ -2\end{array}\right]$ Activate/Deactivate $>$ OK

Delete $\quad$ Options $\rightarrow \square$ Delete entry $>$ OK
appointment:
Delete all appointments for a day:
$\rightarrow$ Options $\downarrow \square]$ Delete all Appoints. $\rightarrow$ OK $\downarrow$ Yes

## Alarm clock

The date and time have been set.

Activating/deactivating the alarm clock and setting the wake-up time

- $\square$... use to select $\Theta$ Alarm Clock $>$ OK ... then

Switch on/off: $\quad$ Activation: ... use to select On or Off
Set wake-up time:
Set days:

- $\square$ Time $>\ldots$ use 而 to enter hours and minutes

Set the volume:

- $\square$ Occurrence $\boldsymbol{\square}$....use to switch between Monday-Friday and Daily

Set alarm: $\quad \square$ Melody $\quad \ldots$ use $\quad$ to select a ringtone for the alarm
Enter wake-up data: $\quad \ldots$ use $\square$ to enter Time, Occurrence, Volume and Melody in succession
Save setting: $\quad$ Save
The icon () and the wake-up time are displayed on the idle display when the alarm clock is activated.

## Alarm

An alarm is shown on the display and indicated by the selected ringtone melody. The alarm sounds for 60 seconds. It is then repeated after 5 minutes if no key is pressed. The alarm is disabled for 24 hours after the second retry.

1 During a call, the alarm is only indicated by a short tone.

Switching off / repeating the alarm after an interval (snooze mode)
Deactivate the alarm: OFF
Repeat the alarm (snooze mode): Snooze Press or any key ... the alarm is switched off and repeated after 5 minutes.

## Protecting against unwanted calls

## Time control for external calls

Enter a time period during which the handset is not to ring to indicate external calls, for example during the night.

Example

| Time Control |  |
| :--- | :--- |
| For external calls: |  |
| On |  |
| Suspend ring. from: |  |
| 1/0:00 PM |  |
| 14:0uspend ring. until: |  |
| 7:00 AM |  |
| Back | Save |

Time control only applies to the handset for which the setting is configured.
The telephone will continue to ring for numbers that have been assigned to a VIP group in the directory.

## Switching off the ringtone when in the charging cradle

The handset will not ring when placed in the charging cradle. A call is only indicated on the display.
 Change ( $\bar{\square}$ = ringtone is switched off when in charging cradle)

## Other functions

The phone also offers other functions:

- Resource Directory for saving sounds for ringtones and images that can be used as caller images (CLIP pictures) or as screensavers
- Additional functions via the PC interface with Gigaset QuickSync: sync handset phonebook with Outlook, download images and sounds from the computer to the handset, update the firmware

## Resource Directory

Sounds for ringtones and images that can be used as caller images (CLIP pictures) or as screensavers are saved in the handset's resource directory. A range of monophonic and polyphonic sounds and pictures have been pre-set but further images and sounds can be downloaded using a $\mathrm{PC}(\rightarrow \mathrm{p} .27$ ).

Media types:

| Type | Format |  |
| :--- | :--- | :--- |
| Sound | Ringtones | Internal |
|  | Monophonic <br> Polyphonic | Internal |
|  | Imported sounds | Internal |
| Picture | CLIP picture | BMP, MP3, WAV |
|  | Screensaver | $128 \times 86$ pixels |
|  |  | $128 \times 160$ pixels |

If there is not enough memory available, you must first delete one or more pictures or sounds before others can be saved.

## Managing CLIP pictures/sounds

 sible options:
 selected picture is displayed
 played
Set volume: $\downarrow$ Options $\downarrow$ Volume $\downarrow$ OK $\downarrow \ldots$ use to select the volume $>$ Save
Rename picture/sound:
 image Options $>$ Rename $\rightarrow \ldots$ use < C to delete name, use 胙to enter a new name $>$ Save . . . the entry is saved with the new name
Delete picture/ $\quad[\square]$ Select Caller Pictures / Sounds $\rightarrow$ OK $>\ldots$ use $\left[\begin{array}{l}\Delta \\ \square\end{array}\right]$ to select sound/image sound:

Options Delete entry ... the selected entry is deleted
(1) The relevant options are not available if a picture/sound cannot be deleted.

## Checking the memory

Display the available memory for screensavers and CLIP pictures.

## Bluetooth

The handset is able to use Bluetooth ${ }^{\text {TM }}$ to communicate wirelessly with other devices that also use this technology, for example for exchanging directory entries.

Bluetooth is activated and the devices have been registered to the handset.

The following devices can be connected:

- A Bluetooth headset

The headset features the Headset or Handsfree Profile. If both profiles are available, the handsfree profile is used to communicate.

It may take 5 seconds to establish a connection, whether a call is accepted using the headset or transferred to the headset, or a call is made from the headset.

- Up to 5 data devices (PCs, PDAs or mobile telephones) for the transmission of address book entries as a vCard or for the exchange of data with the computer ( $\rightarrow$ S. 27).
To use the phone numbers, dialing codes (international and local area code) must be saved to the telephone.

Operating Bluetooth devices $\rightarrow$ User guides for devices

## Activating/deactivating Bluetooth mode

 If the local area code is still not saved: $\quad \ldots$ use $H_{\text {to }}$ to enter the local area code $>\mathrm{OK}(\rightarrow \mathrm{p} .34)$

When in idle status, the activated Bluetooth mode is indicated on the handset by the $*$ icon.

## Registering Bluetooth devices

The distance between the handset in Bluetooth mode and the activated Bluetooth device (headset or data device) should be no more than 10 m .
The registration of a headset overwrites a previously registered headset.
If a headset is to be registered that is already registered with a different device, this connection
must be deactivated before registering.
 OK ... the search starts (may take up to 30 seconds) ... the names of found devices are displayed ... possible options:
 tooth device to be registered $>\mathrm{OK}$. . . the device is added to the list of known devices
Display information about a device:

- ... use [ $\quad$ to select a device, if necessary $>$ View . . . the device name and device address are displayed
Repeat search: $\quad$ Options $>$ Repeat Search $>$ OK
Cancel search: $\quad$ Cancel

## Editing the list of known (trusted) devices

Opening the list
 are listed, an icon indicates the type of device
$?$ Bluetooth headset
$\square$ Bluetooth data device
If a device is connected, the corresponding icon is shown in the display header instead of $*$.

## Editing entries

 an entry ... possible options:
View an entry: View ... the device name and device address are displayed To go back, press OK
De-register a Bluetooth device:

- Options $>$ Delete entry $>$ OK

Edit name: $\quad$ Options $>$ Edit Name $>$ OK $>\ldots$ use $\boldsymbol{H}^{\boldsymbol{H}}$ to edit the name $>$ Save

If an active Bluetooth device is de-registered, it may try to re-connect as a "non-registered device".

## Rejecting/accepting a non-registered Bluetooth device

If a Bluetooth device that is not registered in the list of known devices tries to connect with the handset, you will be prompted on the display to enter the PIN for the Bluetooth device (bonding).

|  | - Press the End call key briefly. |
| :---: | :---: |
| Accept: | $\ldots$ use 腈 to enter the PIN of the Bluetooth device to be accepted $\downarrow$ OK $\downarrow$... wait for PIN confirmation ... then |
|  | Add the device to the list of known devices: Yes |
|  | Use the device temporarily: No ... the Bluetooth connection can be used as long as the device is located within the transmission range or until it is switched off |

## Changing the Bluetooth name of the handset

The handset is shown by this name on another Bluetooth device.
$\rightarrow \square \ldots$ use $\square$ to select $\otimes$ Bluetooth $>$ OK $\triangleright \square$ Own Device $>$ OK $\ldots$. the name and the device address are shown $>$ Change $>\ldots$ use $\boldsymbol{H}^{\boldsymbol{H}}$ to change the name $>$ Save

## Additional functions using the PC interface

The Gigaset QuickSync program has been installed on the computer.
Free to download at $\rightarrow$ wiki.unify.com/wiki/OpenScape DECT Phone S5

QuickSync functions:

- Sync the handset's directory with Outlook
- Upload CLIP pictures (.bmp) from the computer to the handset
- Upload pictures (.bmp) as screensavers from the computer to the handset
- Upload sounds (ringtone melodies) from the computer to the handset
- Update the firmware
- Connecting the handset to the computer via Bluetooth ( $\rightarrow$ p. 25) or via a USB data cable ( $\rightarrow$ p.11) .

## (1) Connect the handset directly to the PC, not via a USB hub.

## Transferring data

Data transfer using Bluetooth:

- The computer has Bluetooth capability.
- A USB data cable is not plugged in. If a USB data cable is plugged in during an existing Bluetooth connection, the Bluetooth connection is interrupted.
- Launch the Gigaset QuickSync program on the computer.

The message Data transfer in progress is shown on the display while data is being transferred between the handset and PC. During this time, it is not possible to enter any data using the keypad and incoming calls are ignored.

## Carrying out a firmware update

- Connect the telephone and PC using a USB data cable ( $\rightarrow$ p.11) Launch $>$ Gigaset QuickSync Establish the connection to the handset
- Start the firmware update in Gigaset QuickSync . . . Information about this can be found in the Gigaset QuickSync help
The update process may take up to 10 minutes (not including the download time).

Do not interrupt the process and do not remove the USB data cable.

The data is first downloaded from the online update server. The amount of time this takes depends on the speed of the Internet connection.
The display on your phone is switched off and the Message key $\triangle$ and the Talk key $\sigma_{11}$ start flashing. Once the update is complete, your phone will automatically restart.

## Procedure in the event of an error

If the update procedure fails or the phone does not work properly following the update, repeat the update procedure:

- End the "Gigaset QuickSync" program on the PC $>$ Remove the USB data cable from the phone Remove the battery $(\rightarrow$ p. 9) $>$ Replace the battery
- Carry out the firmware update again as described above

If the update procedure fails several times or you can no longer connect to the PC, carry out an Emergency Update:

- End the "Gigaset QuickSync" program on the PC Remove the USB data cable from the phone $\rightarrow$ Remove the battery $(\rightarrow p .9)$
- Press and hold keys 4 and 6 at the same time with the forefinger and middle finger Replace the battery
- Release keys 4 and 6 ... the Message key $\square$ and the Talk key $/ 11$ flash alternately
- Carry out the firmware update as described above

1. Always save pictures and sounds uploaded onto the handset on the PC also, as they are deleted during an Emergency Update.

## Multiple handsets

## Registering a handset to multiple base stations

The handset can be registered to up to four base stations. The active base station is the base station to which the handset was last registered. The other base stations remain saved in the list of available base stations.

## Registering/de-registering the handset

A handset can be registered to up to four base stations (systems).

## Adjusting the handset settings

## Changing the language

 language $\rightarrow$ Select $(O=$ selected $)$

If the handset has been changed to an incomprehensible language:
$\rightarrow$ Press the keys $9 \square 5$ slowly in succession $\square \ldots$ use $\square$ to select the correct language press the right display key

## Display and keypad

## Screensaver

A dialog or analog clock, Info Services and a range of pictures can be selected to be displayed as a screensaver when in idle status.
 Edit ( $\bar{\square}=$ on) . . . then
Switch on/off: $\rightarrow$ Activation: . . . use to select On or Off
Select screensaver:
$\square$ Selection $\downarrow \ldots$ use to select a screensaver (Digital Clock / Analog Clock / <Pictures > / Slideshow)
View screensaver: View
Save selection: $\quad$ Save
The screensaver is activated approx. 10 seconds after the display has changed to idle status.

All pictures from the Screensaver folder of the Resource Directory ( $\rightarrow$ p. 24) are available for selection.

## End screensaver

- Press the End call key briefly ... the idle display appears

## Large font

You can increase the font size of text and icons in call lists and in the directory in order to improve legibility. Only one entry is shown in the display and names are abbreviated if necessary.
 Edit ( $\bar{\square}=$ on)

## Color scheme

The display may appear in a range of color combinations.

Schemes $>$ OK $>\ldots$ use $[\square$ to select the desired color scheme $\rightarrow$ Select $(\mathrm{O}=$ selected $)$

## Display backlight

The display backlight always illuminates when the handset is taken out of the base station/charging cradle or a key is pressed. Any digit keys that are pressed appear on the display for pre-dialing.
Switch the display backlight on/off when in idle status:
 Backlight 1 OK ... then
Backlight in the charging cradle:
In Charger: . . . use to select On or Off
Backlight when not in the charging cradle:

> Save Sat of Charger $\quad \ldots$ use to select On or Off t.

Save selection:
i The handset's standby time may be significantly reduced if the display backlight is activated.

## Switching the keypad illumination on/off

$\rightarrow \square$. Illumination $>$ Change $(\square=$ on)

## Activating/deactivating automatic keypad lock

Automatically lock the keypad when the handset has been in idle status for around 15 seconds.
 Keypadlock $\rightarrow$ Change ( $\bar{\square}=$ on)

## Activating/deactivating auto answer

When set to auto answer, the handset accepts an incoming call as soon as it is removed from the charging cradle.

```
\square\\ldots..use 公易 to select O
= on)
```

Regardless of the Auto Answer setting, the connection ends as soon as you place the handset back in the charging cradle. Exception: Press and hold the handsfree key $\square$ for a further 2 seconds while placing the handset in the charging cradle.

## Changing the earpiece and speaker volume

You can set the volume of the earpiece and speaker at 5 levels independently of each other.

## During a conversation

- Press the volume keyson the right side of the handset
or
- $\triangle$ Handset Volume $\quad \ldots$ use to select the volume Save ... the setting is saved

1 The setting will be saved automatically after approx. 3 seconds without saving

In idle status
$\rightarrow \square \downarrow$... use $\boldsymbol{\square}$ to select Audio Settings $>$ OK $>$ Handset Volume $>$ OK $\ldots$ then
For the earpiece: $\rightarrow$ Earpiece: ... use to set the volume
For the speaker: $\square$ Speaker $\quad \ldots$ use to set the volume
Save setting:
Save

## Ringtones

## Ringtone volume

$\rightarrow \square \Rightarrow$. . use $\square$ Audio Settings $>$ OK $>\square \square$ Ringtones (Handset) $>$
Example

i
When the telephone rings, you can permanently change the ringtone volume using volume keys + (louder) or - (quieter).

## Ringtone melody

Set a variety of ringtones for internal and external calls.
 $\ldots$ use [ $\Delta$ to select the connection $\triangleright \ldots$ use $\rightarrow$ to select the ringtone/melody in each case $\rightarrow$ Save

## Activating/deactivating the ringtone

## Deactivating the ringtone permanently

- Press and hold the * key. The icon appears in the status bar xu

Activating the ringtone permanently

- Press and hold the *

## Deactivating the ringtone for the current call

- Silence Press Silence or the End call key

## Activating/deactivating the vibration alarm

Incoming calls and other messages are indicated by a vibration.

## Activating/deactivating advisory tones

The handset notifies acoustically about different activities and statuses. These advisory tones can be activated/deactivated independently of each other.
$\square \square \ldots$ use $\square$ Audio Settings $\downarrow$ OK $\square \square$ Advisory Tones $>$ OK ... then
Tone when keys are Key Tones: ... use to select On or Off
pressed:
Confirmation/error tone after making entries, advisory tone when a new message has been received:
$\square$ Confirmation $\quad \ldots$ use to select On or Off Warning tone when there are fewer than 10 minutes of talktime remaining (every 60 seconds):
$\square$ Battery $\rightarrow \ldots$ use to select On or Off
Warning tone when the handset is moved out of range of the base station:

- $\square$ Out of Range: . . . use to select On or Off

Save setting:

- Save

## Fast access to numbers and functions

Number keys: The keys 0 ப and 2 to 9 can each be assigned a number from the directory. Display keys: The left and right display keys have a function preset by default, but the keys can be reassigned.

The number is then dialed or the function started by simply pressing a key.

## Assigning a number to digit keys (quick dial)

You have to assign a number to the digit key.

```
- Press and hold the digit key
or
* Press the digit key briefly Press the display key Quick Dial
The directory opens.
| ... use [\boxed{ to select an entry \OK \... use }\square\mathrm{ to select a number if required }>\mathrm{ OK ... the entry is}
    saved to the digit key
```

## Dialing a number

- Press and hold the digit key ... the number is dialed immediately
or
- Press the digit key briefly ... the number/name (possibly in abbreviated form) is shown on the left display key . . . press the display key . . . the number is dialed

## Changing the digit key assignment

- Press the digit key briefly $\downarrow$ Change ... the directory is opened ... possible options:

Change the $\downarrow \ldots$ use $\left[\begin{array}{l}\square \\ \square\end{array}\right]$ to select an entry $>$ OK $>\ldots$ select a number if assignment: required $\quad$ OK
Delete the $\quad$ Clear Key assignment:

## Assigning display keys, changing assignments

- Press and hold the left or right display key in idle status ... the list of possible key assignments is opened $\downarrow$... use [ $\square$ to select a function $\rightarrow$ OK ... possible options:

Quick Dial Assign a number from the directory to the display key ( $\rightarrow$ p. 32)
Alarm Clock Set and activate/deactivate the alarm clock ( $\rightarrow$ p.21)
Calendar $\quad$ Open the calendar ( $\rightarrow$ p. 19)
Bluetooth Open the Bluetooth menu ( $\rightarrow$ p. 25)
Redial Show the redial list ( $\rightarrow$ p. 14)
More Functions... $\quad$ OK $>\ldots$ use $[\square]$ to select other function
Call Lists Show the call list $(\rightarrow$ p. 54)
Call Divert $\quad$ Activate/deactivate call forwarding ( $\rightarrow$ p. 23)

## Starting a function

With the telephone in idle status: Press the display key briefly ... the assigned function is executed

## Changing the handset PIN

The handset is PIN-protected to prevent unauthorized use (default setting: 0000). Each time you turn on the handset, the PIN is requested.
Change the handset's 4-digit PIN (default setting: 0000):

## Resetting the handset to the default settings

Reset any individual settings and changes that you have made.

The following settings are not affected by the reset:

- Registration of the handset to the base station
- Date and time
- Directory entries and call lists
- SMS lists

## System

## Date and time

To ensure you have the correct time for incoming calls and to use the alarm clock and calendar, for example, the date and time have to be set.
If the date and time have not yet been set on the handset, the display key Time appears.

- Press the display key Time
or
$\square \square \ldots$ use to select $\square$ Settings $\rightarrow$ OK $\square$ Date/Time $>$ OK $\ldots$ then
Sett the date: Date: .... use 服to enter the day, month and year in 8-digit format. e.g. $1 \propto 400,1 \infty 2004 \infty 4$ for $14 / 01 / 2014$

Set the time: $\square$ Time $>\ldots$ use the to enter hours and minutes in 4-digit format e.g. $0=7$ for $07: 15$

Save setting: Save

## Own area code

The area code (international and local area code) must be saved on the phone in order to transfer phone numbers (e.g. in vCards)
Some of these numbers are already preset.
 OK $\downarrow \square$ Area Codes $>$ OK $>$ Check (pre-)set area code

Edit the number:

- .... use $[\boxed{\square}]$ to select/switch entry field $\downarrow \ldots$ use to change entry position $\downarrow<\mathrm{C} \ldots$ delete digit if appropriate $\downarrow$.... use 朋to enter digit Save

## Restoring the phone to default settings

When the settings are reset

- the date and time are retained,
- handsets are still registered,
- the system PIN is retained,
- Maximum Rangeis activated and No Radiation is deactivated.
 H to enter the system PIN $\downarrow \mathrm{OK}>$ Yes $\ldots$ the base station is restarted. The restart takes around 10 seconds.

## Questions and answers

## The display is blank.

- The handset is not switched on. Press and hold
- The battery is empty. $>$ Charge the battery or replace it $(\rightarrow p .9)$
"No Base" flashes on the display.
- The handset is outside the range of the base. Reduce the distance between the handset and base
"Please register handset" flashes on the display.
- The handset is not yet registered or was de-registered when another handset was registered. Register the handset again
The handset does not ring.
- The ringtone is deactivated. Activate the ringtone $(\rightarrow p .32)$
- The phone does not ring during a specific period or for certain numbers.
- Check the time control for external calls ( $\rightarrow$ p. 22)

The other party cannot hear you.

- The handset is "muted". Reactivate the microphone ( $\rightarrow \mathrm{p} .15$ )

The caller's number is not displayed.

- Calling Line Identification (CLI) is not enabled for the caller. The caller should ask the network provider to enable Calling Line Identification(CLI).
- Calling Line Identification Presentation (CLIP) is not supported or enabled by the network provider. Ask the network provider to enable Calling Line Identification Presentation (CLIP).
- The phone is connected via a PABX or a router with an integrated PABX (gateway) that does not forward all information.
- Reset the system: Pull out the power plug briefly. Reinsert the plug and wait until the device restarts.
- Check the settings on the PABX and activate phone number display if necessary. To do this, search for terms such as CLIP, calling line identification, telephone number identification, caller ID, ... in the system user guide or ask the system manufacturer.

You hear an error tone when keying in (descending tone sequence).

- Action has failed/invalid input. Repeat the process. Read the display and refer to the user guide if necessary.
No time is specified for a message in the call list.
- The date/time are not set. Set the date and time.

Registration or connection problems with a Bluetooth headset.

- Reset the Bluetooth headset (see the user guide for the headset).
- Delete the registration data on the handset by de-registering the device ( $\rightarrow \mathrm{p} .25$ ).
- Repeat the registration process ( $\rightarrow$ p. 26).

## Manufacturer's advice

## Authorization

Depending on the variant, this device is intended for analog phone lines in the German/Luxembourg or Austrian network (see device label).
Country-specific requirements have been taken into consideration.
We, Unify $\mathrm{GmbH} \& \mathrm{Co} . \mathrm{KG}$, declare that this device meets the essential requirements and other relevant regulations laid down in Directive 1999/5/EC.

The EU declaration of conformity for your country under 1999/5/EC can be found at: wiki.unify.com/wiki/Declarations of Conformity\#Cordless Phones.
This declaration may also be available in the files "International Declarations of Conformity" or "European Declarations of Conformity" in some cases.
Therefore please also read these files.
( $\in 0682$

## Disposal

Batteries should not be disposed of in general household waste. Observe the local waste disposal regulations, details of which can be obtained from your local authority. Dispose of batteries in the green boxes designated as "common collection system for batteries" at specialist retailers.
All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.

This crossed-out wheeled bin symbol on the product means the product is covered by the European Directive 2002/96/EC.
The correct disposal and separate collection of your old appliance will help prevent potential negative consequences for the environment and human health. It is a precondition for reuse and recycling of used electrical and electronic equipment.
For more detailed information about disposal of your old appliance, please contact your local authority refuse center or waste disposal service.

## Care

Always use a damp or antistatic cloth to clean the device. Do not use solvents or microfiber cloths.
Never use a dry cloth as this can cause a static charge.
In rare cases, contact with chemical substances can cause changes to the device's exterior. Not all substances have been tested due to the wide variety of chemical products available on the market. Impairments to high-gloss finishes can be carefully removed using display polishes for mobile phones.

## Contact with liquid

If the device comes into contact with liquid:
1 Disconnect it from the power supply.
2 Remove the batteries and leave the battery compartment open.
3 Allow the liquid to drain from the device.
4 Dab all components dry.
5 Place the handset in a dry, warm place for at least 72 hours with the battery compartment open and keypad (if applicable) facing down (not in a microwave, oven, etc...).
6 Do not switch on the device again until it is completely dry.
When it has fully dried out, you will usually be able to use it again.

## Technical data

## Batteries

| Technology: | $2 \times \mathrm{AAA} \mathrm{NiMH}$ |
| :--- | :--- |
| Voltage: | 1.2 V |
| Capacity: | 750 mAh |

## Handset operating times/charging times

The operating time of your handset depends on the capacity and age of the battery and the way it is used. (All times are maximum possible times).

| Standby time (hours) ${ }^{*}$ | 165 |
| :--- | :--- |
| Talktime (hours) | 12 |
| Operating time with 1.5 hrs of calls per day (hours) ${ }^{*}$ | 95 |
| Charging time in base station (hours) | 5 |
| Charging time in charging cradle (hours) | 7 |

* without display backlight (Setting the display backlight $\rightarrow$ p. 30)

1 The operating times of the phone can be extended by using a more powerful battery.

## Power consumption of base station

| In standby mode: | Handset in charging cradle <br>  <br> Handset not in charging cradle | approx. 1.2 W <br> approx. 0.55 W |
| :--- | :--- | :--- |
| During a call: | approx. 0.65 W |  |

## General specifications

| DECT standard | Supported |
| :--- | :--- |
| GAP standard | Supported |
| No. of channels | 60 duplex channels |
| Radio frequency range | $1880-1,900 \mathrm{MHz}$ |
| Duplex mode | Time division multiplexing, 10 ms frame length |
| Pulse repetition rate | 100 Hz |
| Pulse transmission length | $370 \mu \mathrm{~s}$ |
| Channel grid | 1728 kHz |
| Bit rate | $1152 \mathrm{kbit} / \mathrm{s}$ |
| Modulation | GFSK |
| Language code | $32 \mathrm{kbit} / \mathrm{s}$ |
| Transmission power | 10 mW, average power per channel, 250 mW pulse power |
| Range | Up to 50 m indoors, up to 300 m outdoors |
| Base station power supply | $230 \mathrm{~V} \sim / 50 \mathrm{~Hz}$ |
| Environmental conditions for operation | $+5^{\circ} \mathrm{C}$ to $+45^{\circ} \mathrm{C} ; 20 \%$ to $75 \%$ relative humidity |
| Dialing mode | DTMF (tone dialing)/ PD (pulse dialing) |

## Bluetooth

## Making calls to multiple parties

## Consultation

You interrupt your call to consult with a user (including external users) and then resume the original call.

You are conducting a call.

## Activating and conducting an inquiry/consultation call

The number is dialed. The station answers. The consultation starts.

The second user is busy or does not answer
5 Press the display key to cancel the consultation. You are reconnected with the first party.
During the consultation you can

- Book a callback $\rightarrow$ page 75 ,
- Activate call waiting $\rightarrow$ page 47 or
- Busy override $\rightarrow$ page 50 .

## The consultation is ended and you return to the waiting call

Either: The second user hangs up. You are reconnected with the first party.
Or:
Activate inquiry. The current call is placed "on hold", so that the first user waits.
Enter the phone number for the consultation call.

Open the system menu.
Select the menu item and confirm.

You are reconnected with the first party. The second partner hears the busy tone and hangs up; a handset hangs up automatically.
However, you can also

- Toggle between the partners $\rightarrow$ page 52 ,
- Set up a conference $\rightarrow$ page 53 or
- Transfer the waiting partner to the second partner $\rightarrow$ page 51 .

## Call waiting

You need to speak to a user in your communications system urgently, even though this user's line is busy. You can send a call waiting signal during the call to let the user know you want to talk to him or her. The user either answers immediately or you will be automatically connected when he or she has finished his call.
This function is only available if it has been configured by the service engineer.
The user is busy. You want to use call waiting.

- Wait until the message "Camp-on" appears on the display (ringing tone).
You receive a call waiting signal (second call)
You are still available to other callers, even though you are on the telephone.
The call waiting signal informs you of the second call while you are conducting a call. You can answer this call without ending the first call.
P You are on a call and hear a call waiting signal.
If you want to answer the second call, you can either place the first call on hold (the first caller waits) or end the first call.

## Placing the first call on hold and answering the second call

Answer the second call.
Talk to the second caller. The first caller waits. His or her call is on hold. You can now:

- Toggle between the two callers $\rightarrow$ page 52 or
- Set up a conference $\rightarrow$ page 53 .

## Ending the second call

## Either:

Open the system menu.
Select the menu item and confirm.
Or:
Press the End call key. The following message appears on the display: "Recalling". Your phone rings.
Press the Talk key to talk to the first caller again.

## Ending the first call

Press the display key to switch to the first caller.
Press the End call key. The first call is ended. Your phone rings.
Press the Talk key and answer the second call.

## Call waiting tone off/on

You can suppress the call waiting tone for external calls.

## Deactivating the call waiting tone

(r) Press and hold down the Talk key.

## T 1 Waiting tone off?

Select the menu item and confirm.
Press the End call key to end the operation.

## Activating the call waiting tone

(a) Press and hold down the Talk key.

Open the system menu.
Select the menu item and confirm.
Press the End call key to end the operation.

|  | Disabling/enabling automatic call waiting <br> You can disable/ enable automatic call waiting signaling for a second call during <br> a telephone conversation. |
| :--- | :--- | :--- | :--- |
| Note: |  |
| This function is only available if call waiting is activated for you in the |  |
| system (consult your administrator). |  |

Override

| You need to speak to an internall user urgently, even though his or her line is |
| :--- |
| busy. The "Override" function allows you to interrupt the ongoing call to pass on |
| a message. |
| This function is only available when the code has been input and if it has been |
| configured by the service engineer. |

The user is busy.
Call the function.
The override is established. The user name or phone number, to whom/which
the call has been transferred, is displayed.
Override is ended when you replace the handset.

## Transferring a call

Transferring a call means that you wish to hand over a call you are conducting on your handset to another user.

## Transfer (without announcing the transfer)

You can use this function to forward a call you answered to another user.
Open the system menu.

Either:

Press the key shown.
The current call is placed "on hold", so that the first user waits.
Enter the phone number of the user to whom the call is to be transferred.
The number is dialed.

Press the End call key. The destination user's phone rings. He or she picks up the call by lifting the handset.

Or:
Select the menu item and confirm.

Open the system menu.
Select the menu item and confirm.
Press the End call key. The destination user's phone rings. He or she picks up the call by lifting the handset.
You receive a recall:

- immediately if you have made a mistake,
- 45 seconds after the transfer if the required user does not answer.

If you do not answer recalls, another telephone defined by the service engineer is called (intercept station).
CTA Startranser?

## Transfer (announcing the transfer)

You can use this function to forward a call you answered to another user.
Open the system menu.
Select the menu item and confirm.

Press the key shown.
The current call is placed "on hold", so that the first user waits.

Either:

Or:

Enter the phone number of the user to whom the call is to be transferred.
The number is dialed. The station answers. You announce the call presently on hold.

Press the End call key. The user takes the call.

## Toggling (switching between calls)

The Toggle function allows you to switch between two users without allowing them to speak to each other directly. The two users can be either external or internal users. You can also withdraw from the calls and connect the two users with each other. You can also start a conference.
You are conducting a call.
Press the display key. The current call is placed "on hold", the user waits.
Enter the phone number of the second user.
The second user answers.
Press the display key to switch between the two calls.
When you end a call, the two users are connected with each other (not possible when both users are external).

Ending a conference
You are connected with two or more partners in a conference call.
Open the system menu.
Select the menu item and confirm. The conference is ended.
Leaving a conference
Press the End call key. You exit the conference.
When one user leaves the conference, the other two users remain connected. If
the party who convenes the conference leaves the conference, all calls are
ended.
Viewing the names of conference parties

## Connecting parties

As the conference convener, you can leave the conference and thereby connect the other parties with each other. If you were previously connected with two or more parties, the other parties remain in a conference. Otherwise, the remaining two users conduct a one-to-one call.

You are connected with two or more partners in a conference call.
Open the system menu.

Press the End call key. You leave the conference; the remaining parties are connected with each other.

## Using the second call feature

The second call is an incoming call that is signaled on your handset during a call and that can be queried by you (for example, $\rightarrow$ page 47).

A second call can be answered in the following call states:

- You are on a single call,
- You are on a consultation call,
- You are holding a conference,
- You are on a call which you intend to add to a conference,
- You are toggling between two partners.

## Note:

A second call is not signaled on the Bluetooth headset.

## Central directories (group directory)

## System phonebook

If the system administrator has entered a name for at least one internal user or system speed dialing destination, then you can use the system phonebook for dialing.

## Opening the system phonebook

T $\boldsymbol{\text { 个 }}$ 1=intnl OK
Finding an entry
朋 Enter the first letters of the name you are looking for. The name is searched for. The search result becomes more precise as each letter is entered, i.e. the number of names found is reduced.

T 1 Select the user you want.

## Dialing an entry

Confirm your selection. The selected number is called.
Quitting the phonebook
5 Press the display key.
Note:
Phone numbers dialed from the system phonebook are not stored in the
redial list.

## Selecting an entry

her: If a single entry is found, it is displayed.

Select the menu item and confirm. The user is called.
If more than one entry is found, the first entry is displayed. A maximum of 50 hits can be displayed.
Scroll through the entries.
Confirm the entry. The user is called.

## If no entries were found

If no entries were found, you can extend the search range by deleting some of the characters entered.

Open the additional menu.
Select the menu item and confirm. You can now change your search entry.

## If too many entries were found

The hit list is not displayed in full if more than 50 entries matching your search query were found. We recommend narrowing down the search by entering more characters. However, even if you do not do this, you can still display the entire hit list, select the required entry and call the selected party.
Open the additional menu.

Select the menu item and confirm. You can now change your search entry.

Select the menu item and confirm. The hit list is displayed.
Conding a list/entry

Press the End call key to end the operation.

## System speed dialing

Your system administrator can save up to 8000 external phone numbers as system speed dialing destinations in your communications system. You can dial these speed dialing destinations with a three-digit code (0000 .... 7999).

## Dialing a system speed dialing destination

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.
Select the menu item and confirm. This function can also be activated directly by entering the appropriate code $\rightarrow$ page 43 .

Enter the required code (4 digits, 0000-7999).

## Note:

The saved speed dialing destinations and the associated codes can be obtained from the organizational unit responsible for administering the communications system.

Abb. dial no:

## Dialing an individual speed dialing destination

(6) Press and hold down the Talk key.

Open the system menu.
Select the menu item and confirm.
Select the menu item and confirm.

Enter the code for the speed dialing destination (*0-*9).

## UCD (Universal Call Distribution)

This function enables calls to be distributed in a team. An incoming call is always delivered to the team member who has been idle longest. Team members can also work in separate rooms, for example, on the company's premises and at a teleworking station. The teams (call distribution groups) and team members are set up by the service engineer.

## Logging on/off

You must log on and off at the system when you start/finish work.

## Register

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.
Select the menu item and confirm.
Select the menu item and confirm.
Enter your identifier number (assigned by the service engineer).
Press the End call key to end the operation.

## Logging off

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.
Select the menu item and confirm.
Select the menu item and confirm.
Press the End call key to end the operation.

## Logging on/off temporarily (availability)

You can log on or off at the system temporarily, for example, during break times.

## Logging off (not available)

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.
Select the menu item and confirm.
Select the menu item and confirm.
Press the End call key to end the operation.
Logging on (available)
Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.

## Mulap group (Multiple Line Application)

If your handset's line belongs to a Mulap group (Multiple Line Application), then you can

- answer calls for the group (press the Talk key in group calls)
- make external telephone calls under the group phone number (the group phone number is stored in the called party's caller list, for example)
- activate and deactivate the group call function for your handset's line
- forward the lines of the Mulap group to internal or external destinations

## Activating/deactivating group calls

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.

Select the menu item and confirm.

Select the menu item and confirm.

Select the menu item and confirm.

Press the End call key to end the operation.

## Forwarding a Mulap line

You can immediately forward internal and/or external calls to your lines to different internal or external telephones (destinations) (external destinations are also possible if the system is configured accordingly).

If you activate call forwarding for a line, this shall apply to all line keys of your group for this line.

## Message functions

The message functions enable you to react to voicemail/callback services of the communication system or of other users or to initiate information features yourself.

## Leaving a message/advisory message

A number of advisory messages are stored in your communication system that can be automatically sent to the caller when an internal call is not answered (in the case of handsets and telephones with display). These advisory messages can be selected and supplemented in part by you:
$0=$ Will return at:
1 = On vacation until:
$2=$ On trip until:
3 = Out all day
4 = Out to lunch
$5=$ Not available
6 = Home phone:
7 = Contact:
8 = Avail at:
9= In room no.:
These advisory messages are standard texts and may have been changed in your communication system.

## Activating an advisory message

Press and hold down the Talk key.
Open the system menu.

## If necessary

Save the message.
Select the menu item and confirm.

Select the required advisory message.
Add text if appropriate, e.g. time 12.00 or date 26.01. (use the Star key to create the period sign).
Save the settings.

Select the menu item and confirm.
Enter the required advisory message.
Typing errors can be corrected: activate delete mode by double-clicking the hash key and then use the hash key to delete a character.

## Note:

For example, if you want to enter the third character on a key: press the relevant key three times in succession.

Press the End call key to end the operation.

## Deactivating an advisory message

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.
Press the End call key to end the operation.

## Sending/calling text messages

You can send short messages to individual internal users or to groups of internal users. These must have a handset or telephone with display.

These text messages can be selected and supplemented in part by you:
$0=$ Please call back
1 = Someone is waiting
2 =Appointment
3 = Urgent call
4 = Do not disturb
$5=$ FAX waiting
6 = Dictation please
7 = Please come see me
8 = Please make coffee
9 = Ready to depart
These text messages are standard texts and may have been changed in your communication system.

## Sending a text message

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.

Enter the phone number for the required internal user or the group.

Select the required advisory message.

Select the menu item and confirm.
Enter the required text message.
Typing errors can be corrected: activate delete mode by double-clicking the hash key and then use the hash key to delete a character.

## Note:

For example, if you want to enter the third character on a key: press the relevant key three times in succession.
Press the Start key first to switch to upper-case input.

Cither:

## Answering or rejecting a call

## Accepting a call

Your handset rings $\rightarrow$ page 25. The caller information appears on the display. The name and/or telephone number of the caller can be displayed. You have the following options for answering a call:

The handset is in the charging shell: Remove the handset from the charging cradle (only works if "Auto Answer" is active, $\rightarrow$ page 25).
The handset is not in the charging cradle. Press the Talk key.
When you have accepted the call you can:

- Transfer the call $\rightarrow$ page 51,
- Place the call on hold and consult with someone else in the room $\rightarrow$ page 50,
- Place the call on hold and call a second partner $\rightarrow$ page 50 in order to forward $\rightarrow$ page 51 or toggle the call $\rightarrow$ page 52 or to set up a conference $\rightarrow$ page 53 .

## Rejecting a call

If you do not wish to be disturbed, you can reject the call.
Confirm the message displayed with one of the two display keys. The call is rejected and the caller hears the busy tone. You are routed to the other party's mailbox (if configured) or can program a callback request $\rightarrow$ page 75 .

## Picking up a call in a call pickup group

You can use your handset to pick up calls to telephones within your call pickup group (set by the service engineer). This is also possible when you are conducting a call.

## Prerequisite:

You hear that a telephone in your call pickup group is ringing.
Press and hold down the Talk key. The message "Call for:" appears on the display.
Open the system menu.
ITI Goup Padup?
Select the menu item and confirm.
P You are conducting the call.

Or:

Or:
1 ${ }^{3 \text { =intemal calls only? }}$

This function is for when you leave your desk for a while and want certain calls to be forwarded to your new location. The forwarding destination for internal calls can be any internal or external phone number. The destination number is usually an external phone number because you can be reached internally anytime by means of your handset.

## Activating call forwarding

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.

Select the menu item and confirm.

Select the menu item and confirm.

Select the menu item and confirm.

Enter the destination number.
Save the settings.
Press the End call key to end the operation.

## Note:

The external code must be entered before external phone numbers.

## Deactivating call forwarding

## Prerequisite:

The call forwarding function is activated.
Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.
Press the End call key briefly to end the operation.

## Directed assignment of an MSN (multiple subscriber number)

Multiple subscriber numbers are phone numbers belonging to an ISDN multiple device line. They are used for the directed addressing of terminals, for example when a fax machine has a separate number. Before selecting an external connection, you can directly assign a configured multiple subscriber number. The assigned number then appears on the called party's display.
This function can also be called by entering the code $\rightarrow$ page 43.
Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.

Select the menu item and confirm.

Enter the required MSN (for example111).

Enter the required external phone number. The phone number is dialed.

## Making calls using identification codes

In the case of calls you make to external partners, you can enter and charge the call costs on the basis of individuals, customers, accounts and private calls, for example, by means of account codes. The account code (ACCT) can contain up to 11 characters and is included in the data printout. The ACCT is only transferred after a call has been completed. The ACCT can be entered before and during the external call.
This function can also be called by entering the code $\rightarrow$ page 43.
Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.
Select the menu item and confirm.
Enter the required account code (optional).
Save the settings.
Enter the external phone number. The phone number is dialed.

## Note:

If a call is transferred, the costs are still assigned to the ACCT entered.

|  | Directed call transfer <br> You can transfer calls to other telephones to your handset. This is also possible <br> when you are conducting a call. <br> This function can also be called directly by entering the code $\rightarrow$ page 43. <br> Another telephone rings. |
| :--- | :--- | :--- |
| Press and hold down the Talk key. |  |
| Open the system menu. |  |

## Deactivating do not disturb

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.
Press the End call key to end the operation.

## Call charge display

After a call has ended, the display shows the connection charges for the current call as standard. If the costs are to be displayed continuously during an outgoing call, this function must be requested from the carrier.

## Note:

If a call is transferred, the costs are assigned to the telephone to which the call was transferred from this point onwards.

You can check and display the call charges for your phone number as a total for a period that can be set by the service engineer.

First the call charges for the last charged call are displayed. The total call charges are displayed after five seconds.

This function can also be called directly by entering the code $\rightarrow$ page 43 .
Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.

Select the menu item and confirm.
Press the End call key to end the operation.

## Tracing a call

You can apply to your carrier for "call tracing" on malicious calls. An authorized extension is then in a position to request the identification of the phone number.
This also works for 30 seconds after the malicious caller has hung up. However, you should not hang up.
This function can also be called directly by entering the code $\rightarrow$ page 43 .
You receive a malicious call.
Do not hang up.
Open the system menu.
Select the menu item and confirm.

Select the menu item and confirm. The caller is identified in the attendant console.
(- Press the End call key to end the operation.

## Entrance telephone

If the service engineer has set up an entrance telephone, you can speak to the door intercom and activate the door opener from your handset.

If you are authorized to release a door, then a user can open the door by entering a five-digit code (for example, by means of a DTMF transmitter or installed keypads).
Some of the functions described below can also be called directly by entering the relevant code $\rightarrow$ page 43.

## Talking to a visitor by means of the door opener equipment

Your handset rings.

## Either:

Press the Talk key within 30 seconds. You are connected to the entrance telephone immediately.
(-) If more than 30 seconds have passed: Press and hold down the Talk key.

Enter the internal phone number for the door opener. You are connected to the door opener.

## Using the handset to open the door opener during a call

Select the menu item and confirm.

## Using the handset to open the door opener without holding a conversation

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.

Select the menu item and confirm.
Enter the internal phone number for the door opener. The door is opened.
Press the End call key to end the operation.

## Activating the door release

This function only works if it has been configured by the service engineer.
Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.

Select the menu item and confirm.
Follow the user guidance system from this point onwards. Enter the internal phone number of the door opener, as well as the code and type of door release:

- $1=$ enable with ring,
- 2=enable w/o ring,
- 3=change password.

OK Confirm your entries.
(Press the End call key to end the operation.
Note:
Standard code " 00000 ". To change the code, confirm option "3=change
password". Follow the user guidance system.

## Deactivating the door opener

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.

Select the menu item and confirm.
Press the End call key to end the operation.

## Activating control relays

The service engineer can set up a maximum of 4 control relays that enable various equipment (for example, door opener) to be activated and deactivated.
It is possible to access a specific control relay. Depending on the configuration, the control relays can be

- activated and deactivated automatically, or
- activated and deactivated automatically on the basis of a timer.

Prerequisite: The service engineer has set up at least one switch.
This function can also be called directly by entering the code $\rightarrow$ page 43 .

## Activating a control relay

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.

Select the menu item and confirm.
Follow the user guidance system from this point onwards. Enter the required switch code (1... 4).
(-) Press the End call key to end the operation.

## Deactivating a control relay

(-) Press and hold down the Talk key.

Menu
Open the system menu.

## ค 1 Service?

च $\uparrow$ \#90=Control Relay Off?

OK

OK
(-) Press the End call key to end the operation.

## Using dual-tone multifrequency signaling

Your handset operates on the basis of digital information transmission. However, certain applications, for example answering machines, can only be operated using analogue technology. For this you have to send signals using the dualtone multifrequency signaling (DTMF) process.
Depending on how your system is configured (automatic tone dialing on or off to be configured by the service engineer) you must first switch to DTMF dialing. This means, for example, that you can communicate with a variety of voice storage systems.

You will find further details in the operating instructions for the relevant applications.

## Automatic tone dialing is not active

During a connection you have to first switch to dual-tone multifrequency signaling.

You are conducting a call.
Open the system menu.
Select the menu item and confirm.

Select the menu item and confirm.
Enter the numbers. All entries are sent as DTMF signals.

## Automatic tone dialing is active

Enter the numbers. All entries are sent as DTMF signals.

## Parking/activating calls

You can park up to ten calls (i.e. place them on hold) and then reactivate them at other telephones in your communication system.

## Parking a call

You are on a call you wish to park.
Open the system menu.

Enter the parking position number (0... 9) and note it down.
If the parking position number entered is already in use, you have to enter another one.

## Picking up a specific parked call

## Prerequisite:

One or more calls have been parked. Your handset is in stand-by status.
Press and hold down the Talk key.
Open the system menu.

Enter the parking position number you have noted.

## Note:

If a parked call is not picked up, it returns to the station from which it was parked after a certain time (= recall). The following appears on the display "Recalling: (phone no. or name)" or "recalling from (phone no. or name)".

## Deleting/checking entered appointments

[^2]
## Locking/unlocking the handset

You can lock your handset to prevent external dialing and programming, thereby preventing unauthorized use in your absence, for example.
Prerequisite: You have defined a personal code or use the default code "00000".

## Locking the handset

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.
Enter the PIN code ( 5 digits, default "00000").
Press the End call key to end the operation.
Note:
Even though it is locked, you can still use your handset to answer external
calls and make internal calls. When an external connection is established,
the following message appears on the display "Telephone Lock Active".
Your handset can also be locked from a central station $\rightarrow$ page 91.

## Unlocking the handset

Press and hold down the Talk key.
Open the system menu.
Select the menu item and confirm.
Enter the PIN code ( 5 digits, default " 00000 ").
Press the End call key to end the operation.
