

# OpenScape Business V3

## How to Configure SIP Trunk for Orange BE SIP

---

## About this document

This configuration guide describes an example of how to set up the SIP trunk for **Orange BE SIP** as an ITSP connection to the OpenScape Business.

**Note:** The basis for this document is the current OpenScape Business *V3R2.1*. Since OpenScape Business is constantly developed, input masks and interfaces as well as requirements may change in the future. The settings and entries described here then apply accordingly.

<b>System</b>	OpenScape Business
<b>Released with Version</b>	<i>V3R2.1</i>
<i>Orange BE SIP</i>	<b>Features &amp; Capabilities</b>
<b>Account (DID/Client)</b>	<i>DID</i>
<b>Multisite</b>	<i>yes - dedicated trunk</i>
<b>CLIP / CLIR</b>	<i>yes / yes</i>
<b>CLIP no Screening</b>	<i>yes <sup>1)</sup></i>
<b>COLP</b>	<i>no</i>
<b>Call Forwarding (302)</b>	<i>no</i>
<b>DTMF (RFC2833/4733)</b>	<i>yes</i>
<b>Codecs G711/G729</b>	<i>yes / yes</i>
<b>T.38 Fax</b>	<i>yes</i>
<b>Secure trunk</b>	<i>no</i>

Orange delivers a CPE device to the customer. This CPE device has typical an xDSL uplink to the providers SIP Trunk. The CPE does get an IP Address which is in the same subnet of the customer PBX. ITSP is reached via static route configured in OpenScape Business. The ISP is reached via different router.

<sup>1)</sup> In default the Orange profile has CLIP no Screening activated. The user must sign an agreement for CLIP no Screening. As long as the user has not signed the agreement with Orange, forwarded calls will be rejected! If CLIP no Screening agreement is not signed the profile needs to be changed.

## Configuration Data

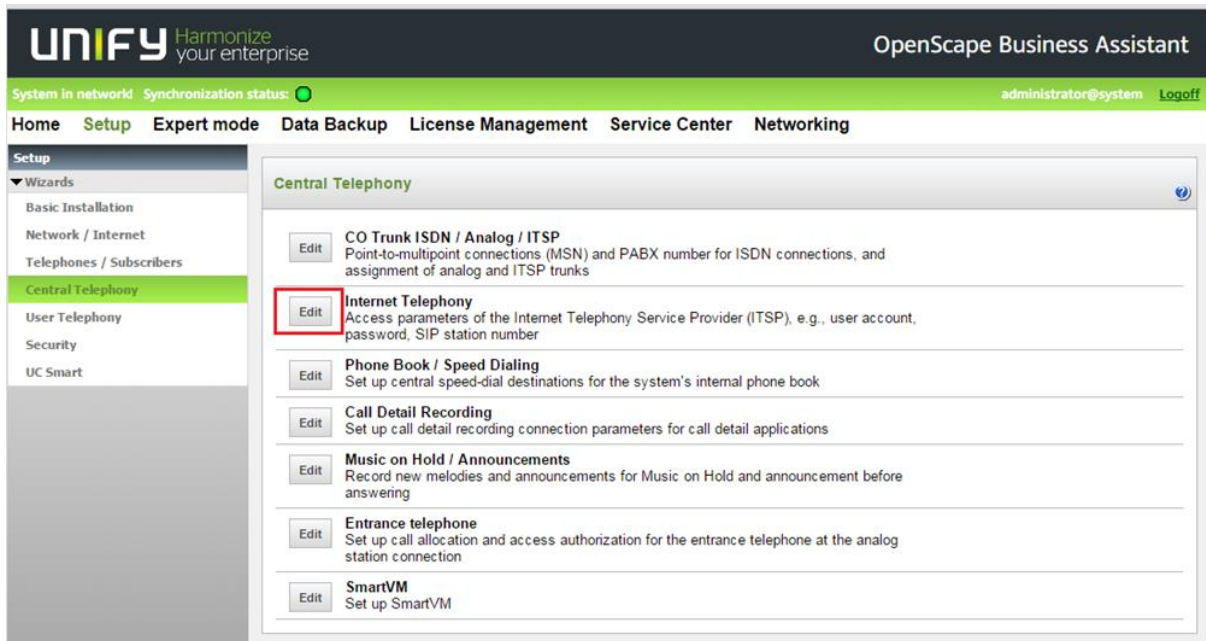

Information from Orange BE SIP :

Name	Example
Call Number:	(89) 550840.....550849
NDG	+3289550840
SIP Username:	03081586-03210205-NDG@sip.mobistar.be
SIP Password:	Example : <i>MY*3xt)5/X2sMYA^ho]</i>
Number of voice-channels:	2

# Configuration Wizard

## Internet Telephony

Go to „Central Telephony – Internet Telephony“

The overview page appears for entering the location data. The most flexible type of configuration is to enter the Country code only.

Setup - Wizards - Central Telephony - Internet Telephony

Overview

Note: changes done in expert mode must be reviewed/repeated after running through the wizard

Note: At least the configuration of the 'Country code' is needed for features such as 'Internet telephony' and 'MeetMe conference'.

PABX number

Country code: 00 32 (mandatory)

Local area code: 0 (optional)

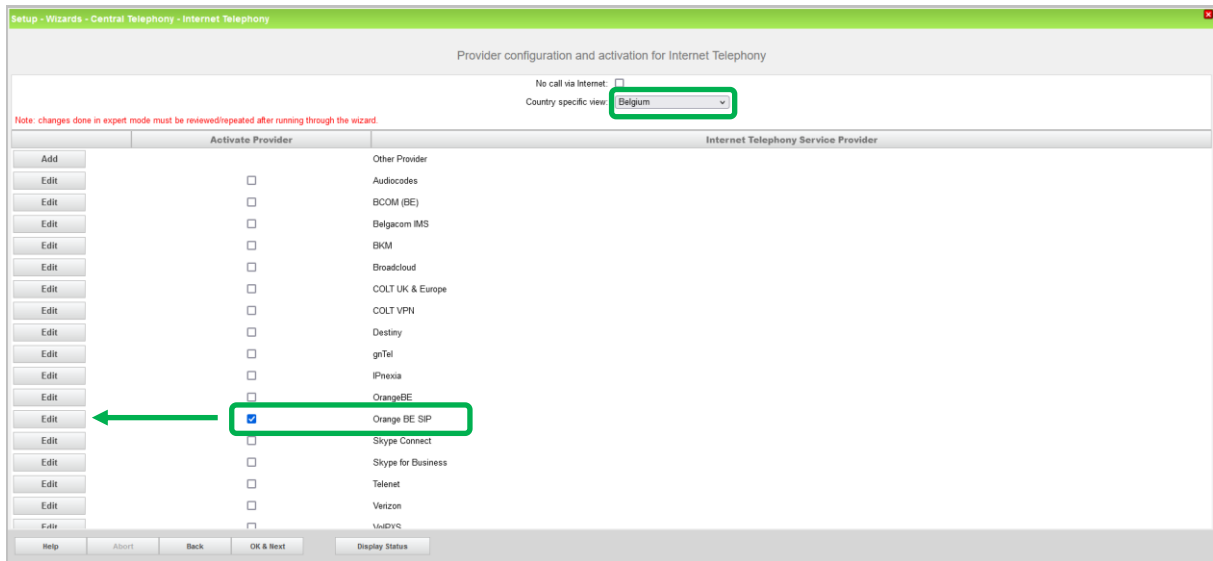

PABX number: (optional)

Help Abort Back OK & Next

In this case, remaining digits are filled in DID field.

Click [OK & Next]

Provider configuration and activation for Internet Telephony -> No call via Internet -> uncheck  
Use County specific view : Belgium and select Orange BE SIP

Activate Provider and click on [Edit].

The following settings are shown. They should not be changed.

Setup - Wizards - Central Telephony - Internet Telephony

Internet Telephony Service Provider

Provider Name: Orange BE SIP

Enable Provider:

Secure Trunk:

Domain Name: sip.mobistar.be

Transport protocol: udp

**Provider Registrar**

Use Registrar:

IP Address / Host name: 212.224.167.105

Port: 5060

Reregistration Interval at Provider (sec): 600

**Provider Proxy**

IP Address / Host name: 212.224.167.105

Port: 5060

**Provider Outbound Proxy**

Use Outbound Proxy:

IP Address / Host name: 0.0.0.0

Port: 0

**Provider Inbound Proxy**

Use Inbound Proxy:

IP Address / Host name: 0.0.0.0

Port: 0

**Provider STUN**

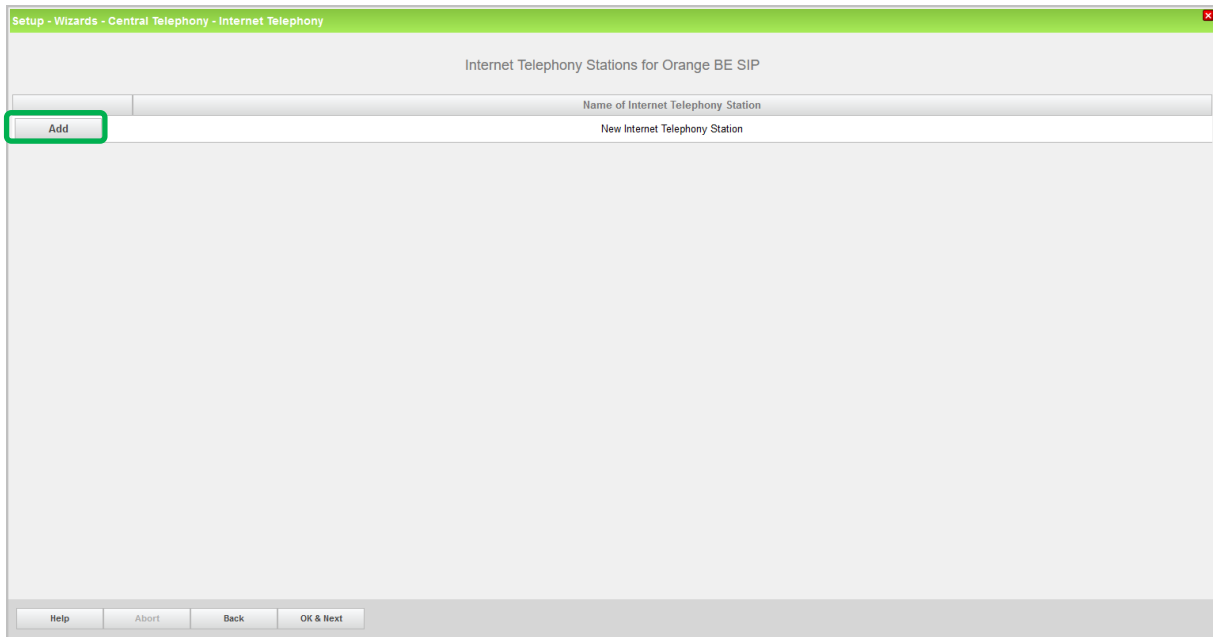

Use STUN:

## Internet Telephony configuration

In this dialog the specific customer SIP User data will be configured.

Click on [Add].

Data provided by ITSP Orange BE SIP is inserted here.

Internet telephony station: "NDG" is inserted here

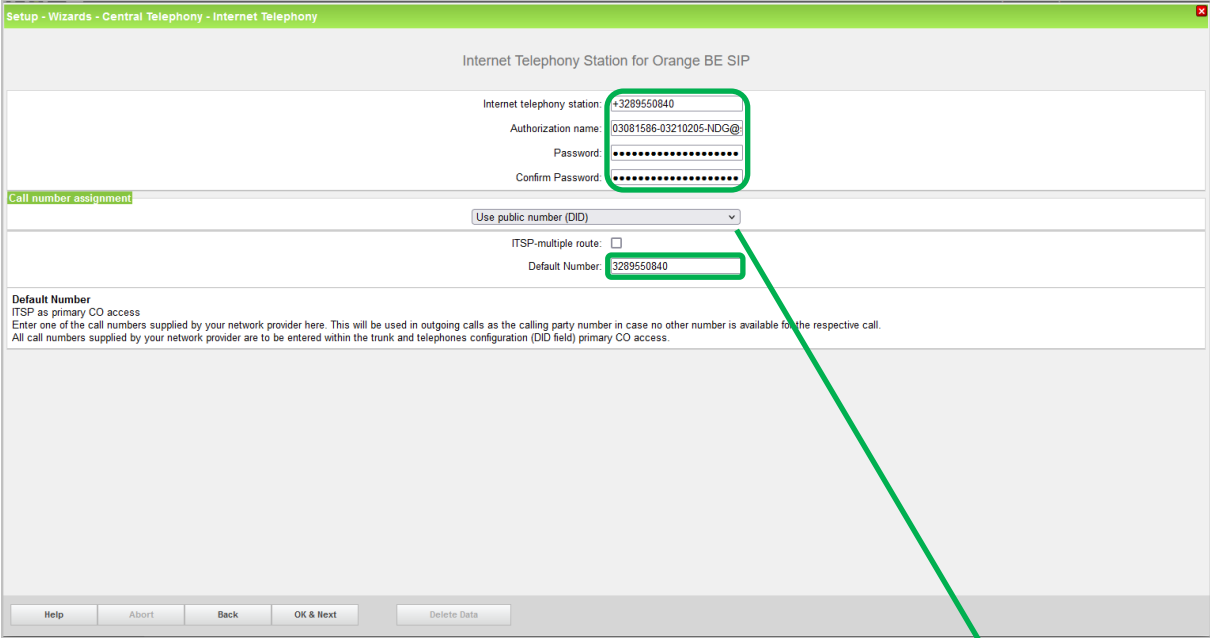

Authorization name: "SIP Username" is inserted here

Password: Enter password

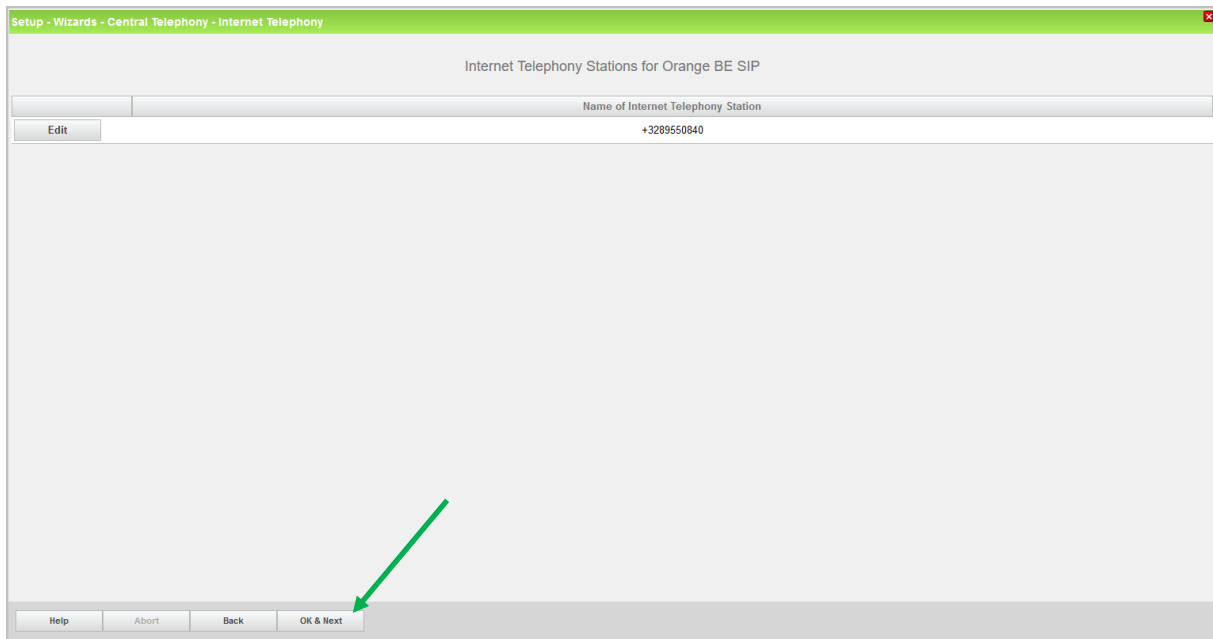

Call number assignment: select "Use public number (DID)". This is the easiest and preferred way to define the phone numbers in the system. Phone numbers are treated as a normal DID number in the system as if it was normal ISDN.

ITSP multiple route: Must be used in case more than one account of the same provider has to be configured on the same system. When this flag is activated, you will be able to define extra accounts.

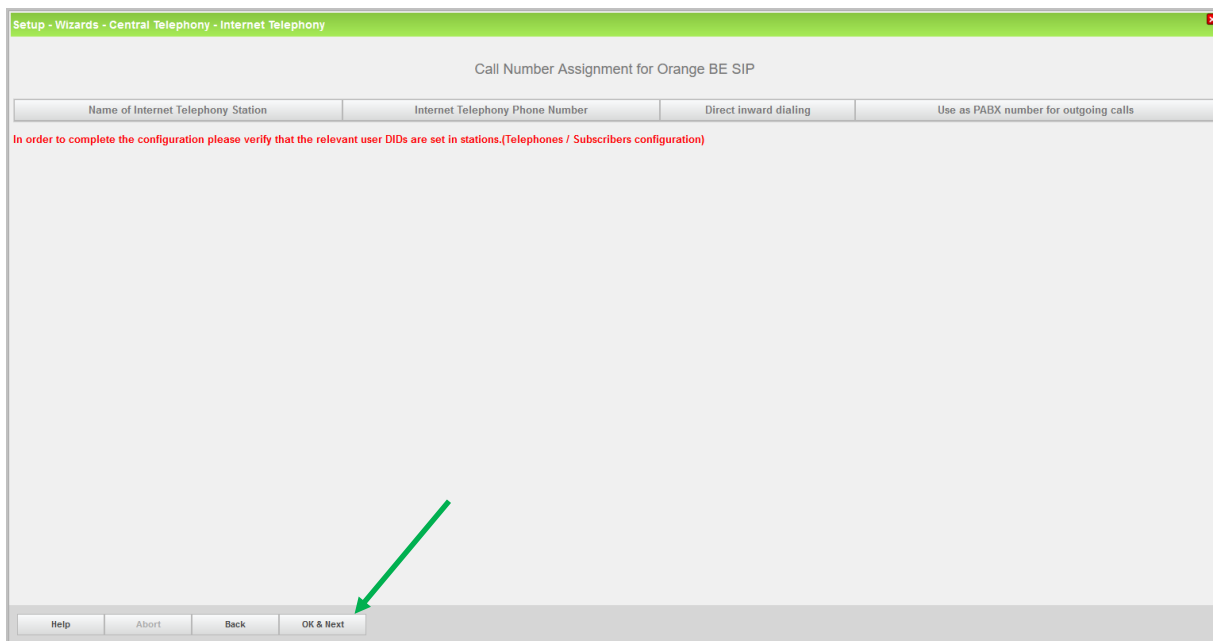

Default number: Main number of connection. The default number is used as outgoing number when no DDI number is assigned to a station. (Number must be in Implicitly International format).

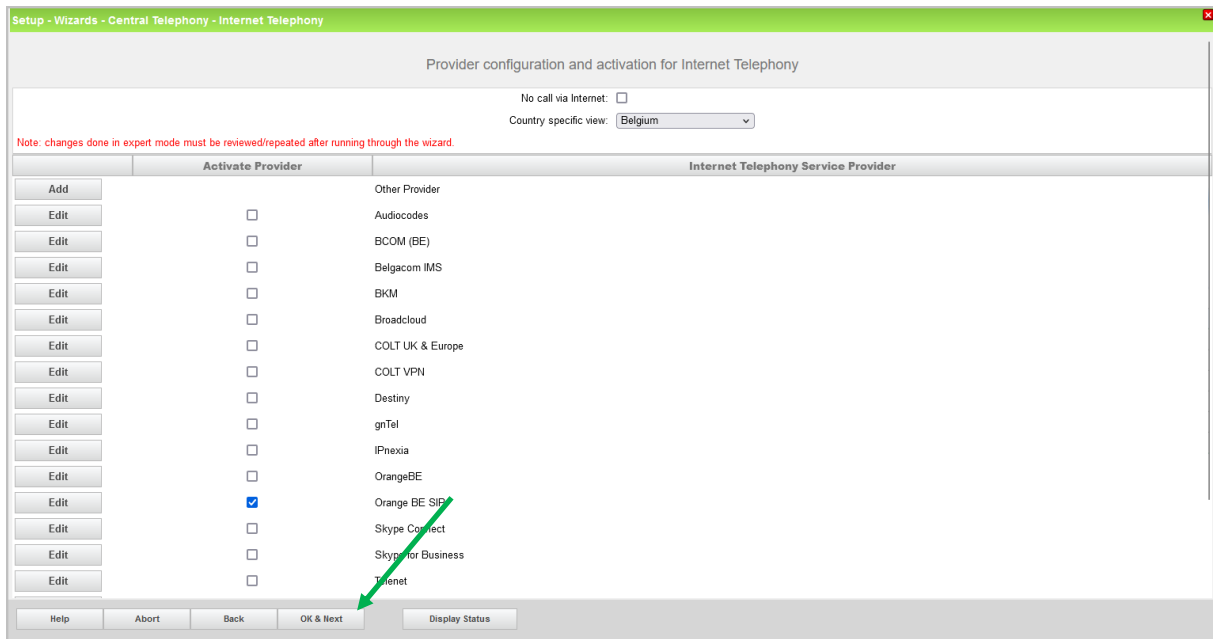

Click [OK & Next].

Click [OK & Next].

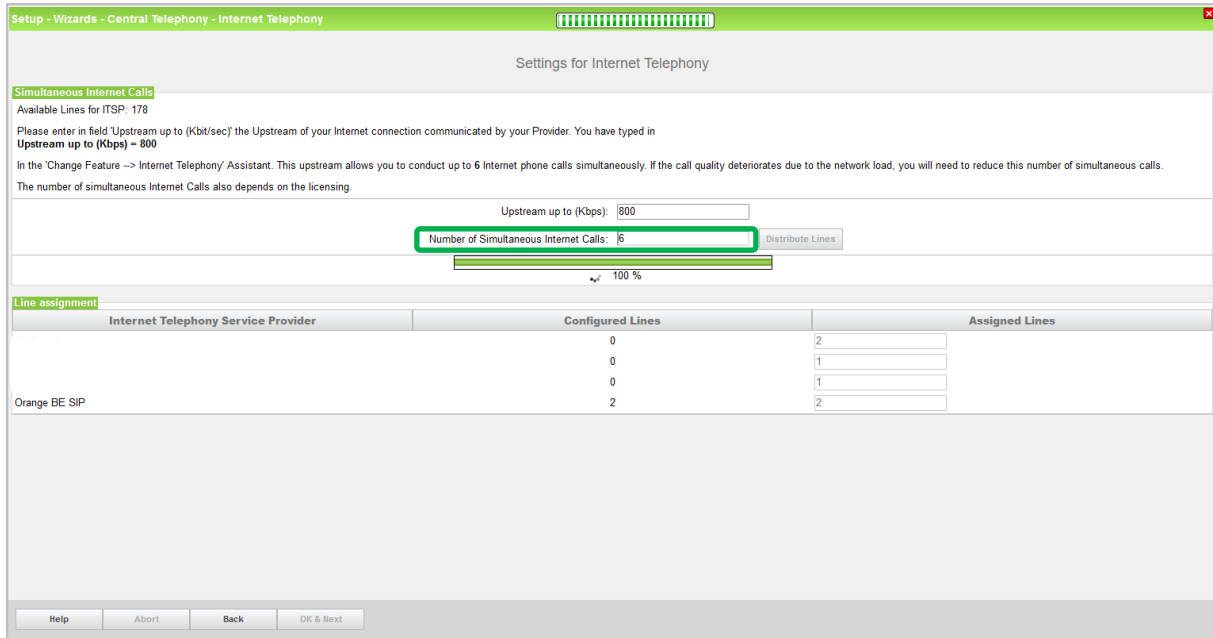

Click [OK & Next] (no input needed)

Click [OK & Next] (no input needed)

## Define bandwidth (# Trunks)

In the next part the number of simultaneous calls via the SIP trunk will be defined. The calculation of the number of trunks is done by the wizard automatically depending on the bandwidth. For each 128K, one trunk is created. The number can also be defined manually.

Setup - Wizards - Central Telephony - Internet Telephony

Settings for Internet Telephony

**Simultaneous Internet Calls**

Available Lines for ITSP: 178

Please enter in field 'Upstream up to (Kbit/sec)' the Upstream of your Internet connection communicated by your Provider. You have typed in **Upstream up to (Kbps) = 800**

In the 'Change Feature -> Internet Telephony' Assistant. This upstream allows you to conduct up to 6 Internet phone calls simultaneously. If the call quality deteriorates due to the network load, you will need to reduce this number of simultaneous calls. The number of simultaneous Internet Calls also depends on the licensing.

Upstream up to (Kbps): 800

Number of Simultaneous Internet Calls: 6 Distribute Lines

100 %

**Line assignment**

Internet Telephony Service Provider	Configured Lines	Assigned Lines
	0	2
	0	1
	0	1
Orange BE SIP	2	2

Help Abort Back OK & Next

Click [OK & Next]

## Special phone numbers

In this dialog it is possible to route special phone numbers. When special phone numbers are not supported over the ITSP route it is possible to change this here.

Special phone number	Dialed digits	Dial over Provider
1	0C112	Orange BE SIP
2	0C100	Orange BE SIP
3	0C101	Orange BE SIP
4	0C102	Orange BE SIP
5	0C105	Orange BE SIP
6	0C1813	Orange BE SIP
7	0C1712	Orange BE SIP
8	0C116	Orange BE SIP
9	0C106	Orange BE SIP
10	0C1XXX	Orange BE SIP
11		Orange BE SIP
12		Orange BE SIP
13		Orange BE SIP
14		Orange BE SIP
15		Orange BE SIP

Click OK & Next and the ITSP status will be displayed

Provider	Enabled	User	Diagnose
	Enabled	registered	Diagnose
Orange BE SIP	Enabled	+3289550840	Diagnose
	Enabled	registered	Diagnose

In case status LED is orange there is something wrong in the previous configuration.

After this status page the dialog with „Exchange Line Seizure“ is displayed.

Here you need to configure your own local area code. This is needed to make external calls without the area code. The LCR will be adapted accordingly.

Setup - Wizards - Central Telephony - Internet Telephony

### Exchange Line Seizure

**Exchange Line Seizure**

Trunk Access Code: 0

Dial over Provider: Orange BE SIP

**Area Code**

Please enter the local area code.

Local area code: 0 89
