

REACH Compliance Statement

Issued: January 5, 2021

We are in compliance with the requirements set by the REACH-Regulation (EC) No 1907/2006 and are closely following any modification of the REACH-Regulation as well as of the candidate list. We shall inform you in the framework of our business relations about the changes to our products resulting from REACH and agree on suitable measures on a case-by-case basis.

With regard to article 33(1) of the REACH-Regulation, we would like to communicate the following information: An information, on whether the recently added substances of the current candidate list in our articles or their packagings in a concentration above 0.1 mass-% cannot yet be given, because firstly information of our suppliers must become available.

- According to the published substances of very high concern (SVHC) on the previous candidate list and to the new REACH article definition as ruled out by the ECJ sentence issued on September 10, 2015, we inform you about the SVHC that have been reported to us by article suppliers in our upstream supply chain.

From January 5, 2021 we are reporting the SVHC thru the ECHA SCIP data base:

[SCIP](#) is the database for information on Substances of Concern In articles as such or in complex objects (Products) established under the Waste Framework Directive (WFD).

Companies supplying articles containing substances of very high concern (SVHCs) on the Candidate List in a concentration above 0.1% weight by weight (w/w) on the EU market have to submit information on these articles to ECHA, as from 5 January 2021. The SCIP database ensures that the information on articles containing Candidate List substances is available throughout the whole lifecycle of products and materials, including at the waste stage. The information in the database is then made available to waste operators and consumers.

For such products with SVHC reporting obligations according to REACH article 33(1) where we are in the in the manufacturer role and a Declaration of Conformity is declared by Unify Software and Solutions GmbH & Co. KG according to the CE marking obligations and is provided on the [Atos Unify Expert WIKI](#), the related SCIP NUMBERS are listed in the table on the following page.
