#### Base

Your handset is registered with a OpenScape Cordless IP V2 multicell system, that can comprise many base stations. When you move around with your handset within range of the multi-cell system, the handset automatically connects to the base station having the best connection (roaming). You can also move around freely during a call without the connection being interrupted (handover).

Information on starting and administration of base stations, and on registering a handset with a multicell system:

→ User guide "OpenScape Cordless IP V2 - Administrator Documentation"

# Safety precautions

<b>!i</b>	Read the safety precautions and the user guide before use.
Ŵ	The device cannot be used in the event of a power failure. In case of a power failure is also <b>not</b> possible to make <b>emergency calls</b> .
	Emergency numbers <b>cannot</b> be dialled if the <b>keypad/display lock</b> is activated!
ø	Use only <b>rechargeable batteries</b> that correspond to the <b>specification</b> (see list of permitted batteries $\rightarrow$ <u>www.wiki.unify.com /wiki/DECT_Mobilteile</u> ). Never use a conventional (non-rechargeable) battery or other battery types as this could result in significant health risks and personal injury. Rechargeable batteries, which are notice ably damaged, must be replaced.
	The handset must not be operated if the battery cover is open.
Ŵ	Ensure that the batteries can not be short-circuited by objects in the battery compar- ment
<b>Å</b>	Do not use the devices in environments with a potential explosion hazard (e.g. paint shops).
X	The devices are not splashproof. For this reason do not install them in a damp enviror ment such as bathrooms or shower rooms.
A	Use only the power adapter indicated on the device.
Ŷ	Whilst charging, the power socket must be easily accessible.
$\checkmark$	Remove faulty devices from use or have them repaired by our Service team, as these could interfere with other wireless services.
<b>*</b>	Do not use the device if the display is cracked or broken. Broken glass or plastic can cause injury to hands and face. Send the device to our Service department to be repaired.
(i),	Keep small cells and batteries, which can be swallowed, out of the reach of children Swallowing a battery can lead to burns, perforation of soft tissue and death. Severe burns can occur within 2 hours of swallowing. In the case of a swallowed cell or battery, seek medical care immediately.
•	Using your telephone may affect nearby medical equipment. Be aware of the tech- nical conditions in your particular environment, e.g. doctor's surgery. If you use a medical device (e.g. a pacemaker), please contact the device manufacturer. They wi be able to advise you regarding the susceptibility of the device to external sources o high frequency energy (for the specifications of your product see "Technical data").
i	If a USB adapter cable is included, only use a USB power supply (5Volt) with USB-A connection. The use of other voltage sources e.g. PC's with USB connection can caus damage.

If a plug-in power supply is included, please use this power supply.

# **Getting started**

# Contents of the package

- One handset
- One battery cover (rear cover for the handset)
- One battery
- One belt clip
- One rubber cover for the headset socket
- One rubber cover for the USB connection
- One user guide

The charging cradle is designed for use in closed, dry rooms within a temperature range of +5°C to +45°C.

Never expose the telephone to heat sources, direct sunlight or other electrical devices.

Protect your telephone from moisture, dust, corrosive liquids and vapours.

The device's feet do not usually leave any marks on surfaces. However, due to the multitude of different varnishes and polishes used on furniture, contact marks on the surfaces cannot be completely ruled out.

This device is only suitable for a maximum installation height of 2 m.

# Handset

#### Connecting the charging cradle

- Connect the flat plug of the power adapter 1.
- Plug the power adapter into the power socket 2. ▶

To remove the plug from the charging cradle again:

- Disconnect the power adapter from the mains power supply.
- Press the release button 3. ►
- Pull out the plug 4.

# Setting up the handset for use

The display is protected by a plastic film. > Please remove the protective film!

#### Inserting the batteries

Only use rechargeable batteries, as this could otherwise result in significant health risks and personal injury. For example, the outer casing of the batteries could be destroyed or the batteries could explode. The device could also malfunction or be damaged as a result of using batteries that are not of the recommended type.

Insert the batteries (for correct +/- direction, see diagram).

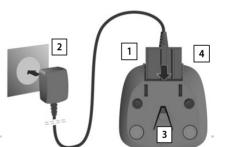

- the recesses with the inside 

  Remove the belt clip of the casing 3.
- Press the cover until it clicks into place.

- Line up the battery cover at To re-open the battery cover:
  - (if attached).
  - Use your fingernail to reach into the recess and pull the battery cover up 1.

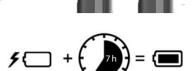

#### Covering the headset socket

- Plug the lug of the rubber cover for the handset socket into the opening on the left of the handset.
- Press down the cap of the rubber cover.

#### Charging the batteries

• Charge the batteries fully prior to first use in the charging cradle or using a standard USB mains adapter.

The batteries are fully charged when the power icon disappears from the display.

Deutsch

English

Francais

 $(\mathbf{i})$ 

The battery may heat up during charging. This is not dangerous. After a time, the charge capacity of the battery will decrease for technical reasons.

Handsets contained in the package have already been registered to the base station. In the event that a handset is not registered however, (indicated by **Please register** handset), register the handset manually.

As soon as power is applied to the handset, a Setup wizard starts.

#### Setting the display language

 Press the control key until the language required is selected on the display, e.g. English press the display key OK

You can also change the display language later on in the **Settings** menu.

#### **Registering a handset**

Register the handset with the OpenScape Cordless IP V2.

Registration must be initiated **both** on the OpenScape Cordless IP V2 **and** on the handset. For this, the handset must be within range of the OpenScape Cordless IP V2.

#### On the OpenScape Cordless IP V2

Start the registration process

Information for this:

- -> User guide "OpenScape Cordless IP V2 Administrator Documentation"
- or: Contact the administrator of the DECT network.

#### On the handset

You require the 4-digit system PIN (registration code) generated on the OpenScape Cordless IP V2.

If the handset is not yet registered with a base:

Select the base > Selection > The Enter the system PIN > Register

If the handset is already registered with a base:

► ... Use to select Settings ► OK ► Registration ► OK ► Register Handset ► OK ► Select the base ► Selection ... A search is performed for a base ready for registration ► Registration ► Registration ► CK

Once registration is complete, the handset returns to idle mode. Shown on the idle display is the name set on the OpenScape Cordless IP V2 for the handset (user name or display name). If it is not, repeat the procedure.

#### Your phone is now ready for use.

The handset can be registered with up to four base stations. Changing the base:

► ... Use to select Settings ► OK ► Registration ► OK ► Select Base ► OK ► Select the base ► OK

# Attaching the belt clip

The handset has notches on each side for attaching the belt clip.

- Attaching the belt clip: ▶ Press the belt clip onto the back of the handset so that the tabs on the belt clip click into place in the notches.
- Removing the belt clip: 
   Press the centre of the belt clip firmly with your right thumb.

   Push the nail of your left thumb up between the clip and the casing.
   Slide the clip upwards to remove.

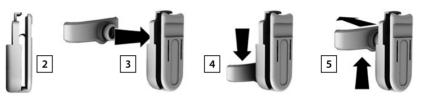

#### Professional belt clip (accessory)

Attaching the belt clip:

Press the holder on the back of the handset so that the tabs click into place in the notches 1.

- Secure the belt clip on the belt 2.
- ▶ Hook in the handset with holder into the belt clip 3 and push it down 4.

Removing the belt clip:

Push the handset up and unhook it from the belt clip 5.

#### Connecting the headset

- Remove the cover from the headset socket.
- Connect the headset with 3.5 mm jack to the left side of the handset 1.

#### or

Setting the headset volume: -> p. 36

# 1

#### Connecting the USB data cable

For data exchange between the handset and PC:

Connect the USB data cable with micro-USB plug into the USB socket at the bottom of the handset 1.

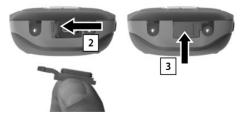

Connect the handset directly to the PC, not via a

 $(\mathbf{i})$ 

USB hub. If you do **not** connect a USB cable, insert the

- rubber cover (provided) to guarantee protection from splash water.
- Insert the lug of the rubber cover on the left of the opening 2.
- Press down the cap of the rubber cover 3.

# Using the telephone

# Getting to know your telephone

#### Switching the handset on/off

Switch on: Press and hold the End call key on the handset when switched off

Switch off: When the telephone is in idle status, press and hold the End call key

#### Locking/unlocking the keypad

The keypad lock prevents any accidental use of the telephone.

Lock/unlock the keypad: Fress and hold

Keypad lock activated: the symbol Or appears in the display.

If a call is indicated on the handset, the keypad automatically unlocks and you can accept the call. It then locks again when the call is finished.

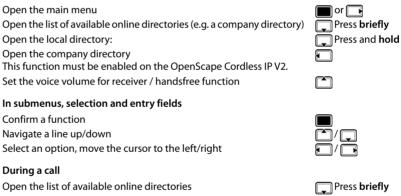

#### **Control key**

The control key enables you to navigate the menus and input fields, and also to call up certain functions depending on the situation.

In the description below, the side of the control key (up, down, right, left) that you have to press in the different operating situations is marked in black, e.g. press right on the control key" or press right on the control key" or press right on the control key of the c "press the centre of the control key".

#### When the phone is idle

Open the local directory: Open company directory (if enabled) Mute the microphone Change the voice volume for receiver / handsfree function

Press and hold Press briefly

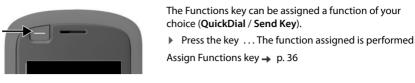

i

The assignment of directories to the key p (press briefly or for longer) can be changed on the OpenScape Cordless IP V2.

#### Volume keys

Set volume for receiver/headset, ringtone, handsfree mode and indicating appointments: > Press the volume keys +/- on the right side of the handset

#### **Functions key**

#### **Display keys**

The display keys perform a range of functions depending on the operating situation.

Back	Save	—— Current display key functions
		—— Display keys

Press the Display key ... The function assigned is performed

Display key icons - p. 44

The display keys have a function preset by default in idle status.

Changing the assignment: -> p. 39

# **LED** Torch

i

Use the phone as a torch. The spot LED is located on the top of the handset.

#### Activating the torch function

Press the display key LED torch.

or

■ ► ... use 🔁 to select 💽 Additional Features ► OK ► 💽 LED Torch ► OK 

#### Deactivating the torch function

Press the display key OFF

or: after 2 minutes the function is automatically deactivated.

#### Menu guidance

The functions of your telephone are displayed in a menu that consists of several levels.

Menu overview -> p. 45

#### Select/confirm functions

Confirm selection using One menu level back using Change to idle display using Switch function on/off using Activate/deactivate option using

OK or press the centre of the control key Back Press and hold on 🗹 / off 🔳 Change

#### Main menu

In idle status: > Press the centre of the control key > ... use the control key 💽 to select a submenu 🕨 OK

Select activated 🔘 / not activated 🔘

#### Submenus

The functions in the submenus are displayed as lists. To access a function: 
... use the control key to select a function ОК

Return to the previous menu level:

▶ Press the display key Back

or

Briefly press the End call key 🕝 

#### **Returning to idle status**

Press and hold the End call key

If no key is pressed, the display will automatically change to idle status after around 2 minutes.

#### **Entering text**

#### Input position

i

- Use to select an entry field. A field is activated when the cursor is blinking inside it..
- Use to move the position of the cursor.

#### **Correcting incorrect entries**

- Delete characters to the left of the cursor: **C** Press briefly •
- Delete words to the left of the cursor: **C** Press and **hold** ٠

#### **Entering letters/characters**

Multiple letters and numbers are assigned to each key between 2 and 9 and the 0 & key. As soon as a key is pressed, the possible characters are displayed at the bottom of the display. The selected character is highlighted.

- Selecting letters/digits: Press the key briefly several times in succession
- Switch between lower case, upper case and number entry mode: > Press the hash = key • When editing a directory entry, the first letter and each letter following a space is automatically in upper case.
- Entering special characters: 
  Press the star key 💌 
  ... use 💽 to navigate to the desired character > Insert

The availability of special characters depends on the language setting.

# Making calls

The base stations of the OpenScape Cordless IP V2 together form the DECT wireless network of the phone system. You can initiate or answer calls on a handset across the whole wireless network and change base station during a call (handover).

The handset is located in the wireless cell of at least one of the base stations registered with the phone system.

The handset is assigned a send and receive connection.

## Making calls

- ... Use To enter the number > Press briefly the Talk key
- or

Press and hold the Talk key ... Use to enter the number

The connection is established over the SIP link assigned to the handset.

Cancel dialling: ▶ 🕝 Press the End call key

If the display backlight is deactivated, you can reactivate it by pressing any key. Digit keys that are pressed appear in the display for pre-dialling, other keys have no further function.

#### **Dialling from the redial list**

The redial list contains the 20 numbers last dialled with the handset.

▶ 7 Briefly press the Talk key ... The redial list is opened ▶ 3 Select the entry ▶ Press the Talk key 🕜

If a name is displayed:

View...The number is displayed > Use as required red to scroll through the numbers > At the phone number required, press the Talk key 7

#### Managing entries in the redial list

Briefly press the Talk key ... The redial list is opened > Select an entry > Options ... Possible options:

Copy entry to directory:

Copy to Directory OK

- Copy the number to the display:
  - ▶ Display number ▶ OK ▶ ... Use as required <C to change or add . . . Use 🕶 to save in the directory as a new entry

Delete the selected entry:

- Delete entry > OK
- Delete List 🕨 OK
- Delete all entries: Set automatic redial: 🕨 🚰 Automatic Redial 🕨 OK ... The selected number is automatically dialled at fixed intervals (at least every 20 seconds). The handsfree key flashes, "open listening" is activated. The participant answers: F Press the Talk key... The function is ended The subscriber does not answer: The call is interrupted after around 30 secs. The function is terminated after pressing any key or after ten unsuccessful attempts.

#### **Dialling from a call list**

The call lists ( $\rightarrow$  p. 20) contain the most recent accepted, outgoing and missed calls.

📕 🕨 . . . Use 💽 to select 🌈 Call Lists 🕨 OK 🕨 . . . Use 😭 to select the list 🕨 OK 🕨 . . . Use 😭 to select an entry 🕨 🌈 Press the Talk key

The call lists can be displayed directly by pressing the display key Calls if the relevant function has been assigned to the display key.

The Missed calls list can also be opened by pressing the Message key

#### **Dialling in extension systems (Delayed Extension Dialling)**

When dialling into a large corporate network (PBX systems), it might be possible to dial an extension number directly after dialling the dial-up number.

The phone number can be saved in the directory as follows: Dial-in number, 2 stars, extension number (e.g. 1234567\*\*128).

#### Enter a dial pause when dialling

▶ Press and hold the hash key **#** ... A **P** is shown on the display

#### Initiating ringback

If the line of a called subscriber is busy, you can arrange for a ringback (if the phone system or provider supports the CCBS and CCNR services).

- CCBS (Completion of Call to busy subscriber) Ringback when busy
- CCNR (Completion of Calls on No Reply) Ringback when call is not answered

The service code for enabling/disabling CCBS and CCNR must be configured in the provider settings.

Enabling ringback:

▶ Enter the service code specified for the phone system / provider, e.g. ★ 6

If you do not want a ringback, you can disable the function.

Enter the service code specified for the phone system / provider, e.g. # -> 6

#### Incoming calls

An incoming call for the connection assigned to your handset is indicated by ringing, by a display on the screen and by the flashing Talk / Handsfree key **C**.

The signal light (LED) at the top of the handset also flashes (if enabled).

Accept the call:		Press the Talk key 🜈 or 🕨 Accept
If Auto Answer is enabled	d:	
	▶	Remove the handset from the charging cradle
Disable ringtone:	►	Silence You can accept the call as long as it is displayed on the screen
Reject the call:	►	Press the End call key 💿

#### Information about the caller

If it is sent, the number of the caller is displayed. If the caller's number is saved in a directory, the name is displayed.

#### Using the Call Manager of the phone system

If a Call Manager is used on the phone system, it is possible to define that incoming calls are accepted directly by headset or handsfree function. This must be configured for the handset on the OpenScape Cordless IP V2.

#### Group accept

Accept incoming calls for a group of subscribers.

Group accept must be enabled, and the phone number or SIP URI of the group must be entered. This must be configured for the handset on the OpenScape Cordless IP V2.

#### Accepting/rejecting a waiting call during a call

During an external call, the call waiting tone signals that another party is trying to call you. The number or name of the caller is displayed if the phone number is sent.

Reject the call: Accept the call:

- Options Transformation Reject waiting call OK
- Accept Speak to the new caller. The first call is placed on hold.

End the call, resume the call on hold:

Press the End call key

#### Calls with three parties

#### **Consultation calls**

During an external phone call, hold another external call. The first call is placed on hold.

▶ Ext. Call ▶ ... Use to enter the number of the second party ... The active call is put on hold and the second party is called.

If the second party does not answer: > End

#### Ending a consultation call

▶ Options ▶ The connection to the first caller is reactivated.

or

Press the End call key ... The first party is called again.

#### **Call swapping**

Switching between two calls (call swapping). The other call is placed on hold.

- During an external call, dial the number of a second party (consultation call) or accept a waiting caller ... The display shows the numbers/names of both parties.
- The control key enables you to switch between the parties.

#### Ending a currently active call

▶ Options ▶ The connection to the other caller is reactivated.

#### or

Press the End call key \_\_\_\_\_... The first party is called again.

#### **Conference call**

You can speak to two people simultaneously.

During an external call, dial the number of a second party (consultation call) or accept a waiting caller ...Then:

Start the conference call:

• Conf. ... All the callers can hear each other and hold a call with each other.

Switching back to call swapping:

Find Conf.... You are reconnected to the party with whom the conference call was initiated.

End call with both participants:

Press the End call key

Each party can end their participation in the conference call by pressing the End call key 🕤 or hanging up.

#### Transferring a call to another party

Transfer a call to another party (connect).

▶ Use the Display key Ext. Call to start an external consultation call ▶ ... Use the to enter the number of the second party ... The active call is put on hold ... The second party is called ▶ Press the End call key (during the call or before the second party has answered) ... The call is forwarded to the second party.

The options for transferring calls must be set up correctly for the phone system.

#### **During a conversation**

#### Handsfree mode

Activating/deactivating handsfree mode during a call and when establishing a connection:

Press the handsfree key

Placing the handset in the charging cradle during a call:

Press and hold down the handsfree key 
 ... Place the handset in the charging cradle
 ... hold 
 for a further 2 seconds

#### Call volume

Applies for the mode currently being used (handsfree, receiver or headset):

Press Press > ... use to set the volume Save

The setting is automatically saved after around 3 seconds, even if Save is not pressed.

#### Muting the microphone

When the microphone is switched off, callers will no longer hear you.

Switch the microphone on/off during a call: Press

or: **Briefly** press the Profile key )

#### Adjust the microphone sensitivity

Adjust the microphone sensitivity for the receiver or wired headset.

► ... Use to select Settings ► OK ► Audio Settings ► OK ► Mic Sensitivity ► OK ► Use to select Earpiece / Corded headset ► Use to set the sensitivity ► Save

Set the acoustic profile to loud surroundings:

Press and hold the ) button Use to set the sensitivity Save

#### **Network services**

Network services are dependent on the phone system and network provider.

To activate/deactivate the features, a code is sent to the telephone network.

#### Deactivating Calling Line Identification for the next call

By default for an outgoing call, the phone number is sent and can be shown with the caller on the display (CLIP = CLI Presentation). When the caller's number is withheld, it is not shown on the called party's display. The call is made anonymously.

► ... Use to select Select Services ► OK ► Next Call Anonym. ► OK ► ... Use to enter the number ► Dial ... The connection is established without CLI

#### Call divert

When call divert is enabled, incoming calls are forwarded to another connection.

► Use to select Services ► OK ► Call Divert ► OK ► Select when call divert is to apply ► OK

All Calls:	Calls are forwarded immediately.			
No Answer:	Calls are diverted if no one accepts the call within several rings.			
When Busy:	Calls are diverted if the line is busy.			
Enable/disable:	Status: Use  to select On or Off			
Enter the number for call divert:				
	To Phone Number Use to enter the number			
Enable:	> Send			

#### **Call waiting**

During a call, a call waiting tone indicates another caller. If the number is being transferred, you you see the number or the name of the caller on the display.

Reject waiting caller:	<b>Reject</b> The waiting caller hears the busy tone
Accepting a call:	Accept

Once you have accepted the waiting call, you can switch between the two parties (**Call Swap**) or speak to them both at the same time (**Conference**).

#### Prevent/permit call waiting

🔲 🕨 Use 😭 to	o sel	ect 🛐 Select Services 🕨 OK 🕨 😭 Call Waiting 🕨 OK
Enable/disable:	►	Status: Use 🕞 to select On or Off
Enable:	►	Send

#### Do not put through call

When you do not want to be disturbed, you can arrange for no more calls to be put through.

►	🔲 🕨 Use 😭 to	sel	ect 🛐 Select Services 🕨 OK 🕨 😭 Do Not Disturb 🕨 OK
	Enable/disable:	►	Status: Use 🕞 to select On or Off
	Enable:		Send

#### **Cancelling ringback**

i

After you have initiated a ringback, you can cancel it before the other party calls back.

- ► ... Use to select Services ► OK ► TRingback Off ► OK ... You receive a confirmation from the phone network ► Press the End call key
  - You can only activate one ringback at a time. Activating a ringback will automatically cancel any ringback that is already active.

If the ringback is indicated before you are able to cancel it: Press the End call key

# Call lists

The telephone saves different types of calls (missed, accepted and outgoing calls) in lists.

To display the numbers of missed and received calls in the call lists, the relevant option must be enabled on the OpenScape Cordless IP V2.

#### List entry

The following information is displayed in the list entries::

- The list type (in the header)
- Icon for the type of entry:

Accepted calls,

- C Outgoing calls (redial list)
- Caller's number. If the number is stored in the directory, the name and number type ( Phone (Home), Phone (Office), Phone (Mobile)) are shown instead. In the event of missed calls, the number of missed calls from this number is also shown in square brackets.
- · Connection by which the call was received/made
- Date and time of call (if set)

#### Opening the call list

Via the display key:	Calls F Select the list F OF
----------------------	------------------------------

Via the menu:

list 🕨 OK

Via the Message key (missed calls):

Dr.

Press the Message key Key Missed Calls: OK

#### Calling back a caller from the call list

► ... use to select Call Lists ► OK ► select list ► OK ► select entry ► Press the Talk key

# **Message lists**

Notifications about missed calls, messages on the network mailbox and missed alarms are saved in the messages list and can be shown on the handset display.

Which messages are shown on the handset are defined in the configuration of the handset on the Open-Scape Cordless IP V2.

**Counter for missed calls:** When the option is enabled, the number of missed calls in idle mode is shown on the handset display.

**Message Waiting Indicator (MWI):** For every message type (missed call, missed alarm, new message on the network mailbox), the MWI can be disabled/enabled on the OpenScape Cordless IP V2. If the option is enabled, the LED on the Message key (), flashes when a new notification arrives for a message type enabled.

Icons for message types and the number of new messages are shown on the Example idle display.

Notification for the following message types is available:

- مە on the network mailbox
- in the missed calls list

in the missed alarms list

The icon for the network mailbox is always displayed, provided the number is stored in the telephone. The other lists are only displayed if they contain messages.

#### Display messages:

Ť

Press the Message key 2 ... Messages lists that contain messages are displayed, Mailbox: is always displayed

An entry is marked in **bold**: new messages are available. The number of new messages is shown in brackets.

An entry is **not** marked in bold: no new messages. The number of old messages is shown in brackets.

Select a list > OK ... the calls or messages are listed Network mailbox: The network mailbox number is dialled.

#### Directories

The following directories are available:

- The (local) directory on the handset
- Company directories provided over a server

The local directory is always available. Which other directories are available is defined by OpenScape Cordless IP V2.

#### **Open directories**

#### Open directories with the Directory key

Press the Directory key ( bottom of control key)

The relation the second second

- Press briefly to open the selection of available online directories.
- Press and hold to open the local directory,

This assignment can be changed for every handset from the OpenScape Cordless IP V2. Direct access (press briefly) can be assigned to a specific online directory. In this case, open the local directory by pressing and holding the Directory key.

#### Opening directories via the menu

Local directory:

▶ 🔲 ▶ .... Use 💽 to select 💟 Directory ▶ OK

List of all online directories set up on the phone system

The directories are shown with the names specified on the OpenScape Cordless IP V2.

#### Opening the company directory using the INT key

A company directory is available if it has been set up on the OpenScape Cordless IP V2 and when the phone system has access to this directory. The directory to open with the INT key can be set separately for every handset.

Press the INT key (left of control key)

#### Local handset directory

The local directory is unique to the handset.

#### **Directory entries**

Number of entries:	Maximum 200
Information:	First and last names, up to three phone numbers, anniversary with signalling, VIP ringtone with VIP icon
Length of the entries:	Numbers: max. 32 digits First and last names: max. 16 characters

#### Creating an entry

► C < New Entry> ► OK ► ... use to switch between the entry fields

Name:

- ... use to enter the first and/or last name
- Numbers:
- ► Tel.1 Type ► ... use to select a number type (Home, Office or Mobile) ► The to enter a number

Enter more numbers: **b** use **to toggle between the entry fields Tel.1 - Type/Tel.2 - Type/Tel.3 - Type b** ... use **to enter a number Anniversary**:

... use to activate/deactivate Anniversary ... use to enter date and time ... use to select type of alert (Visual only or a ringtone)

#### Caller Melody (VIP):

... use select the ringtone that will indicate a call from the participant ... if a Caller Melody (VIP) has been assigned, the entry will appear in the directory with the VIP icon.

#### **Caller Picture**

... use to select a picture that is to be displayed during a call from the participant (-> Resource Directory).

Save entry: > Save

) The entry is only valid if it contains at least one number.

i

For **Caller Melody (VIP)** and **Caller Picture:** the telephone number of the caller must be supplied.

Delete all entries:

#### Setting the order of the directory entries

Directory entries can be sorted by first name or surname.

Options ) Sort by Surname / Sort by First Name

If no name was entered, the default telephone number is shown in the surname field. These entries appear at the beginning of the list, regardless of how the entries are sorted.

The sort order is as follows:

Space | Digits (0-9) | Letters (alphabetically) | Other characters.

•	
New Entry	
First Name :	
Robert	
Surname :	
Tel.1 - Type:	
~	Abc
<c< td=""><td>Save</td></c<>	Save

#### Displaying the number of entries available in the directory

▶ □ ▶ Options ▶ ○ Available Memory ▶ OK

#### Copying number to the directory

Copy numbers to the directory:

• From a list e.g. the call list or the redial listWhen dialling a number

The number is displayed or highlighted.

Press the display key or Options > Copy to Directory > OK ... possible options: Create a new entry:

► <New Entry> ► OK ► ... use to select number type ► OK ► complete entry ► Save Add number to an existing entry:

► ... use to select an entry ► OK ► ... use to select number type ► OK ... the number is entered or a prompt to overwrite an existing number is displayed ► ... if required, answer the prompt with Yes/No ► Save

#### Copying a vCard using Bluetooth

Copy directory entries in vCard format, e.g. to exchange entries with a mobile phone.

Bluetooth mode is activated The other handset/mobile phone supports Bluetooth.

Image: Select an entry if needed > Options > Image: Copy entry / Copy all > Image: Copy entry / Copy entry / Copy all > Image: Copy entry / Copy entry / Copy all > Image: Copy entry / Copy entry / Copy all > Image: Copy entry / Copy entry / Copy entry / Copy all > Image: Copy entry / Co

#### **Receiving a vCard using Bluetooth**

If a device in the **Known Devices** list sends a vCard to your handset, a directory entry is automatically created and a message is shown in the display.

If the sending device is not in the list: • ... use **Mat** to enter the PIN of the **sending** Bluetooth device • **OK** ... the copied vCard is available as a directory entry

#### Synchronising the phonebook with the PC address book (Gigaset QuickSync)

- The Gigaset QuickSync programme has been installed on the computer.
- The handset is connected via Bluetooth or via a USB data cable to the computer.

#### **Company directory**

If company directories (LDAP) are set up on the OpenScape Cordless IP V2 , they are available on the handset with the following functions:

- Scroll through directory or search directory entries
- · Show directory entries with details (no editing or deleting)
- Select phone numbers directly from the directory
- Transfer directory entries to the local directory

When a phone number is entered or there is an incoming call, a search of the directory is automatically performed for an entry matching the phone number. When an entry is found, the name is displayed instead of the phone number.

#### Show the company directory on the phone display

The company directory is assigned to the INT key: 
Press

Depending on the setting on the OpenScape Cordless IP V2, you can also access a company directory from the directory key .

#### Directory entries

The following description is an example company directory display on a handset.

The menu shows all the directories that have been set up on the OpenScape Cordless IP V2 and activated with the name assigned in each case. In the example on the right, the directory is displayed as **Our directory**.

Select the directory Select the directory

The phone performs a query on the LDAP server.

The directory is shown in accordance with the following rules:

- The search starts in the (sub)directory defined as the search basis on the LDAP server.
- The entries are listed in alphabetical order.
- Entries are displayed with **Surname** and **First name** when both attributes are available in the LDAP database. Otherwise only the last name or first name is displayed.

Search directory

- Use to scroll through the directory
- or
- Enter a name (or its starting letters)

As soon as you press a key on the keypad, the phone switches to search mode. You can enter up to 15 characters. All directory entries matching your entry are displayed.

#### Delete recent characters C

The current search term is shown in the topmost line.

#### **Displaying a directory entry**

- Select the required entry
- Press View or
- or

#### Options View

The directory entry is shown with detailed information.

Scroll through entry

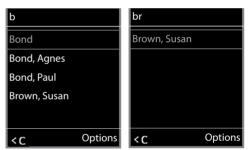

Close entry: > Back or press the End call key 👩

#### Select a number from the directory

- Select the required entry
- Press the Talk key ... If only one phone number is stored, it is dialled. If there are two or more numbers, they are shown in a selection list.

or

- Select the required phone number from the detailed view of the entry: Phone (home), Phone (office) or Phone (home)
- Press the Talk key ... The number is dialled

# Answering machine

The answering machine takes incoming calls for the handset.

#### Requirements

The following settings are required so that you can receive and listen to voice messages: On the phone system

A network mailbox is set up for the connection assigned to the handset.

On the OpenScape Cordless IP V2

In the phone system configuration, the system for receiving notifications is registered for new messages on the network mailbox.

On the handset

> In the handset configuration, the phone number is entered and the network mailbox is enabled.

If necessary, contact the administrator of the DECT network.

#### Enter/change numbers from the handset

Use to select Answer Machine OK Select Network Mailbox OK F The Enter or change the number of the network mailbox Save

#### Play messages on the handset

▶ Press and hold the 1 - button

or

- Press the Messages key > OK
- or

Listen to announcement over speaker: Press the Speaker

# **Additional functions**

# Sound profiles

The telephone has sound profiles for adapting the handset to the environmental conditions: **Profile Loud**, **Profile Silent**, **Profile Personal**.

- Press the Profile key )... The profile currently set is shown
- Switch between profiles using key )

or

- ▶ Use to select a profile ▶ OK Set the microphone sensitivity to loud surroundings:
- Press and hold the profile key )

The profiles are set as follows by default:

Default setting		Profile Loud	Profile Silent	Profile Personal
Silent alert		On	Same as Profile Personal	Off
Ringtone		On	Off	On
Ringtone volume	Internal	5	Off	5
	External	5	Off	5
Handset volume	Receiver	5	3	3
	Handsfree	5	3	3
LED light for a call		Yes	No	No
Advisory tones	Key click	Yes	No	Yes
	Battery tone	Yes	Yes	Yes
	Confirmation tone	Yes	No	Yes

Activate alert tone for an incoming call for **Profile Silent**: After switching to **Profile Silent** press the display key **Beep** . . . the icon appears in the status bar

The set profile remains set when switching the phone off and back on.

- Changes to the settings listed in the table:
  - apply in the Loud and Silent profiles as long as the profile is not changed.
  - are permanently saved in Profile Personal for this profile.

# Calendar

i

You can remind yourself of up to 30 appointments.

In the calendar, the current day is outlined in white; on days with appointments, the numbers are displayed in colour. When a day is selected, it will be outlined in colour.

		Jur	ie 2	021

Back OK						

#### Saving appointments to the calendar

Enter time:

Set name:

Date and time have been set.

- Image: Select Select Select Organizer > OK > Calendar > OK > use Constant to select desired day > OK ... then
   Switch on/off: Activation: use To select On or Off
   Enter date: Date ... the selected day has been pre-set > use To enter new date
  - Time buse I to enter hours and minutes of the appointment
  - Text > use I to enter a description of the appointment (e.g. evening meal, meeting)
  - Set alarm tone: Signal Use Construction by use Construction of the reminder alarm or deactivate the acoustic signal

#### Save appointment: Save

If an appointment has already been entered:  $\blacktriangleright$   $\checkmark$  **New Entry**  $\rightarrow$  **OK**  $\blacktriangleright$  then enter information for the appointment.

#### Notification of appointments/anniversaries

Anniversaries are transferred from the directory and displayed as an appointment. An appointment/ anniversary is displayed in idle status and the selected ringtone plays for 60 seconds as a notification. Acknowledge and stop the reminder: Press the display key **OFF** 

 $(\mathbf{i}$ 

i

During a call, a reminder is indicated on the handset **once** with an advisory tone on the handset.

#### Displaying missed appointments/anniversaries

The following appointments and anniversaries are saved in the Missed Appts list:

- · The appointment/anniversary call was not acknowledged.
- The appointment/anniversary was notified during a phone call.
- The handset was switched off at the time of the appointment/anniversary.

The last 10 entries are stored. The 🔛 icon and the number of new entries are shown in the display. The most recent entry appears at the top of the list.

#### Opening the list

Press the Message key Hissed Appts: OK ... use to browse through the list of any appointments

or

```
Image: Select Select Select Organizer Select Missed Appts OK
```

Each entry is displayed with the number or name, date and time. The most recent entry appears at the top of the list.

Delete an appointment/anniversary:

## Timer

▶

#### Setting the timer (countdown)

in the select Cryanizer OK Timer OK ... then
 in Activation: ... use to select On or Off
 in Duration ... use to enter the hours and minutes for the timer
 Min.: 00:01 (one minute); Max.: 23:59 (23 hours, 59 minutes)

Save the timer: Save

The timer starts the countdown. In the idle display, icon 🔊 and the remaining hours and minutes are displayed until one minute is left. From this point, the remaining seconds are counted down. At the end of the countdown, the alarm is triggered.

#### Disabling/repeating the alarm

Switch off the alarm:

```
Repeat the alarm:
```

Restart ... the timer display is displayed again > set another duration as required > Save ... the countdown is restarted

# Alarm clock

Date and time have been set.

OFF

#### Activating/deactivating the alarm clock and setting the wake-up time

Image: Set to select in Organizer > OK > in Alarm Clock > OK ... then
 Switch on/off: > Activation: ... use in to select On or Off
 Setting the wake-up time:
 Image: Imag

When the alarm clock is activated, the icon 🙆 and the wake-up time are displayed in idle display.

#### Alarm

An alarm is shown on the display and indicated by the selected ringtone melody. The alarm sounds for 60 seconds. If no key is pressed, the alarm is repeated after 5 minutes. After the second repetition, the alarm call is deactivated for 24 hours.

During a call, the alarm is only indicated by a short tone.

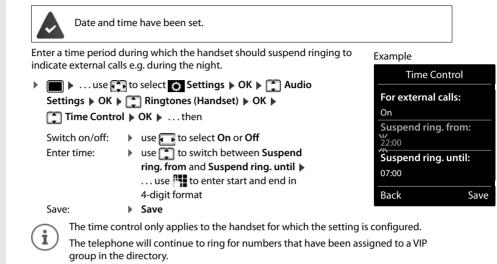

#### Switching off/repeating the alarm after an interval (snooze mode)

#### Deactivate the alarm: > OFF

Repeat the alarm (snooze mode): > Press **Snooze** or any key ... the alarm is switched off and repeated after 5 minutes.

# Protection against unwanted calls

#### Time control for external calls

#### Switch off ringtone when in charging cradle

The handset will not ring when placed in the charging cradle. The call is only indicated on the display.

▶ ... use to select Settings > OK > Audio Settings > OK >
 Ringtones (Handset) > OK > Silent Charging > Change ( = ringtone is switched off when in charging cradle)

# **Resource Directory**

Sounds for ringtones and images that can be used as caller pictures (CLIP pictures) or as a screensaver are saved in the handset's resource directory. A range of monophonic and polyphonic sounds and pictures have been pre-set but further images and sounds can be downloaded using a PC (→ Gigaset QuickSync).

#### Media types:

Туре		Format
Sound	Ringtones Monophonic Polyphonic Imported sounds	Internal Internal Internal WMA, MP3, WAV
Picture	CLIP-picture Screensaver	BMP, JPG, GIF pixels pixels

If insufficient memory is available, you must delete one or more pictures or sounds before others can be saved.

#### Managing images (for screensaver and CLIP) and sounds

Image: Second	sele	ect 🗙 Additional Features 🕨 OK 🕨 🏹 Resource Directory 🕨 OK
View image:	►	Select Screensavers / Caller Pictures > OK > use to select picture > View the selected picture is displayed

The relevant opt	tior	is are not available if a picture/sound cannot be deleted.

#### **Check memory**

Display the available memory for screensavers and CLIP-pictures.

► ... use to select Additional Features ► OK ► The Resource Directory ► OK ► The Capacity ► OK ... the percentage of available memory is displayed

# Bluetooth

The handset is able to use Bluetooth<sup>™</sup> to communicate wirelessly with other devices that also use this technology, e.g. to connect a Bluetooth headset or hearing aid.

Bluetooth is activated and the devices have been registered to the handset.

The following devices can be connected:

• A Bluetooth headset or hearing aid

The headset / hearing aid has the **Headset** or **Handsfree profile**. If both profiles are available, the handsfree profile is used to communicate.

It may take 5 seconds to establish a connection to the headset, whether a call is accepted using the headset or transferred to the headset, or a call is made from the headset.

• Up to 5 data devices (PCs, tablets or mobile phones) for the transmission of address book entries as a vCard or for the exchange of data with the computer.

In order for telephone numbers to be used further, the area code (international and local area code) must be saved to the telephone.

Operating Bluetooth devices -> device user guides

#### Activating/deactivating Bluetooth mode

► ... use to select Bluetooth ► OK ► Activation ► Change ( = activated)

If the local area code is still not saved: 🕨 . . . use 👫 to enter local area code 🕨 OK

When in idle status, the activated Bluetooth mode is indicated on the handset by the 🖇 icon.

#### **Registering Bluetooth devices**

The distance between the handset in Bluetooth mode and the active Bluetooth device (headset or data device) should not exceed 10 m.

The registration of a headset overwrites a previously registered headset.

If a headset is to be registered that is already registered with a different device, this connection must be deactivated before registering.

- Image: Search for Headset / Search Devices > OK ... the search starts (may take up to 30 seconds) ... the names of found devices are displayed ... possible options:
  - Register device: ► Options ► Trust Device ► OK ► ... use I to enter the PIN of the Bluetooth device to be registered ► OK ... the device is added to the list of known devices

Showing information:

	use 😭 to select a device, if applicable 🕨 View the device
	name and device address are displayed
Repeat search:	Options  Repeat Search  OK
Cancel search:	Cancel

#### Editing the list of known (trusted) devices

#### Open the list

i

► In select Bluetooth ► OK ► The Known Devices ► OK ... the known devices are listed, an icon indicates the type of device

Bluetooth headset

Bluetooth data device

If a device is connected, the relevant icon is shown in the display header instead of 💰.

#### Edit an entry

 ... use 
 to enter the PIN of the Bluetooth device to be accepted > OK > ... Wait for PIN confirmation ... then
 Add the device to the list of known devices: > Yes

use the device temporarily: **>** No . . . the Bluetooth connection can be used, as long as the device is located within transmission range or until it is switched off

#### Changing the Bluetooth name of the handset

The handset is shown by this name on another Bluetooth device.

▶ ... use to select Bluetooth ▶ OK ▶ Own Device ▶ OK ... the name and the device address are shown ▶ Change ▶ ... use to change the name ▶ Save

# Additional functions using the PC interface

The Gigaset QuickSync program has been installed on the computer.

QuickSync functions:

- Sync the handset's directory with Microsoft® Outlook®
- Upload CLIP-pictures (.bmp) from the computer to the handset
- Upload pictures (.bmp) as screensavers from the computer to the handset
- Upload sounds (ringtone melodies) from the computer to the handset
- Update firmware
- Cloud synchronisation with Google™

> Connecting the handset to the computer via Bluetooth or via a USB data cable.

Connect the handset **directly** to the PC and **not** via a USB hub.

#### **Transferring data**

- Data transfer using Bluetooth:
  - The computer has Bluetooth capability.

A USB data cable is not plugged in. If a USB data cable is plugged in during an existing Bluetooth connection, the Bluetooth connection is interrupted.

Launch the Gigaset QuickSync program on the computer.

The message **Data transfer in progress** is shown on the display during data transfer between the handset and PC. During this time, it is not possible to enter any data using the keypad and incoming calls are ignored.

#### Carrying out a firmware update

- Connect the telephone and the PC using a USB data cable ► Launch Gigaset QuickSync ► Establish connection to the handset
- Start firmware update in Gigaset QuickSync... Information about this can be found in Gigaset Quick-Sync help feature

The update process may take up to 10 minutes (not including download time).

i

Do not interrupt the process and do not remove the USB data cable.

The data are first downloaded from the online update server. The time required for this depends on Internet connection speed.

The display on your telephone is switched off, the Message key 💌 and the Talk key 🌈 flash.

Once the update is complete, your telephone will automatically restart.

#### Procedure in the event of an error

If the update procedure fails or the telephone no longer functions properly after the update, repeat the update procedure:

- ► End the Gigaset QuickSync program on the PC ► Remove the USB data cable from the telephone ► Remove the battery ► Re-insert the battery
- Carry out the firmware update again as described above

If the update procedure fails more than once or it is no longer possible to connect to the PC, carry out the **Emergency Update**:

- End the Gigaset QuickSync program on the PC > Remove the USB data cable from the telephone > Remove the battery
- Press and hold keys 4 and 6 at the same time with the forefinger and middle finger 
  Replace the battery
- Release keys 4 and 6 ... the Message key and the Talk key will flash alternately

Carry out the firmware update as described above

Always save pictures and sounds uploaded onto the handset on the PC, as they are deleted during an **Emergency Update**.

# Adjusting the telephone settings

# Handset

#### Changing the language

- ► Image ► OK ► Image ► Select (○ = selected)
- If the handset has been set to an incomprehensible language:
- ▶ Press the keys 9 5 slowly one after the other ▶ ... use 1 to select the correct language ▶ press the right display key

#### Select country (if available)

Select the country where you are using the phone. Your selection is used for country-specific defaults, such as the international country code.

► ... Use to select Settings ► OK ► Telephony ► OK ► Country ► OK ► ... Use to select the country ► Select ( = selected)

#### **Display and keypad**

#### Screensaver

A digital or analogue clock, Info Services and a range of pictures can be selected to be displayed as a screensaver when in idle status.

► In use to select Settings ► OK ► TO Display & Keypad ► OK ► TO Screensaver ► Edit ( = on) ... then

Switch on/off:	►	Activation: use 🕞 to select On or Off
Select screensaver:	►	Selection use select a screensaver (Digital
		Clock / Analog Clock / <pictures> / Slideshow)</pictures>
View screensaver:	►	View
Save selection:	►	Save
The screensaver is activated approx. 10 seconds after the display has changed to idle status.		

All pictures from the **Screensaver** folder of the **Resource Directory** are available for selection.

#### End screensaver

Press the End call key briefly ... the display changes to idle status

#### Large font

Show text and icons in call lists and in the directory in a larger size in order to improve legibility. Only one entry is shown in the display and names are abbreviated if necessary.

► In the select Settings ► OK ► Display & Keypad ► OK ► Large Font ► Change ( = on)

#### Colour scheme

You can choose from a range of colour combinations for the display.

► ... use to select Settings ► OK ► Display & Keypad ► OK ► Colour Schemes ► OK ► ... use to select the desired colour scheme ► Select (O = selected)

#### **Display backlight**

The display backlight always illuminates when the handset is taken out of the base station/charging cradle or when a key is pressed. Any **digit keys** that are pressed appear on the display for pre-dialling. Switch the display backlight on/off when in idle status:

► Use to select Settings ► OK ► Display & Keypad ► OK ► Display
 Backlight ► OK ► Use to select when the setting is applied (In Charger / Out of Charger / In Talk
 State) ► Select in each case with On or Off ► Save

The handset's standby time may be significantly reduced if the display backlight is switched on.

#### **Keypad illumination**

The keypad has 5 levels of brightness to choose from.

► ... use to select Settings ► OK ► Display & Keypad ► OK ► Key Illumination ► OK ► ... use to select Brightness (1 - 5) ► Save

#### Activating/deactivating automatic keypad lock

Automatically lock the keypad when the handset has been in idle status for around 15 seconds.

► In use to select Settings ► OK ► Display & Keypad ► OK ► Auto Keypadlock ► Change ( = on)

#### Assigning the Functions key

Assign one of the following functions to the Functions key in the top left of the handset.

QuickDialThe phone number assigned to the key is dialled.Send KeyA phone number previously entered from the<br/>keypad (or selected in a call list or the directory)<br/>is dialled.

Save settings: Save

### Auto answer

When Auto answer is enabled, the handset accepts an incoming call as soon as it is removed from the charging cradle.

Image: Settings Settings OK Telephone OK Auto Answer Change ( = activated)

Regardless of the Auto Answer setting, the connection ends as soon as you place the handset back in the charging cradle. Exception: Press and hold the handsfree key 🔳 for a further 2 seconds while placing the handset in the charging cradle.

# Activating/deactivating visual call signal

Visual indication of incoming calls via the spot LED (e.g. in noisy environments).

■ ▶ ... use 💽 to select 👩 Settings ▶ OK ▶ 😭 Telephony ▶ OK ▶ 😭 LED Call Signal ▶ ► Change ( $\mathbf{v} = on$ )

Changes are only saved permanently in Profile Personal.

### Fast access to numbers and functions

#### Assigning a number to digit keys (quick dial)

It is possible to assign a number from the directory to the keys 0 B and 2 to 9.

A number has not been assigned to the digit key.

Press and hold the digit key

or

▶ Briefly press the digit key ▶ Press the display key QuickDial

The directory opens.

► ... use to select an entry ► OK ► ... use to select a number if necessary ► OK ... the entry is saved to the digit key

If the entry in the directory is deleted later, this will not affect the assignment of the digit key.

#### **Dialling a number**

> Press and hold the digit key ... the number is dialled immediately

or

Briefly press the digit key ... the number/name (possibly in abbreviated form) is shown on the left display key ... the number is dialled

#### Changing the digit key assignment

- ▶ Briefly press the digit key ▶ Change ... the directory is opened ... possible options: Change the assignment:
  - ... use () to select an entry ▶ OK ▶ ... select a number if required ▶ OK

Delete the assignment:

Clear Key

### Assigning display keys / Changing assignments

The left and right display keys have a **function** preset by default when in idle mode. The key can be reassigned.

Press and hold the left or right display key in idle status ... the list of possible key assignments is opened
 ... Use to select the function > OK ... The assignment of the display key is changed

Possible functions: Alarm Clock, Redial, Handset Directory . . . More functions are available in More Functions...

#### Starting a function

With the telephone in idle status: > Briefly press ... the assigned function is executed

### Changing the handset PIN

The handset is protected against unauthorised use by a PIN. The handset PIN must be entered e.g. when switching off the keypad lock.

Change the handset's 4-digit PIN (default setting: 0000):

► ... use to select Settings ► OK ► System ► OK ► Handset PIN ► OK ► ... use to enter the current PIN ► OK ► ... use to enter the new handset PIN ► OK

### Resetting a handset

Ĭ

Reset any individual settings and changes that you have made.

- ► ... use The handset's settings ► OK ► System ► OK ► Handset Reset ► OK ► Yes ... the handset's settings are reset
  - The following settings are **not** affected by a reset
  - Registration of the handset to the base station
    - Date and time
  - · Directory entries and call lists

### Resetting the handset to the default settings

Reset all settings and personal information.

► ... Use to select Settings ► OK ► System ► OK ► Erase Handset ► OK ► Use It to enter the current PIN ► OK

All user information, lists, the directory and the handset registration with the base are erased. The Registration wizard is started.

# Handset update

The handset supports firmware updating via the DECT radio link to the base/router (SUOTA = Software Update Over The Air).

The phone checks whether new firmware is available for the handset. If it is, a message is displayed. Start the firmware update with **Yes**.

#### \_\_\_\_\_

Update ▶ OK ▶ 💭 Update ▶ OK ▶ OK . . . if there is new firmware, the update will start

The update process may take up to 30 minutes. During this time, only restricted handset use is available.

#### Checking the firmware version

► ... use to select Settings ► OK ► System ► OK ► Handset Update ► OK ► Current Version ► OK ... the firmware version of the handset is displayed

# Appendix

# Manufacturer's advice

### Care

Wipe the device with a **damp** cloth or an antistatic cloth. Do not use solvents or microfibre cloths. **Never** use a dry cloth; this can cause static.

In rare cases, contact with chemical substances can cause changes to the device's exterior. Due to the wide variety of chemical products available on the market, it was not possible to test all substances.

Impairments in high-gloss finishes can be carefully removed using display polishes for mobile phones.

# Contact with liquid

If the device comes into contact with liquid:

- 1 Disconnect the power supply.
- 2 Remove the batteries and leave the battery compartment open.
- 3 Allow the liquid to drain from the device.
- 4 Pat all parts dry.
- 5 Place the device in a dry, warm place for at least 72 hours (not in a microwave, oven etc.) with the battery compartment open and the keypad facing down (if applicable).
- 6 Do not switch on the device again until it is completely dry.

When it has fully dried out, you will normally be able to use it again.

# **Technical data**

### Battery

Technology:	2 x AAA NiMH
Voltage:	1.2 V
Capacity:	750 mAh

### Handset operating times/charging times

The operating time of your handset depends on the capacity and age of the battery and the way they are used. (All times are maximum possible times.)

Standby time (hours)	320
Talktime (hours)	13
Operating time with 1.5 hours of calls per day (hours)	100
Charging time in charging cradle (hours)	8.5

# Power consumption of the handset in the charging cradle

When charging:	approx. 1.50 W
To maintain the charge status:	approx. 0.50 W

### **General specifications**

DECT standard	Supported
GAP standard	Supported
No. of channels	60 duplex channels
Radio frequency range	1880-1900 MHz
Duplex mode	Time division multiplexing, 10 ms frame length
Repetition frequency of the transmission pulse	100 Hz
Duration of the transmission pulse	370 µs
Channel grid	1728 kHz
Bit rate	1152 kbit/s
Modulation	GFSK
Language code	32 kbit/s
Transmission power	10 mW average power per channel, 250 mW pulse power
Range	Up to 50 m indoors, up to 300 m outdoors
Base station power supply	230 V ~/50 Hz
Environmental conditions for operation	+5 °C to +45 °C; 20% to 75% relative humidity
Dialling mode	DTMF (tone dialling)/PD (pulse dialling)
Bluetooth	
Radio frequency range	2402-2480 MHz
Transmission power	4 mW pulse power
