Important Notes 3

Important Notes

Symbol

The device conforms to the EU Directive as attested by the CE marking. The CE Declaration of Conformity and, where applicable, other existing declarations of conformity as well as further information on regulations that restrict the usage of substances in products or affect the declaration of substances used in products can be found in the Unify Expert WIKI at http://wiki.unify.com/ under the "Declarations of Conformity" section.

The adjacent symbol indicates that any electrical and electronic products installed and sold in countries of the European Union to which the WEEE2 Directive 2012/19/EU applies should be disposed of separately from the municipal waste stream in appropriate collection systems.

Information concerning the proper disposal of your Unify product in the business-tobusiness market segment is available from your local sales representative in Unify or partner sales. 4 Important Notes

Software update

During a software update, the phone must not be disconnected from the power supply unit and/or the LAN. An update action is indicated by messages on the display and/or by flashing LEDs.

Care and cleaning instructions

- Never spray the phone with liquids as the penetrating fluids can lead to malfunctions or may damage the device.
- Do not use substances such as alcohol, chemicals, solvents or scouring agents, as these substances can lead to surface damage.

Clean the phone with a soft and slightly damp cloth.

Online resources

This document along with additional information is available online at: http://www.unify.com/
→ Support.

Technical notes, current information about firmware updates, frequently asked questions, and lots more can be found on the Internet at: http://wiki.unify.com/.

License information

More information about the EULA and Open Source licenses you can find on the Web interface, section "Licenses" → page 195.

Installation location information

- The telephone may only be operated using the LAN cabling internally in the building. The device should be connected to the IP infrastructure using a shielded LAN cable: Cat-5 for 100 Mb/s or Cat-6 for 1000 Mb/s. Make sure in the building installation that this cable shielding is earthed.
- The telephone is designed for operation in a sheltered environment within a temperature range of 5 °C to 40 °C.
- Putting the telephone in a room with higher levels of dust can result in a reduced service life of the device.
- Do not place the device in direct sunlight or other sources of direct heat. This is liable to damage the electronic components and the casing.
- · Do not install the phone in bath or shower rooms.

General information

About this manual

This document contains general descriptions of the technical options, which may not always be available in individual cases. The required features must therefore be individually defined in the terms of the contract.

If a particular function on your phone is not available to you as described, this may be due to one of the following reasons:

- The function is not configured for you and your telephone. Please contact your system administrator.
- Your communication platform does not feature this function. Please contact your sales partner for information on how to upgrade.

This User Guide is intended to help you familiarize yourself with the OpenScape Desk Phone CP600/CP600E and all of its functions. It contains important information on the safe and proper operation of the OpenScape Desk Phone CP600/CP600E. These instructions should be strictly complied with to avoid operating errors and ensure optimum use of your multifunctional telephone in the network.

This User Guide should be read and followed by every person installing, operating or programming the OpenScape Desk Phone CP600/CP600E.

For your own protection, please read the section dealing with safety in detail. Follow the safety instructions carefully in order to avoid endangering yourself or other persons and to prevent damage to the unit.

These operating instructions are designed to be simple and easy to understand. Providing clear step-by-step instructions for operating the OpenScape Desk Phone CP600/CP600E.

Administrative tasks are dealt with in a separate manual. The Quick Reference Guide contains quick and reliable explanations of frequently used functions.

Icons used in the manual

Tips

Refers to a setting established via the web-interface.

Indicates additional important information in relation to handling.

X Indicates required intervention by the administrator.

Displays for describing operation Selected action

Original illustration on display

Step-by-step illustration in the User Guide

A dark background is not used in the step-by-step illustration in order to ensure legibility in the User Guide.

The information area on the left is shown in a left-aligned field.

Incoming call Andre-Marie Ampere 3336

When an action is selected, it will be shown right-aligned in green. The action is executed by selecting the Softkey.

The selected function can alternatively be confirmed using the ok key on the navigator (→ page 20).

Action not selected

Illustration on display

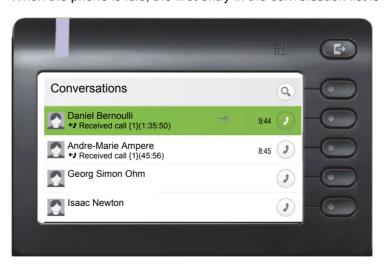

Step-by-step illustration in the User Guide

If an action is not selected, it is shown right-aligned in a light color. The associated Softkey is also shown. The action can be executed by pressing the softkey without the action being selected.

Conversation display

When the phone is idle, the first entry in the conversation list is selected.

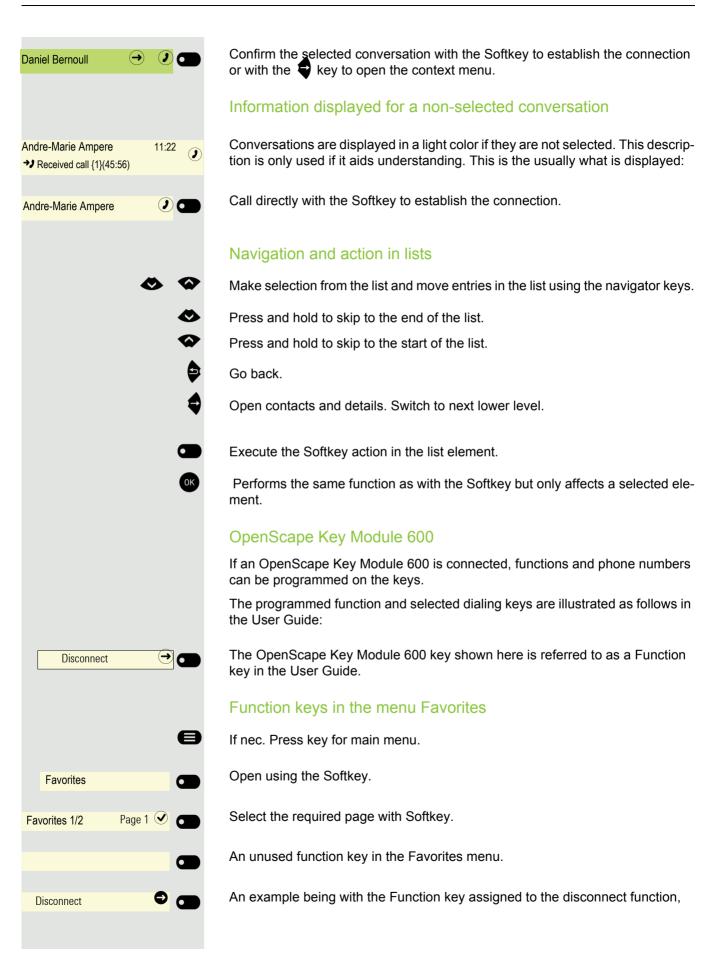

Information displayed for a selected conversation

If a conversation (contact and history at the same time) is selected in the list, it is highlighted in green. This description is only used if it aids understanding. This is the usually what is displayed:

Service

The service department can help you only if you experience problems or defects with the phone itself.

Should you have any questions regarding operation, your specialist retailer or network administrator will be glad to assist you. For queries regarding connection of the telephone, please contact your network provider.

If you experience problems or defects with the phone, please dial the service number for your country.

Intended use

The OpenScape Desk Phone has been developed as a device for voice transmission and connection via a LAN, and should be placed on a desk or mounted on a wall. Any other use is regarded as unintended.

Telephone type information

The identification details (exact product designation and serial number) of your telephone can be found on the underside of the base unit. Specific details concerning your communication platform can be obtained from your administrator. Please have this information ready when you contact the service department regarding faults or problems with the product.

Speakerphone quality and display legibility

- To ensure good speakerphone quality, the area in front of the telephone (front right) should be kept clear.
 - The optimum handsfree distance is approx. 50 cm.
- Proceed as follows to optimize display legibility:
 - Turn the phone and tilt the display so that you have a frontal view of the display while eliminating light reflexes.

Getting to know the OpenScape Desk Phone CP600/CP600E

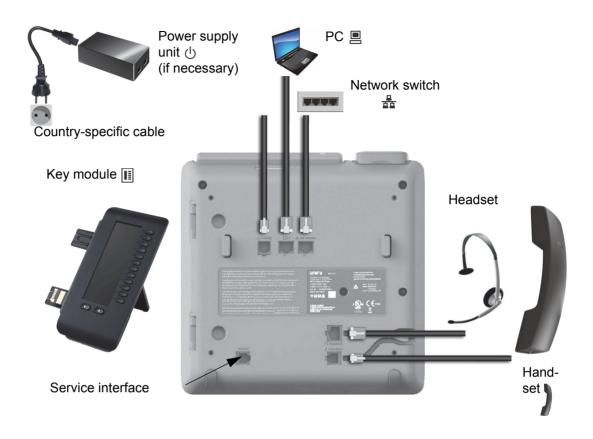

The following sections describe the most frequently used controls and displays.

The User Interface of Your Telephone

1	You can make and receive calls as normal using the handset .
2	The graphic display permits intuitive operation of the phone → page 23.
-	Please note that the screen is greyscale on CP600E.
3	Use the Menu key to open the main menu.
4	Use the Navigator to navigate through the applications on your telephone → page 20.
5	You can use the Softkeys to activate a function or open a menu → page 19.
6	The audio keys are provided to allow you to optimally configure the audio features on your
	telephone → page 19.
7	Incoming calls, new voice messages or missed calls are visually signaled via the Notification
'	LED → page 46.
8	The dialpad can be used to enter phone numbers and write text → page 21.
9	Use the Out-of-Office / Call forwarding key to open a menu, for example in order to set up
9	the variable call forwarding if UC is not used → page 24.
10	NFC transmitter (logo: Ŋ) for simple Bluetooth pairing → page 111
10	Please note that Bluetooth and NFC are available only on CP600.

Ports on the underside of the phone

OpenScape Key Module 600 Optional	✓

Using network ports more efficiently

The OpenScape Desk Phone CP600/CP600E has a Gigabit Ethernet switch. This means that you can also connect a PC with a Gigabit LAN port to the LAN directly via the phone. The option for connecting the telephone and PC must first be activated on the telephone by your administrator.

Using this connection option saves one network port for each switch used and requires shorter network cables.

OpenScape Key Module 600

The OpenScape Key Module 600 is a key module attached to the side of the phone that provides an additional 12 illuminated, programmable Feature keys at two levels.

These keys can be populated and used according to your needs → page 43.

The diagram shows the OpenScape Key Module 600. You can attach up to four OpenScape Key Module 600 to OpenScape Desk Phone CP600 and up to two OpenScape Key Module 600s to OpenScape Desk Phone CP600E.

Keys

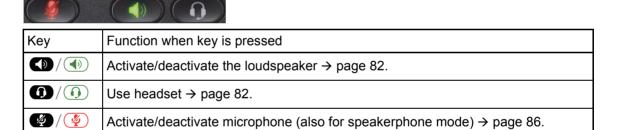

Softkeys

Key	Function when key is pressed
	Activates the function of the left display option or opens another menu. Used in the Favorites menu as a Feature key → page 43.

Audio controls

Audio keys

Volume

Use the controls to adjust the properties of your phone, for example the volume.

Mode keys

You can switch to the relevant application using these keys.

Key	Function when key is pressed
	Switch to the main menu → page 23.
(Switch to Presence and back → page 24.

Navigator

This control allows you to navigate in lists and perform actions in the selected area.

Operation	Functions when key is pressed
Press the key.	In conversation mode: • Open the subscriber information In settings: • Go down one level
Press the key.	In lists and menus: One level back In input fields: Delete character to the left of the cursor
Press the ♦ key.	In lists and menus: • Scroll down • Press and hold: Skip to the end of the list/menu
Press the key.	In lists and menus: • Scroll up • Press and hold: Skip to the start of the list/menu
Press the OK key.	Execute an action for the selected entry.

Dialpad

Numeric input

If you enter a number when the telephone is in idle mode, for example, an input field opens automatically for numeric input. Only the digits 0 to 9 as well as the * and # characters can be entered via the keypad in "123 mode" (indicated at the left margin of the input field).

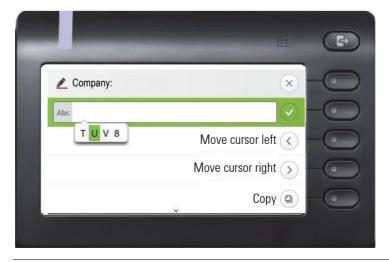

Alphabetic labeling of dial keys is also useful when entering vanity numbers (letters associated with the phone number's digits as indicated on the telephone spell a name, e.g. 0700 - PATTERN = 0700 - 687837).

Text input

In cases where text input is possible, you can use the dialpad to input text, punctuation, and special characters in addition to the digits 0 to 9 and the hash and asterisk symbols. To do this, press the numerical keys repeatedly.

Example: To enter the letter "U" in the "Company" field, press the number week way on the dialpad twice. All available characters for this key are displayed during input. After a short while, the character in focus is displayed in the input field.

If you want to enter a number in an alphanumeric input field, hold down the corresponding key to bypass the character selection.

Complete your input:

Press the Softkey for \checkmark to complete your input.

Character overview (depends on the current language setting)

Key	1x	2x	3x	4x	5x	6x	7x	8x	9x	10x	11x	12x	13x	14x	15x	16x	17x

Multi-function keys

Key	Function during text input	Function when held down
**	Type special characters.	 2 seconds: Ringer off 3 seconds: Beep sound instead of ringer
#23	Switch between uppercase and lowercase text and number entry. • Abc mode • ABC mode	Activate the telephone lock → page 161.
	• 123 mode	
12	Type special characters (not in 123 mode)	

Different display interfaces

Your OpenScape Desk Phone CP600/CP600E is fitted with a color/greyscale graphic display → page 17, in which different contents are displayed depending on the particular situation.

Conversations

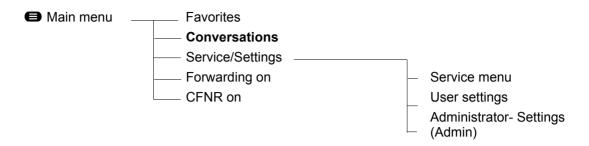

The conversations list is called in the main menu with the Conversations option and is a collection of contact data and data from the call log. See from \rightarrow page 30 for detailed information.

Main menu

Use the key to access the main menu from any situation. The time, day of the week, and date, as well as the subscriber's own phone number, are displayed in the Notification area. The main menu can do much more, as can be seen from the screenshot. As the name suggests it is the starting point for the entire menu tree.

Moreover, different icons represent different situations and options:

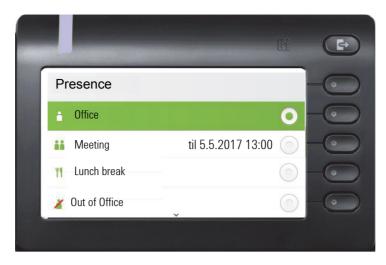

Icon	Meaning
%	The ringer is deactivated → page 22
Ą	The ringer is set to a beep → page 22
•	The "Do not disturb" function is activated → page 154
- O	The phone lock is activated → page 161

Presence

If the access is configured as UC user on your phone (ask administrator) and you are logged on to this server \rightarrow page 187, you will see for example in the top left in the Notification area Presencethe status symbol \Longrightarrow for Office \rightarrow page 70.

To access the "Presence" menu, press the Out-of-Office / Call forwarding key via the Soft-keys. then you will see the following menu:

The menu has another five options.

- Break
- Sick
- · On vacation
- At home
- · Do not disturb

In the submenus of the options you can choose from different values for the duration \rightarrow page 70. Personal Presence via the phone is temporarily suspended with call forwarding or do not disturb.

If UC is not set up, you get a menu for variable call forwarding with the options: Variable: All calls Variable: External Calls Variable: Internal calls.

Context-dependent displays

Depending on the situation, the graphic display on your OpenScape Desk Phone CP600/CP600E shows different content, to which you can respond intuitively.

Action with Softkey

Press the top softkey to start an alphanumeric search.

Use the Softkey to dial the respective subscriber.

You can choose a conversation beforehand using the navigator keys and and open the details of the conversation with the key page 31.

Action via dialpad

Press any key on the dialpad to start dialing a phone number with automatic phone number search.

As soon as you enter the first digits, an input field opens for selecting the phone number and you will be shown conversations that match the input to date in the corresponding positions. If the conversation is already shown in the list before your input is complete, you can dial the number immediately using the associated Softkeys \rightarrow page 31 or start a call with a new number.

Action with navigation key

You can open a selected conversation using the navigator's **♦** key in order to see the associated details **→** page 26.

Action for Dialogue

Choose an option such as "Send message" from the main menu, open it in the Notification area of the "Feature dialog" with the input prompt "Message to:."

Enter the number of the target subscriber here,

Select the desired option

And send the info to the target subscriber.

Operating your OpenScape Desk Phone CP600/CP600E

The following descriptions provide an overview of how to operate your phone.

Before looking at the functions and settings, you should set up the User password to protect your phone against unauthorized use \rightarrow page 159.

Navigating in menus

Activating an application

You can use the mode keys → page 19 to toggle, for example, between the main menu and Conversations or to open the Presence menu.

Browsing lists

You can use the navigator keys to scroll through entries and confirm the functions you want → page 20.

Opening context menus

If the arrow \bigcirc appears beside a selected entry, a context menu is available for this entry \rightarrow page 26.

Conversations

A conversation is a contact with a call history. New conversations are created or updated

- · a previously answered call
- · a outgoing call
- · a missed call
- · a new voicemail
- · an Exchange entry following automatic synchronization

A telephone number is automatically supplemented with a name if this information comes from the communication system or the telephone number is found in the system telephone book or in a company directory (LDAP).

The list is ordered chronologically based on the last interaction. The latest interaction appears at the top of the list. Active calls are displayed before the conversations.

The status of a conversation is displayed with icon and text.

Icon	Text
(1)	Connected call
×	Missed call (current)
×	Missed call (old)
+)	Dialed call
→)	Answered call
مه	New voicemail
مه	Old voicemail

Opening details of a conversation or conducting a call

You can open a selected conversation using the navigation key or start a call using the softkey or the navigation key . You start a call using the softkey if the conversation has not been selected.

If you open the details of the conversation using the \$\display\$ key, you will be shown the following for example:

Editing conversations

Open the details of the conversation using the \$\ddot\epsilon\$ key.

Use the Softkey to open the "Contact details" menu.

Press the Softkey for 🔊 to access edit mode. You can complete the following fields for a contact:

- · Last name:
- · First name:
- work

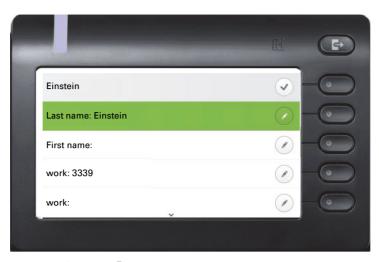

- work
- · Mobile:
- Home:
- · Company:
- · Address 1
- Address 2
- · Role:
- E-mail:
- · Avatar:

Press the Softkey for 📝 to enter the last name.

Delete the digits using the key and enter the last name. Press the Softkey in the input field to complete the input for this field.

Use the or key to switch, for example, to "First name" and enter the first name here if appropriate.

Enter the first name and complete the input for this field with the Softkey.

Save the contact data. You can add missing entries subsequently. The following information is shown on the display, for example, the next time you call this contact:

These inputs or changes to existing information are stored locally in the phone.

Searching for conversations or contacts

There are several ways to search for conversations or contacts. If you know the telephone number, you can,

lift the handset or

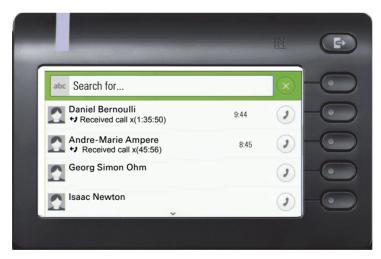

press the speaker key or

press the headset key

and begin entering the digits.

You can immediately dial a located subscriber whose phone number contains the number 33 in this case, for example, by pressing the Softkey.

You can start a targeted alphanumeric search for a contact in any directory (telephone, system telephone book, Exchange or LDAP server) using the first softkey (a) in the conversation list.

Use the me key to change from alphanumeric to numeric.

Filtering conversations

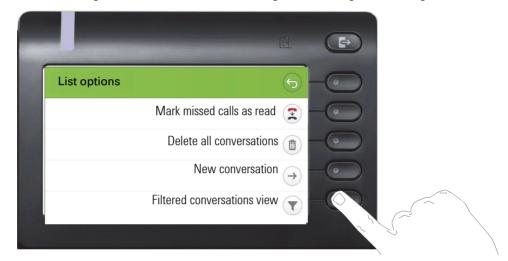

When you want to filter conversations, it is possible to do so from the List options screen. Initially, the filter is non-applied, which means it is set to "Show all calls (All)" and will display all conversation list entries of any call type.

Use the "Filter" action on top shortcut key. This key is used to switch between conversation types.

Pressing the top key will display a filtering tooltip box that shows possible call records and types:

- · All all conversation list entries of any call type
- · Missed list of all missed calls
- · Received list of all received and forwarded calls
- · Dialled list of all dialled calls
- · Contacts contacts with no associated call records
- · Other calls active call, voice mails and ignored pickup

After selecting filter, header should be changed according to selecting.

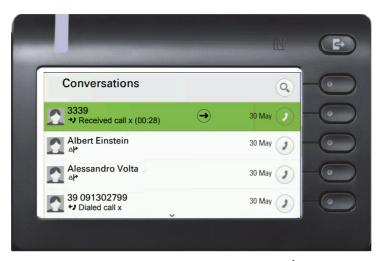

Display the history of a conversation

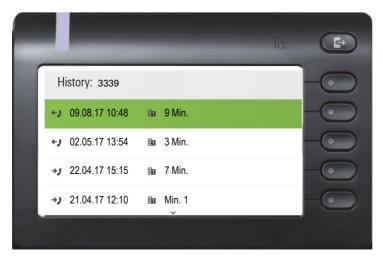

The current history of a conversation is shown directly in the conversation list. The histories of other calls can be viewed under Details or also directly with the History option during a call.

Open the details of the conversation using the \$\display\$ key.

The last three histories are shown in the field on the left below the name/subscriber number. Press the Softkey for (a) to view a list of the last 10 possible histories. Then scroll if appropriate using the \bullet or \bullet key.

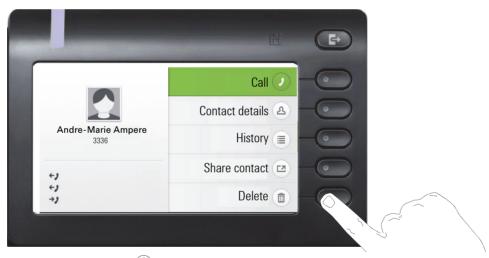

Deleting conversations

If you have for example selected a subscriber mistakenly and you do not wish to call them and must hang up, this call will appear in your call history. You can delete this entry again immediately. Entries for incoming calls that you no longer need or entries from V-Cards can also be removed from the list.

Open the relevant entry using the navigator key .

Press the Softkey for (n) to delete the entry. There is no confirmation prompt.

Telephony interface

Telephony view

Incoming call

Your phone rings and the Notification LED flashes. In addition to the "classic" telephone features, additional information and functions are offered on the display:

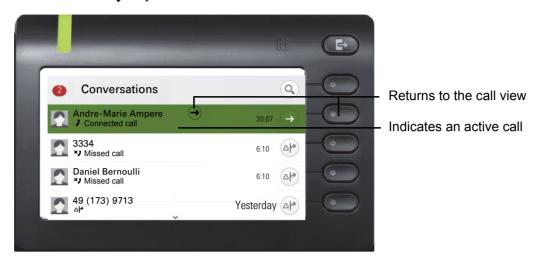

When conducting a call:

Switching to a different menu during a call

You can use the \$\rightarrow\$ key while on a call to switch to the Conversations menu.

Use the key to open the main menu and from there, for example, change the Brightness of the display in the Settings. If you want to activate Do not disturb quickly, you can use the key to switch temporarily to the Presence menu and then return.

Icons in call states

Icon	Meaning	
*	The phone rings	
*)	After dialing, the other subscriber's phone rings

Ŷ	The voice connection is secure.	
2	The voice connection is not secure.	

Programmable keys

Programmable keys are available to you in the Favorites menu or on an optionally connected OpenScape Key Module 600 → page 46.

Programmable keys in the Favorites menu

Through the Favorites menu you have 16 programmeable keys (four sites for each of the four keys), which you can save functions and phone numbers to. You can program preferred functions that are not offered in menus. It makes sense to assign a key to "Layer switching" to reach the second level. To program this key, follow these steps:

Open the following menu using the Softkey for Favorites:

Press the Softkey for 🗸 to set up the first page with four possibilities.

Press the second Softkey to populate the first of four function keys on page 1.

Press the second Softkey to switch to the list of functions.

Use the key to select the "Modify key." Confirm with the Softkey.

Use the lacktriangle key to select "More features." Confirm with the Softkey.

Use the 🇆 key to select "Layer switching." Confirm with the Softkey.

If you prefer not to change the standard"Layer switching" label, simply finish with "finish."

The "Layer switching" function key is now configured and can be used.

Programmable keys on the OpenScape Key Module 600

The OpenScape Key Module 600 has 12 keys to which you can assign functions or numbers at two levels. As such the first level can be assigned with frequently used functions and the second level can only be assigned with RNR keys.

Increase the number of programmable function or selected dialing keys by connecting an additional key module \rightarrow page 18.

Depending on how they are programmed, you can use the keys as:

- Feature key → page 76
- Selected dialing key → page 80
- Linekey → page 138
- Direct station selection (DSS)key → page 141

The OpenScape Key Module 600 has display lines, each of which is assigned to a key. The name of the function or a destination, an action icon, and a status icon are displayed.

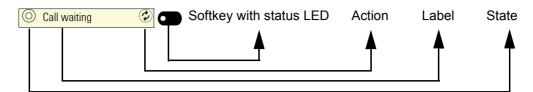

The status of a function is shown by the LED display for the corresponding key.

Meaning of LED displays on Feature keys

Status LED		Meaning of Feature key
	Off	The function is deactivated.
	LED is flashing ¹	Indicates the status of the function (e.g. green or red).
•	On	The function is activated (e.g. green or red).

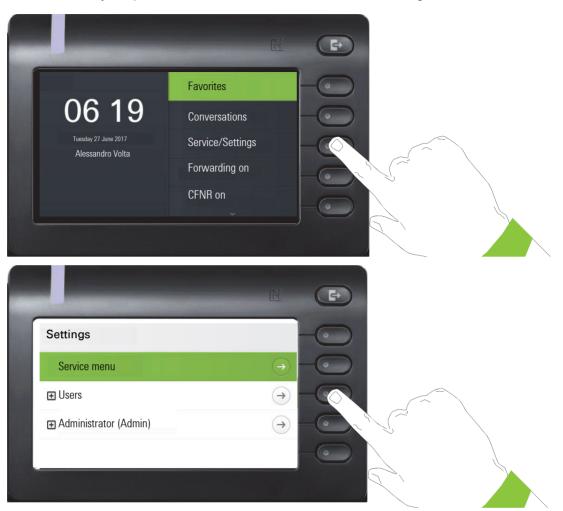

¹ In this manual, flashing key LEDs are identified by this icon, regardless of the flashing interval. The flashing interval represents different statuses, which are described in detail in the corresponding sections of the manual.

Display function of the function keys

User settings

Use the key to open the main menu and then switch to the settings.

The menu consists of a configuration area for system, local user, and local administrator settings.

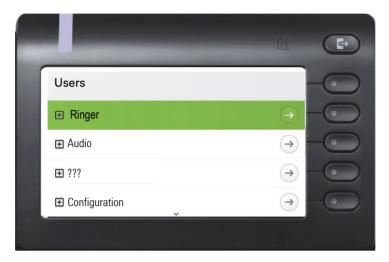

The first time you open the user settings you have to enter the User password \rightarrow page 159.

User settings

Menu

You can adjust local settings for your OpenScape Desk Phone CP600/CP600E using the "User settings" menu.

The menu structure consists of several levels.

You can also configure all settings via the **web interface** of your OpenScape Desk Phone CP600/CP600E → page 195.

Switches

The menus contain switches for activating and deactivating functions. Example:

Press the Softkey on "Insecure call alert" to enable the function. The switch is moved to the right. Alternatively you can use to operate the switches.

Press the Softkey for 🗸 to save your new setting.

Parameters

You can set values in some submenus.

Press the Softkey for 🔊 to open the setting.

Press the Softkey for example on Echoing. The setting is changed and you return to the previous menu.

Exit the menu.

Level

You can use menus with levels to adjust the volume or brightness, for example. An example of display brightness is given here. Switch to the telephone settings menu

and open the display menu with the Softkey.

Open the menu for the brightness setting

Adjust the brightness to the desired level. Use the key to do this. The display is adjusted immediately.

Complete the setting by pressing the Softkey for ${f \checkmark}$.

Save your new settings.

Administration

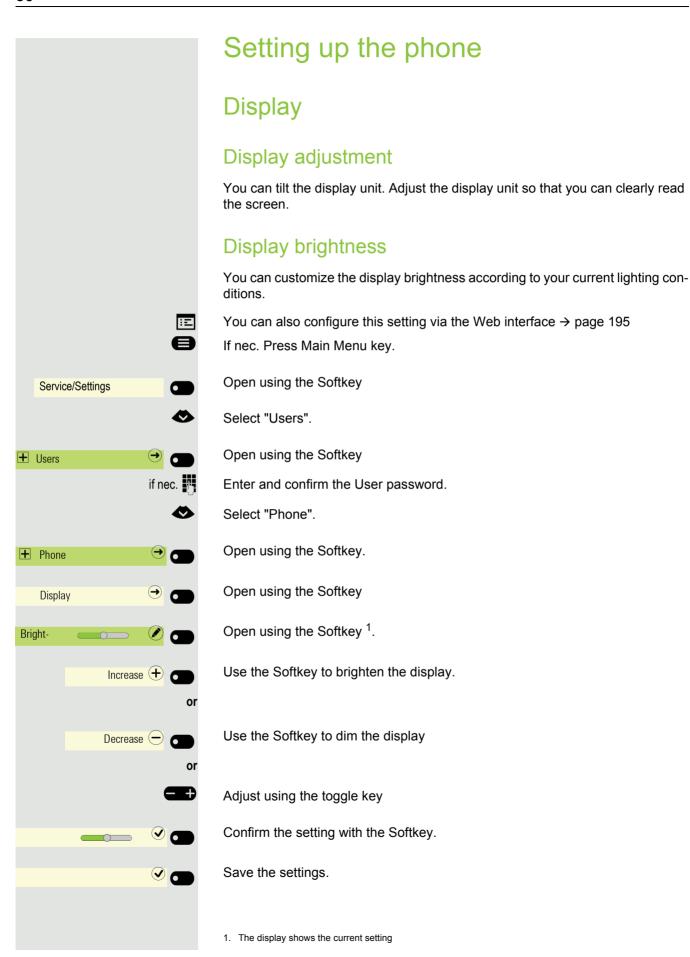

You can access the administration area via the "Admin" function and by entering the administration password.

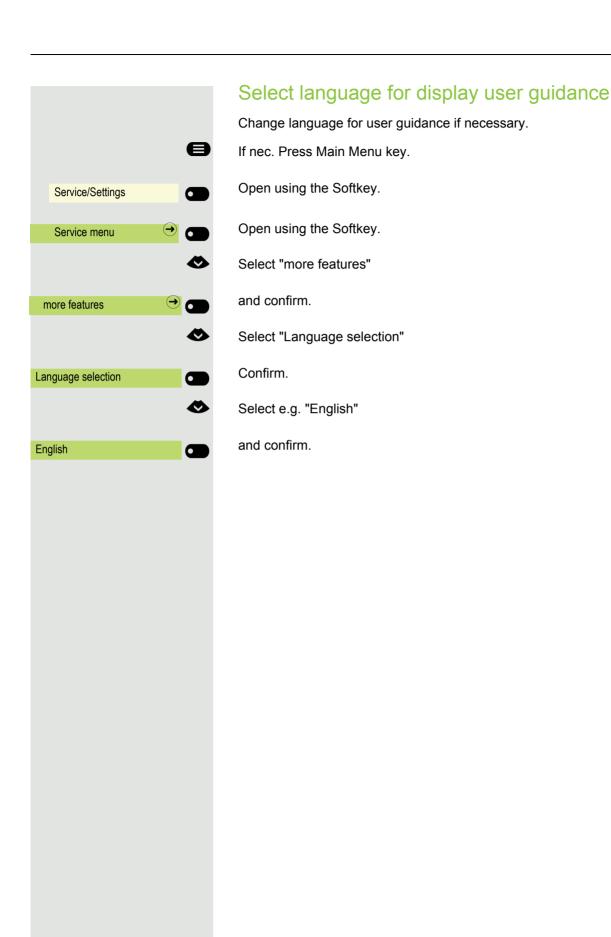

Refer to the administration manual for your phone for more detailed information on this topic.

During a software update, the phone must not be disconnected from the power supply unit, the LAN line or the phone line.

An update action is indicated by messages on the display and/or by flashing LEDs.

Energy saving mode

Select the inactivity time after which the OpenScape CP 600/600E should automatically dim or turn off the backlight.

You can select the following time combinations for backlight dim / switch off :

- 1 minute/5 minutes
- 5 minutes 20 minutes
- 30 minutes/2 hours
- 45 minutes/4 hours
- 60 minutes/8 hours

You can also configure this setting via the Web interface → page 195.

If the Presence status is set to:

- · At home
- On vacation
- Sick
- · Do not disturb

callers are redirected to a media server. Depending on the status, a caller will receive a message with the reason for and duration of absence and will be offered the option to leave a message.

With the Presence status

- Meeting
- · Lunch break
- · Out of Office
- Break

there is no redirection and the called will not receive a message.

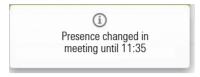

Example Meeting

Set your absence duration for a Meeting:

Press the key.

Open using the Softkey.

press Softkey to select and hour, for example. You will receive a confirmation like the following:

The setting is displayed.

The Presence icon for Meeting on your phone's idle display is changed accordingly. The status is updated on "MyPortal" and will appear alongside your details.

Switch off away status

Delete your absence status and, if necessary, forwarding to the media server by setting the Presence status in the Presence menu to Office or if necessary switching off forwarding.

Press the key.

Open using the Softkey.

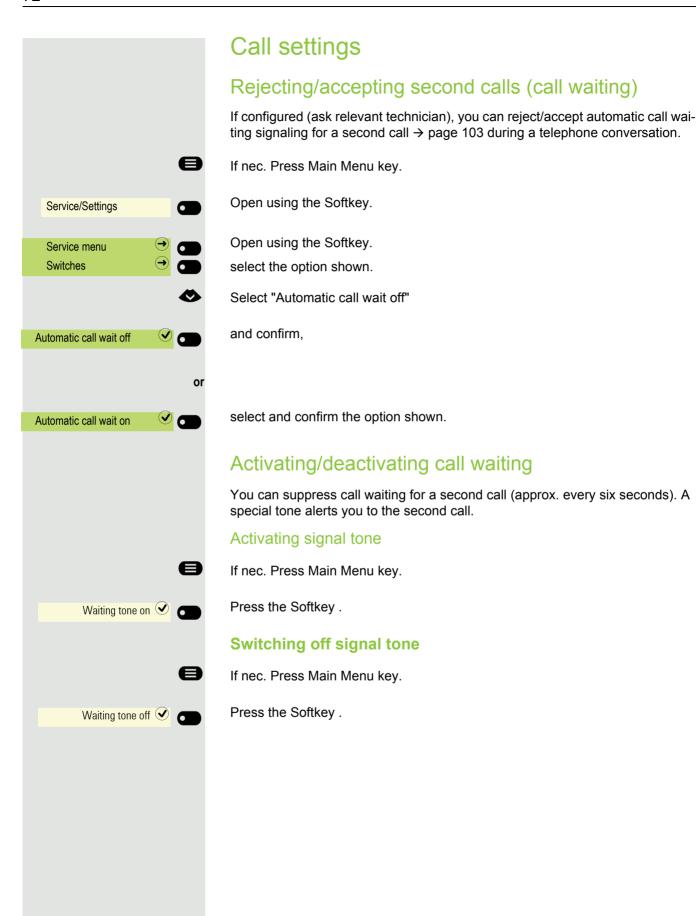

Confirm with Softkey.

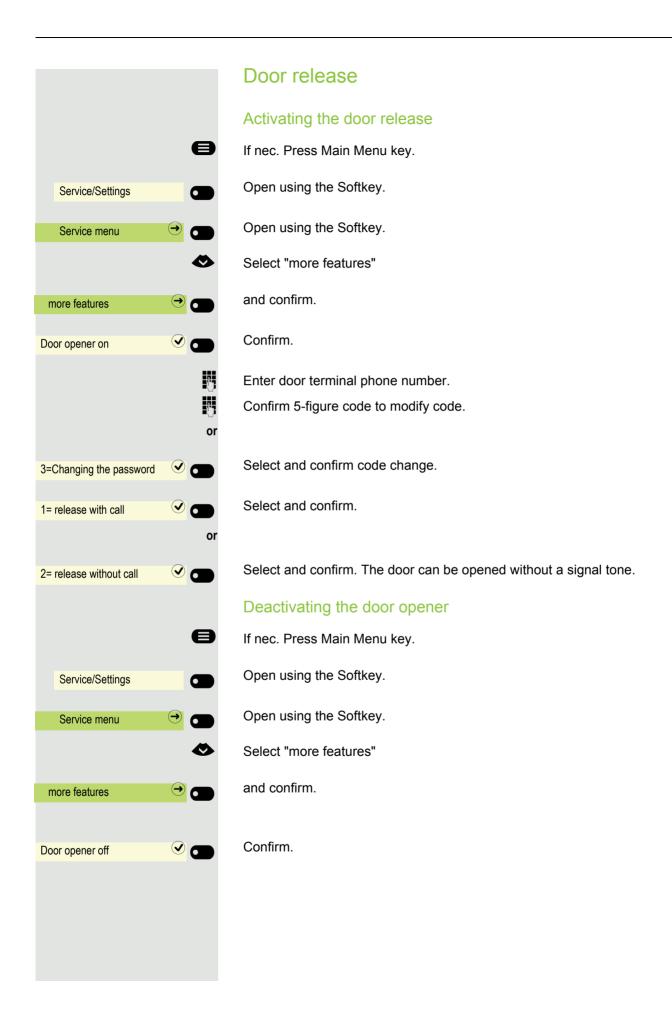

The setting is displayed. The Presence symbol in idle menu changes accordingly. The status in "MyPortal" is also adjusted.

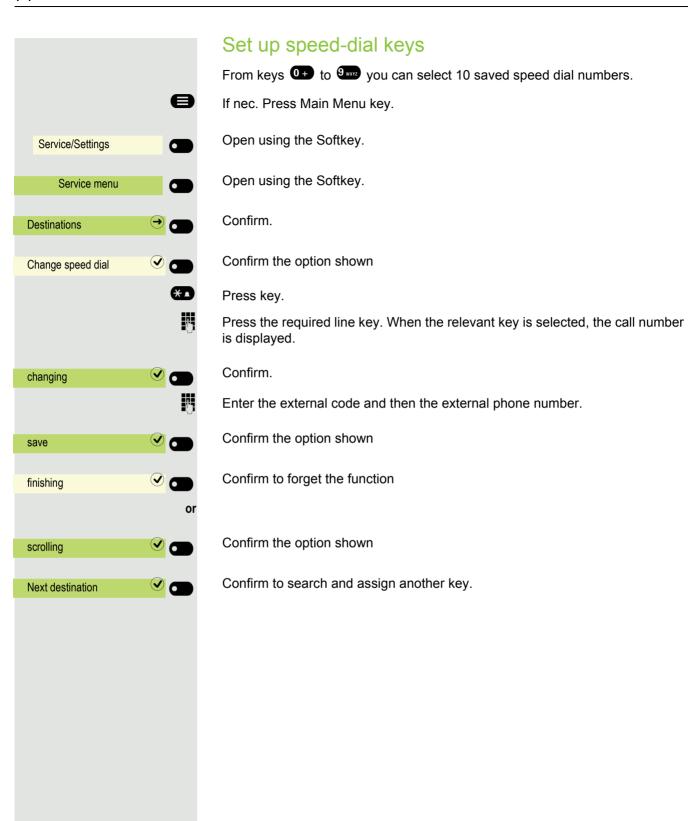

a forwarding function to the media server is enabled.

If nec. Press Main Menu key.

Confirm.

Switch night answer on and off

In night answer mode, for example, during lunch breaks or after office hours, all external calls are forwarded to a particular internal telephone (night station). The night station can be defined by the relevant service engineer (= standard night answer) or by you (= temporary night answer).

If nec. Press Main Menu key.

Open using the Softkey.

Open using the Softkey.

Confirm.

Activating

Select "Night answer on"

and confirm.

Confirm to switch on night answer.

Deactivating

Select "Night answer off"

and confirm to switch off night answer

The technical professional can also set up "automatic night answer". Depending on programming, the automatic night answer on your phone turns on at specific times.

You can switch off or disconnect automatic or custom night answer settings.

Programming function keys

Your can assign frequently used functions, numbers or services to the keys of your OpenScape Key Module 600E. You can save destination call numbers to the second level.

The keys can be programmed in three ways:

- · Press and hold selected key
- · Call up via the Service menu
- · Call up via user settings

The following is a description of the set up by pressing and holding the selected key.

Function keys setup

See also the information in \rightarrow page 43.

Example: "Disconnect key" set up

Hold down the Function keys on the OpenScape Key Module 600E to which a function is to be assigned until the programming prompt is displayed.

If nec. Press Main Menu key.

Open using the Softkey.

Select desired page (1 to 4).

Press and hold the Function keys to be programmed.

Select "Assign telephone function"

Confirm.

Confirm.

Confirm.

Select "Calls:"

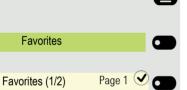

Confirm. The key is programmed.

You can also change the standard key label

Select "Key labelling "

Confirm.

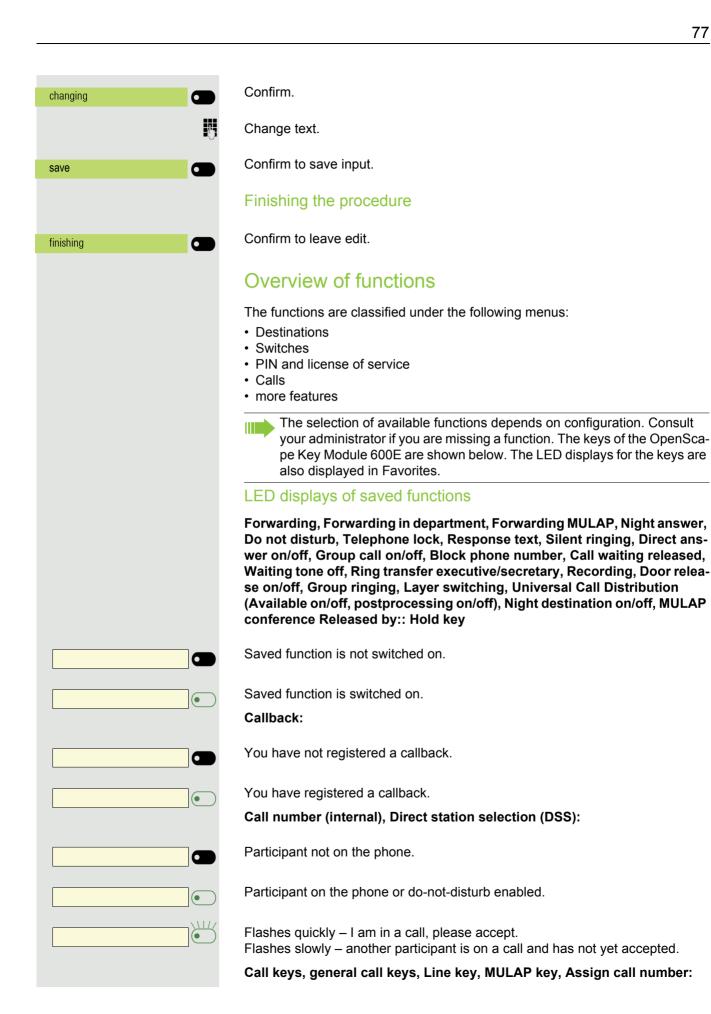

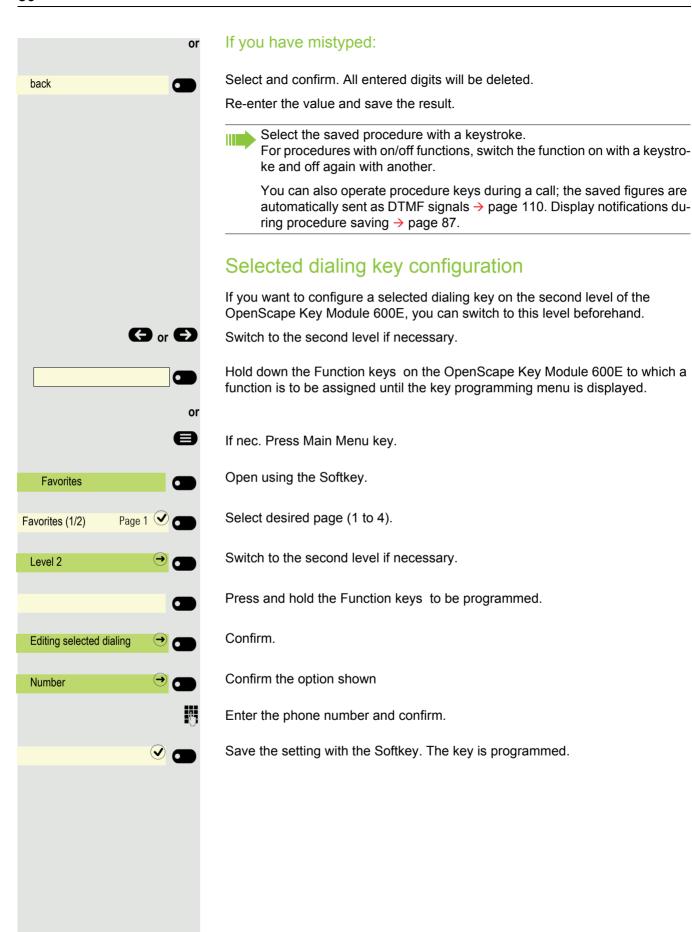

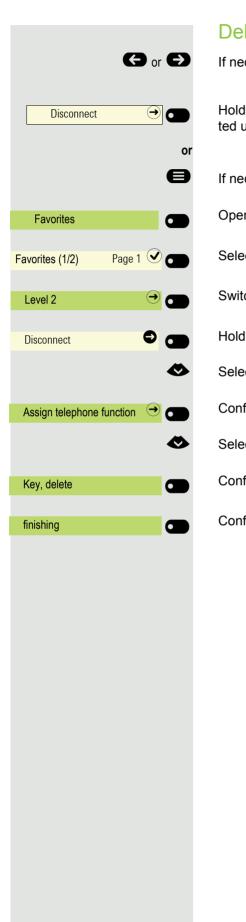

No call on relevant line. Active call on relevant line. Blinking quickly - Call on current line, call pickup is possible through key selection. Blinking slowly – call on current line on hold. **Direction keys:** At least one line is free. All lines in this direction in use. Deleting key programming

If necessary switch to another level

Hold down the Function keys on the OpenScape Key Module 600E to be deleted until the key programming menu is displayed.

If nec. Press Main Menu key.

Open using the Softkey.

Select desired page (1 to 4).

Switch to the second level if necessary.

Hold down the Function keys to be deleted.

Select "Assign telephone function"

Confirm.

Select "Key, delete"

Confirm. The key programming is deleted.

Confirm to end the process.

Making calls

To better understand the steps described here, it is recommended that you read the introductory chapter "Getting to know the OpenScape CP 600/ 600E" \rightarrow page 16.

Receiving a call

The call number or name of caller will be shown on the display.

Answering a call via the handset

The phone rings.

Lift the handset¹.

Answering a call via the loudspeaker (speakerphone mode)

The phone rings.

Press key. LED is lit¹.

Press the Softkey shown.

Answering a call via the headset

Prerequisite: A headset is connected.

The phone rings. The key flashes.

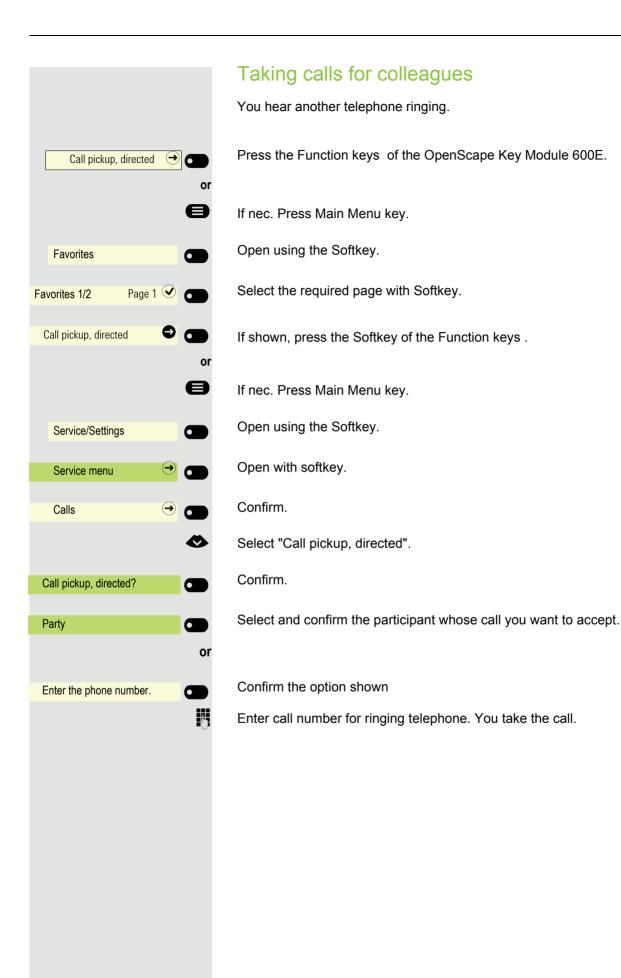

Press key¹.

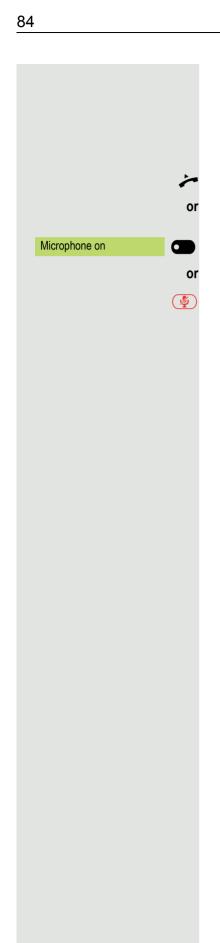

Rejecting calls

You can reject a call you do not wish to accept. The call is then sent to another definable phone (consult relevant Administrator).

Press the Softkey shown.

Spoken via loudspeaker

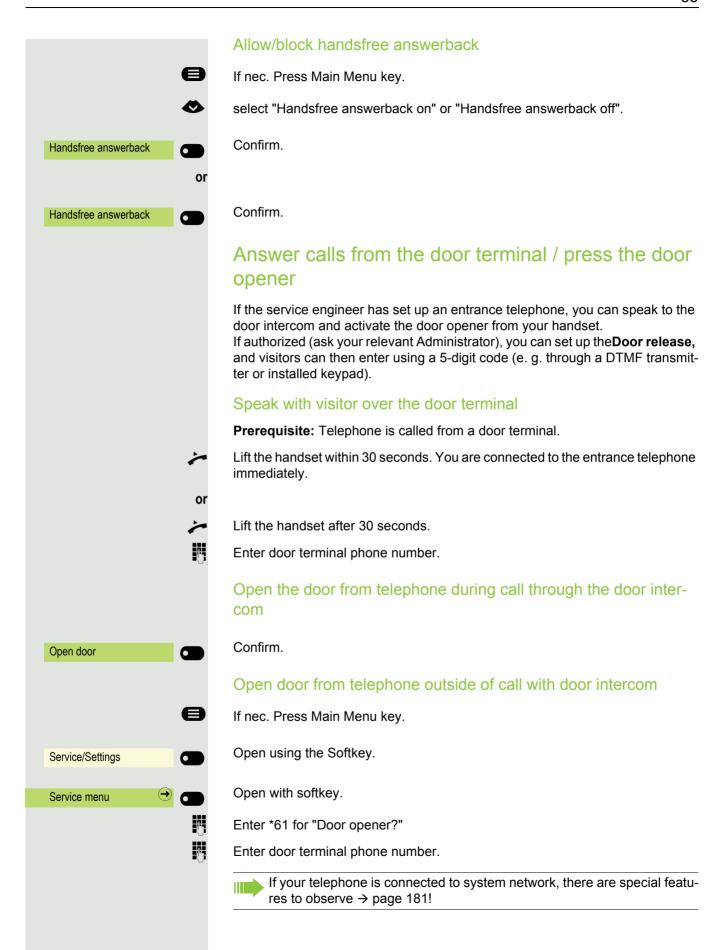

You are being spoken to directly by a colleague over speakerphone. Before this happens you will hear an alert tone. The partner's name or phone number is shown on the display. You can answer directly with the handset or via loudspeaker .

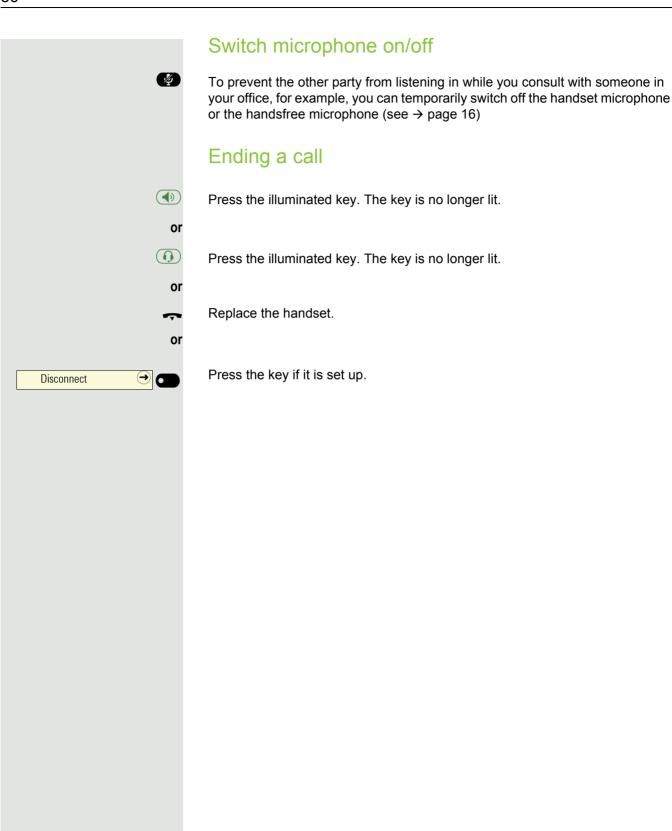

Lift handset and answer.

Confirm.

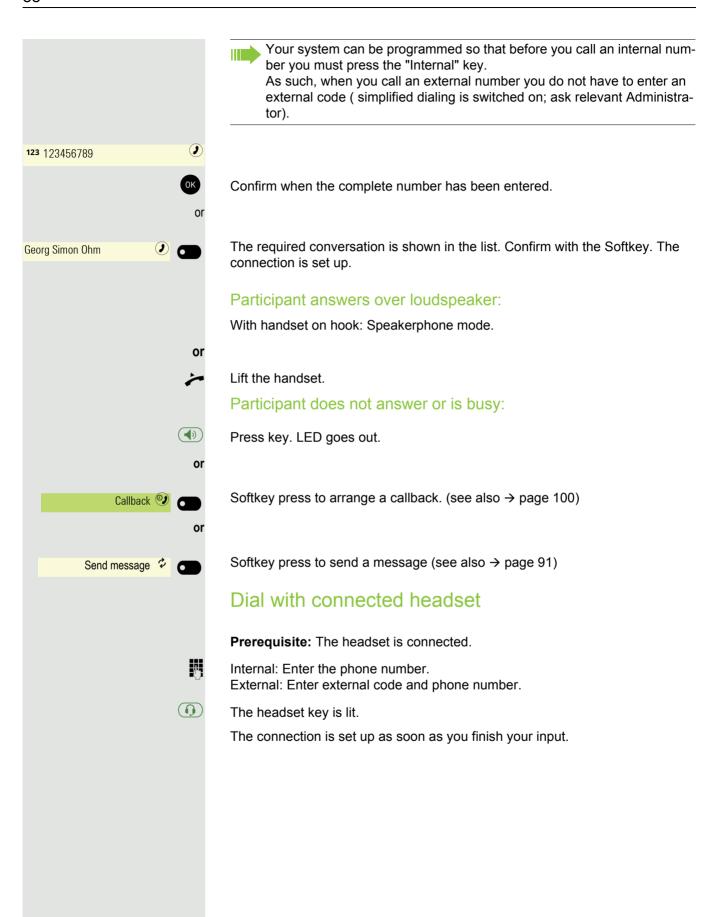

Press the illuminated microphone key.

When answering hands-free (see below), upon answering you must not switch on the microphone. You can answer hands-free immediately. If hands-free answering is blocked (default), proceed as described above. Speak directly to your colleagues → page 91.

Dialing/Calls You make a call by entering the phone number of the relevant party using the dial pad or by searching for this party in the permanent Conversations list. Conversations include: · Dialed and received calls · Participants from Circuit · Participants from Exchange · Participants from a company-wide directory. Off-hook dialing Lift the handset. The input field in Conversations is opened in numeric mode. 123 Dialing a number... Internal: Enter the phone number. External: Enter external code and phone number. () 123 082631565 OK Confirm when the complete number has been entered. The required contact is shown in the list. Confirm with the Softkey. The connec-Peter Maier tion is set up. Participant does not answer or is busy: Replace the handset. Dial with the handset on-hook Enter digits via the dial pad. Press the key if a headset is connected. Press key. The input field in Conversations is opened in numeric mode. 123 Internal: Enter or complete the phone number. External: Enter or complete the external code and phone number.

Choose from conversations

The conversations list is displayed on the screen. If the contact you want is not visible, then select with

or search by entering the phone number or name.

Confirm the selected contact with the Softkey. The phone number is dialed.

If visible, confirm immediately with the Softkey for the contact. The phone number is dialed.

Dialing with the selected dialing key

Requirement: You have saved a call number on a selected dialing key → page 80.

If necessary switch to another level.

Press key with saved number.

You can also confirm the selected dialing key during a call, which will automatically start a callback → page 104.

Redial

You can use conversation list to call your last connected party. You can do this via the history of a conversation (for more information, see "Display the history of a conversation" → Page 39) or via contact details (for more information, see "Opening details of a conversation or conducting a call" → Page 31).

Calling back a missed call

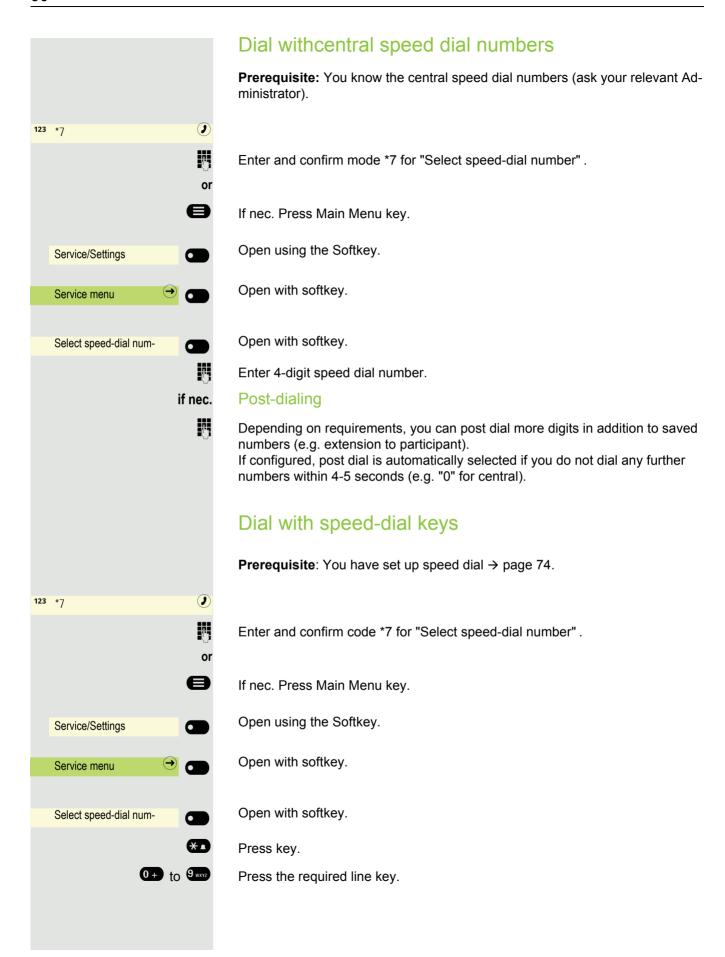

Contacts who have tried to reach you are identified accordingly in the conversations list and appear at the top of the list. In addition to the menu name, i.e. Conversations, the number of missed calls is shown against a red background \rightarrow page 23.

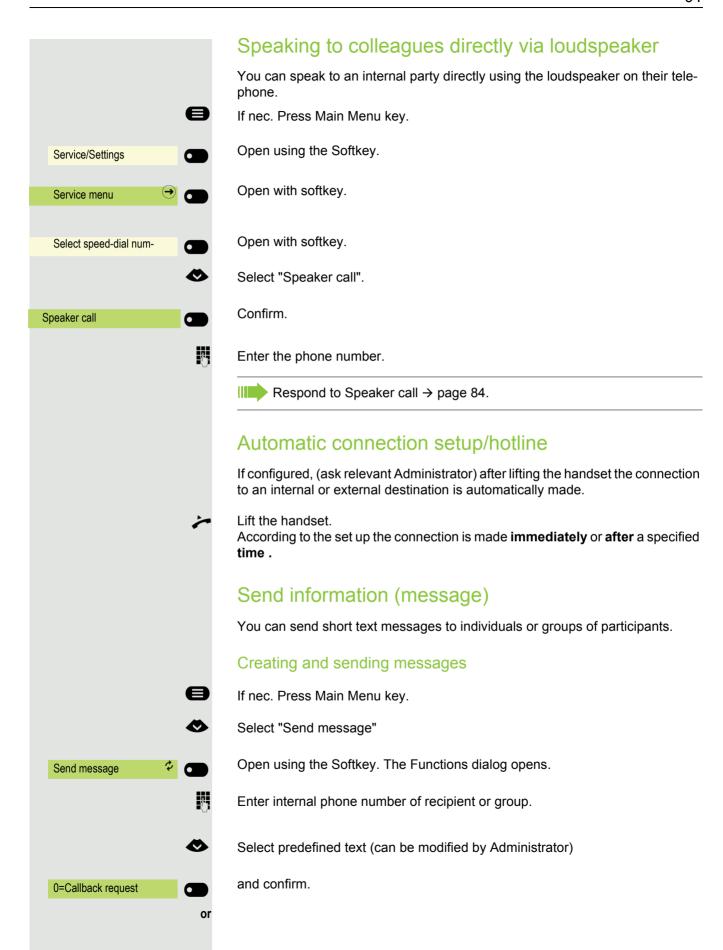

The notification LED is red. In addition to the menu name, i.e. "Conversations", the number of missed calls is shown.

If nec. Press Main Menu key.

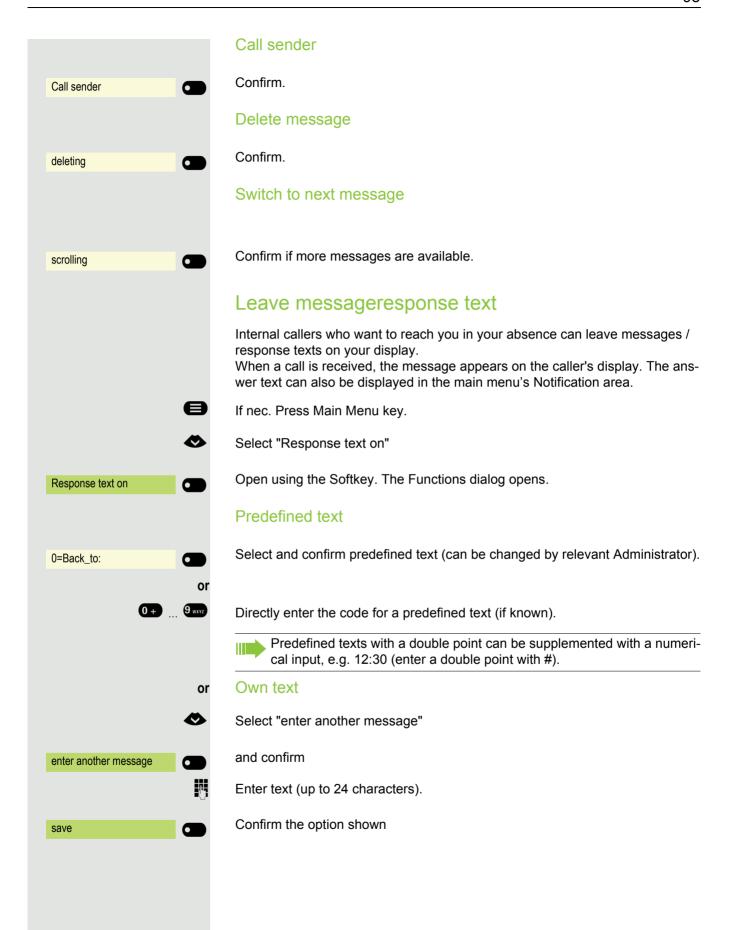

Open using the Softkey.

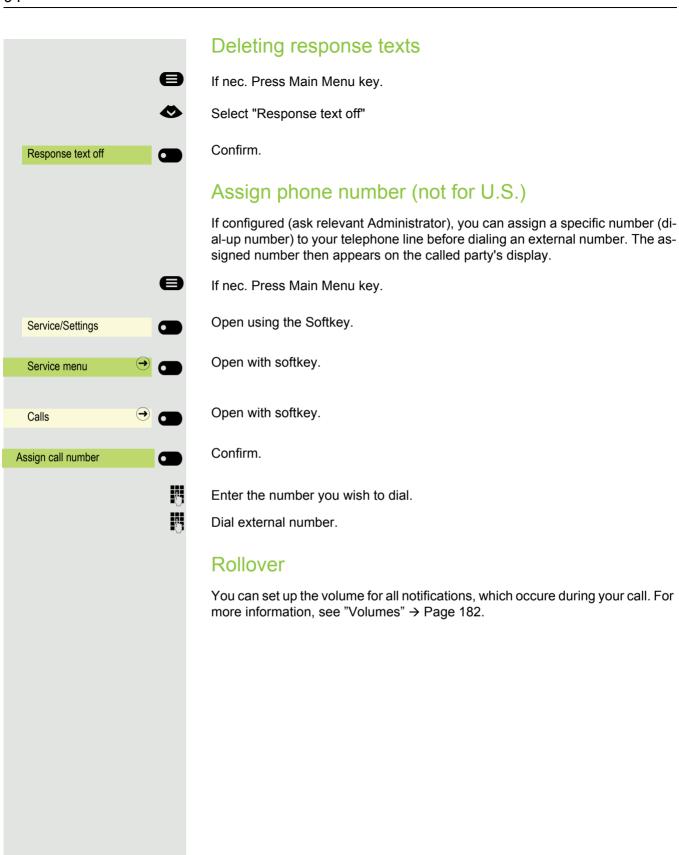

A contact is indicated as a "New missed call" with 👗 . Select the contact and confirm to call the contact.

Forwarding calls

Use variable call forwarding

You can immediately forward internal and/or external calls to your lines to different internal or external telephones (destinations) (external destinations are also possible if the system is configured accordingly).

If call forwarding is activated, a special dial tone sounds when the handset is lifted.

If DTMF dial-in (ask relevant Administrator) is active, you can also divert calls there. Destinations: Fax = 870, Direct inward dialing = 871, Fax-Direct inward dialing = 872.

If you are the end caller of a forwarded call, you can see the call number or the name of the forwarding party in the Notification area of the display (first line) and the those of the caller below it.

If your telephone is connected to a system network, pay attention to any specific features → page 178!

Setting up call forwarding via the call forwarding menu

Prerequisite: The Presence menu is not available → page 70

Open the Forwarding menu.

In the menu, you immediately have an overview of call forwarding currently set-up. This menu is also available via the user settings.

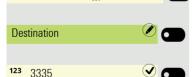

Confirm.

No destination

Confirm.

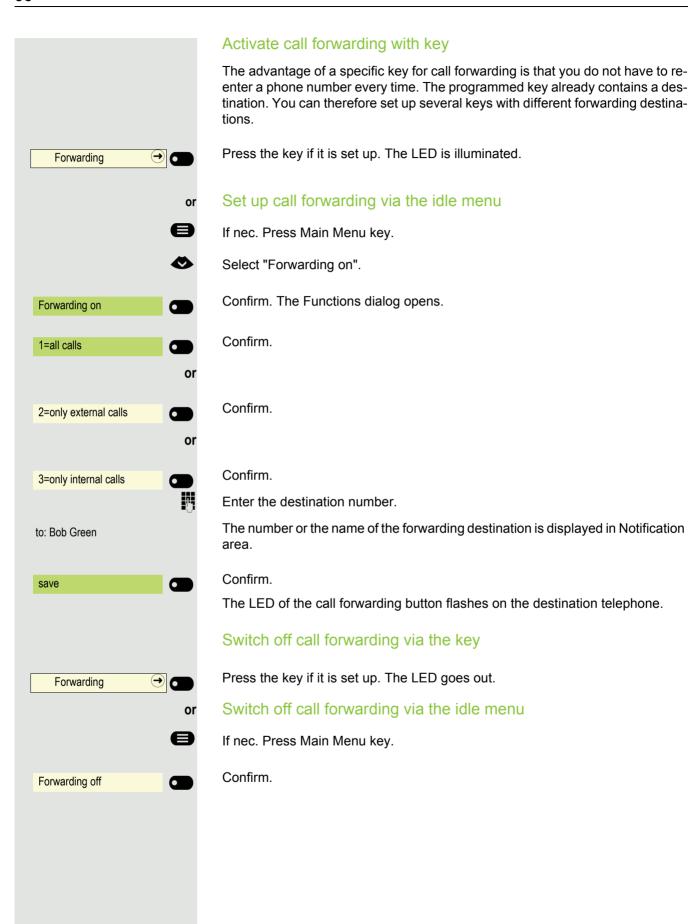

Variable: Internal calls

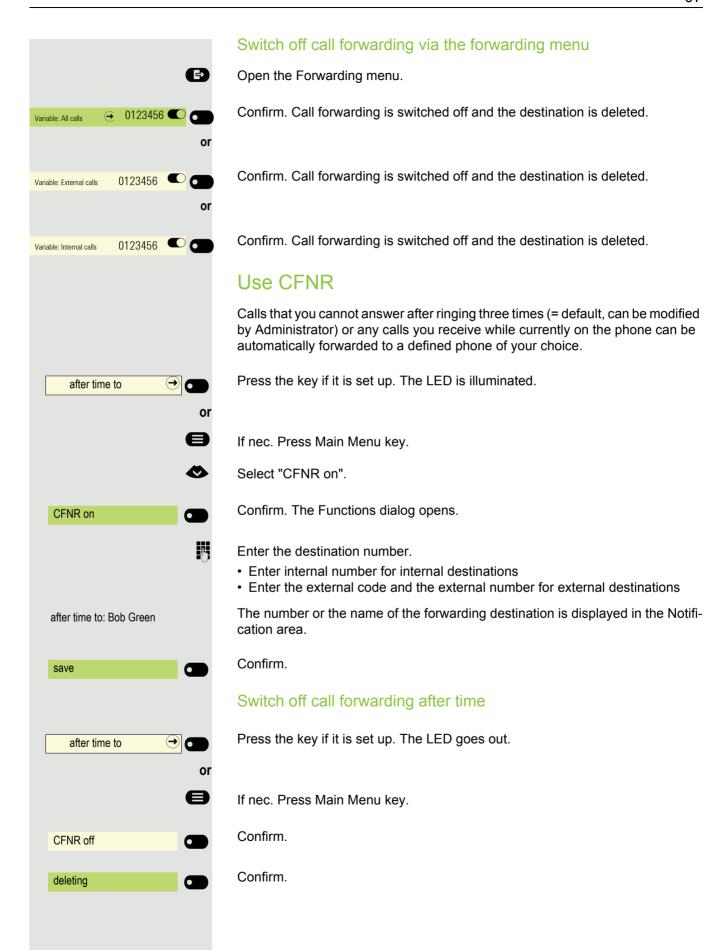

Confirm.

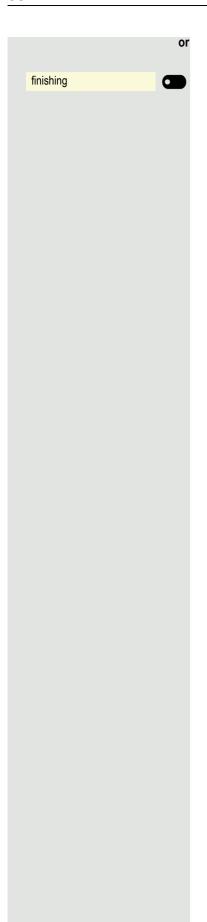

Enter the destination phone number on the dial pad.

Enter destination phone number. Confirm your input with the Softkey.

Use the Softkey to open the editor for the destination phone number

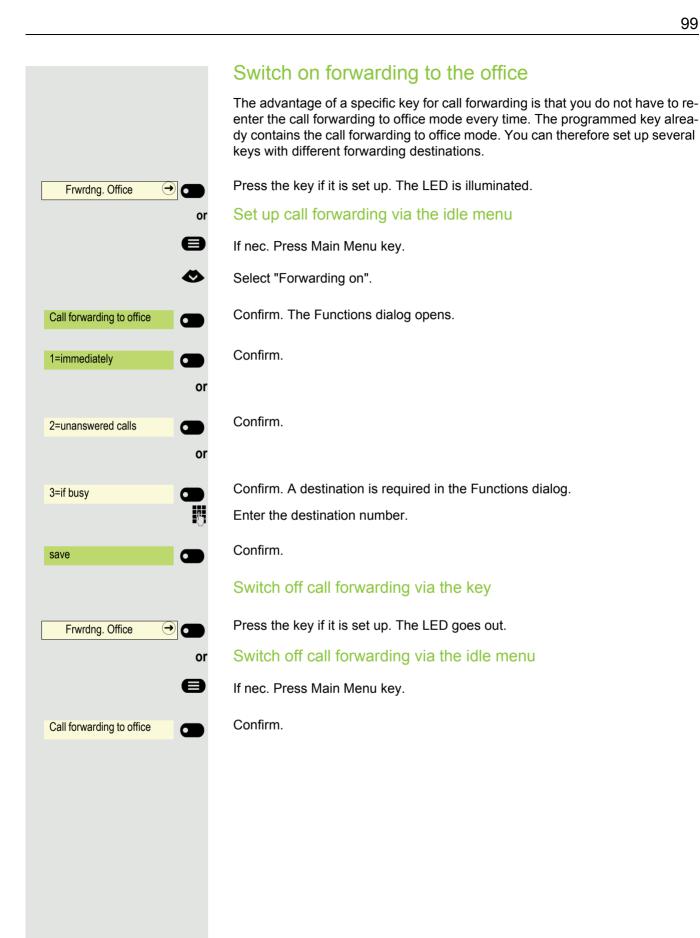

Select and confirm to return to the idle state and to not turn off call forwarding.

If call forwarding is activated after a certain period of time, the "forwarding after time" appears on the display for a short time after the handset has been replaced.

Callback 🧐 or or accept 🕗

Using callback

You can request a callback if the individual called is busy or if nobody answers. This also applies to external calls via switching centers. This will save you from repeatedly attempting to call someone.

You receive a callback

- you receive a callback when the other party's line becomes free.
- as soon as the party who did not reply has held another conversation.

If configured (ask relevant Administrator), all callback requests are automatically deleted overnight.

Save callback

Prerequisite: The line is currently busy or nobody answers.

Confirm.

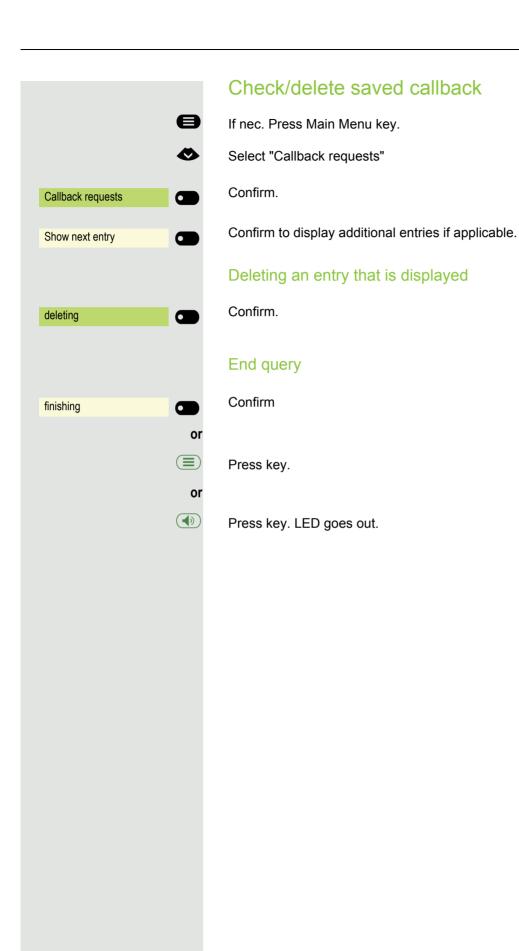

Accepting a callback

An participant for whom a callback was saved is now no longer busy or has phoned in the meantime. Your phone now rings.

Lift the handset.

Press key. LED lights up.

Confirm to accept the callback.

During the call

Switch to speakerphone

Prerequisite: You are conducting a call via the handset.

Press and hold the key, hang up handset, and then release the key and continue the call.

US mode

If the country setting is set to US (ask relevant Administrator), you do not need to press the loudspeaker key when you hang up the phone.

Press key.

and 🔩

Replace the handset. Proceed with your call.

Switch to handset

Prerequisite: You are conducting a call via speakerphone mode.

Lift the handset. Proceed with your call. The hands-free microphone is switched off.

Open listening in the room during a call

You can allow other people in the room to listen in on the call. Let the other party know that you have turned on the loudspeaker.

Prerequisite: You are conducting a call via the handset.

Activating

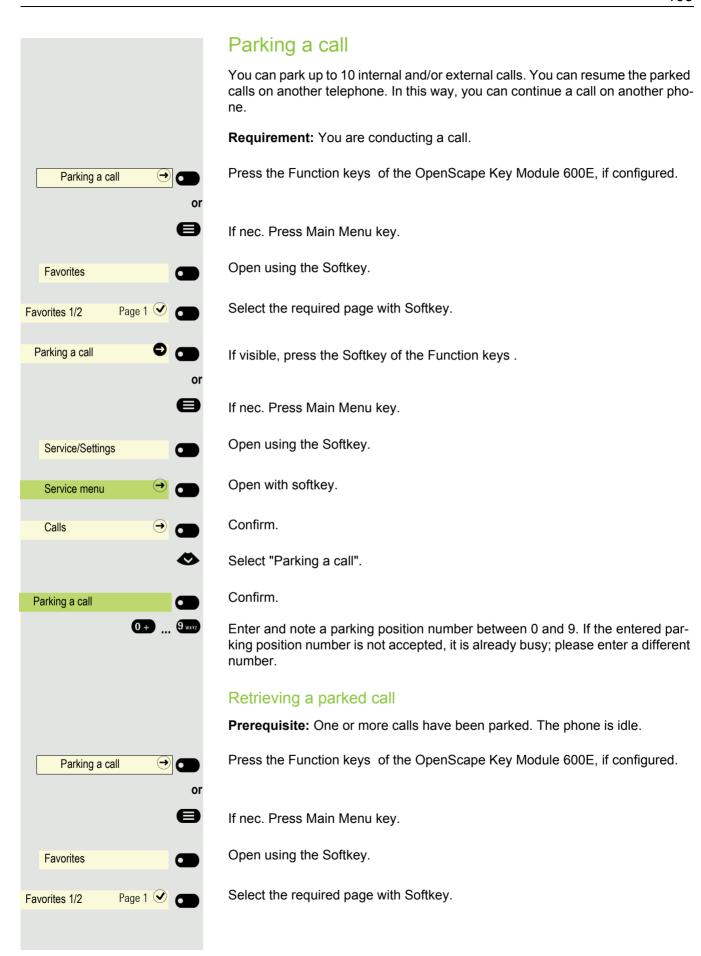

Press key. LED lights up. The hands-free microphone remains off.

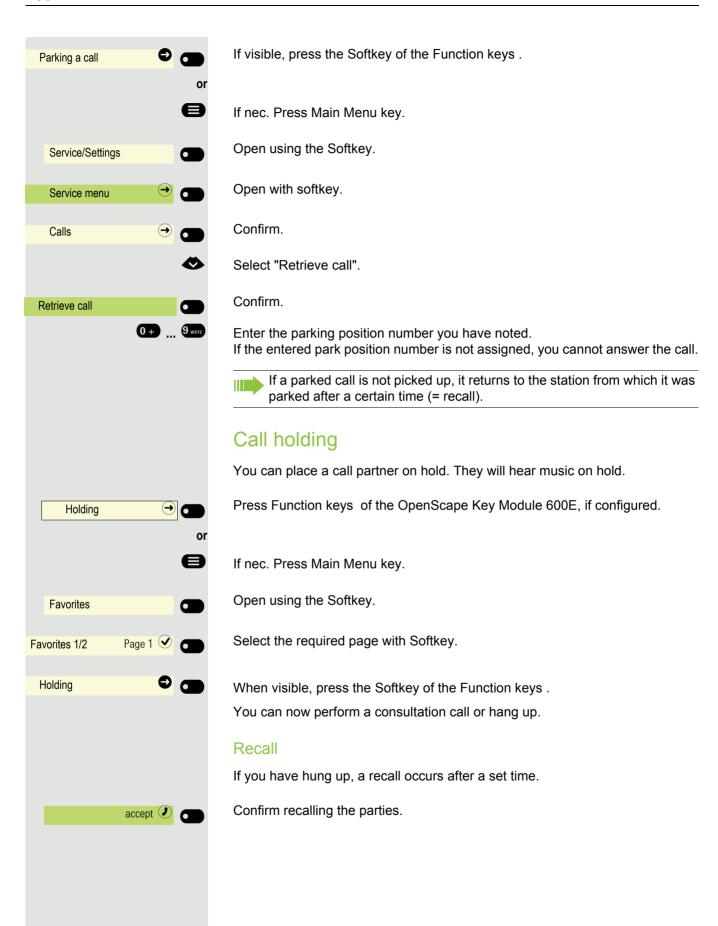

Deactivating

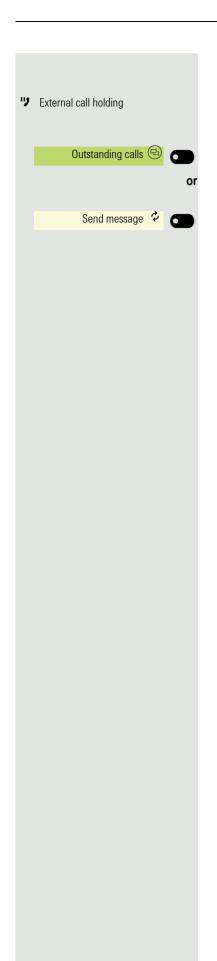

Press key. LED goes out.

Using second call (call waiting) You are still available to other callers, even though you are on the telephone. A warning tone and the notification "Call: <x>" in the display indicate the waiting You can ignore or accept the second call. Before you accept the second call, you can end the first call or place it on hold for subsequent retrieval. You can also block the second call or the signal tone (\rightarrow page 72). Prerequisite: You are on the phone and hear a warning tone (approx. every six seconds). End the first call and answer the second call Replace the handset. Your phone rings. Accept second call. Lift the handset. Place first call on hold and answer second call Confirm. You are connected to the second caller. The first party is placed on Accept call waiting 2 hold. Ending the second call, resuming the first call: Confirm the option shown end and back Replace the handset. Recall the first individual. Confirm. accept 2 Lift the handset.

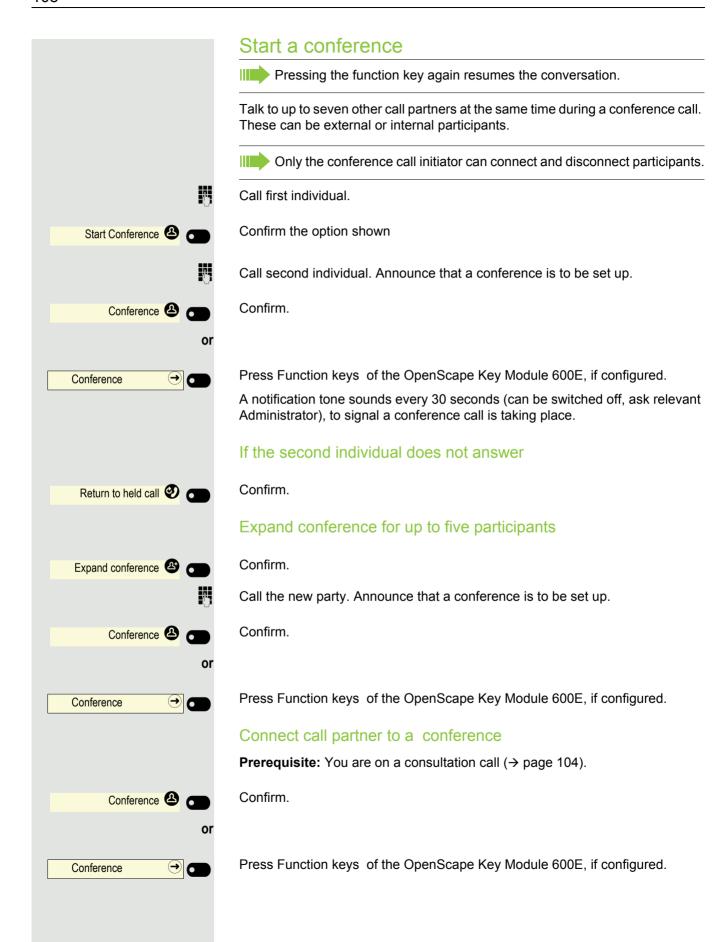

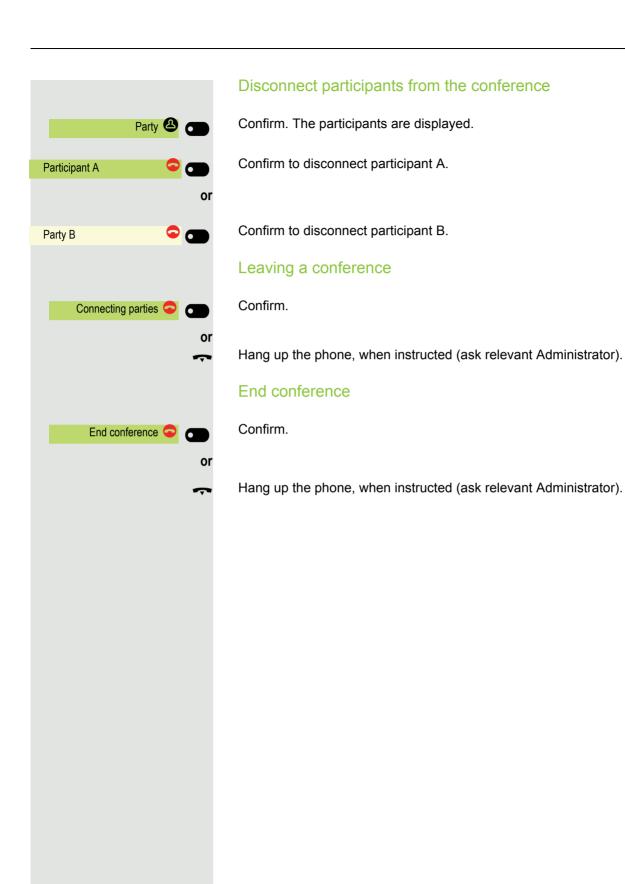

Being on hold

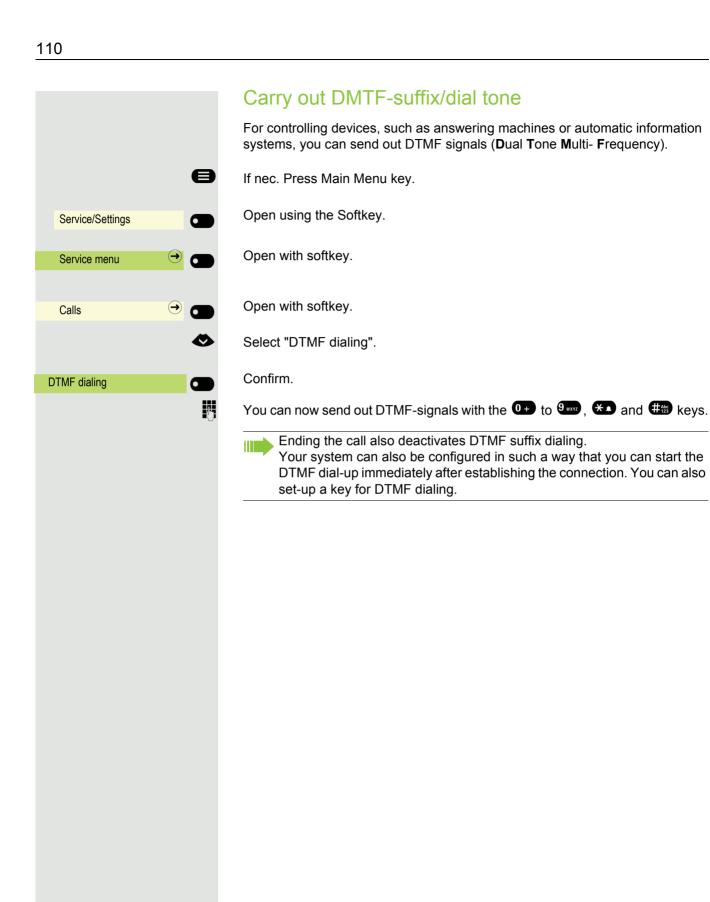

You have been placed on hold by your call partner and informed accordingly in the Notification area.

Confirm to receive information about the call partner in "Conversations".

Softkey Press to send info (see also → page 91)

Using Bluetooth

Bluetooth is used for wireless communication, e.g. between PCs or tablets and smartphones or headsets. Bluetooth can be used at a distance of up to 10 meters. To exchange data between Bluetooth-enabled devices, the devices need to undergo a once-off pairing procedure.

Please note that Bluetooth and NFC are not available on CP600E.

Discoverability

When first enabling a connection to a Bluetooth device, this function must be switched on \rightarrow page 129.

The OpenScape CP600 is recognizable by default for other Bluetooth devices once you have opened the pairing menu.

The OpenScape CP600 discoverability feature is disabled on exiting the pairing menu in order to prevent misuse.

A connection is established for devices that are already connected even if the "Discoverable" function is deactivated.

Pairing

Pairing is the process used by two Bluetooth-enabled devices to "see" one another and to "recognize" that they can exchange data. It is therefore used for checking the access authorization of a Bluetooth device in a Bluetooth network. A connection key is generated for later identification.

Pairing is only performed the first time contact is established between a Bluetooth device and your OpenScape CP600/CP600E. If the Bluetooth device is successfully paired, no further access authorization checks are necessary. Instead, each subsequent check uses the previously created link key.

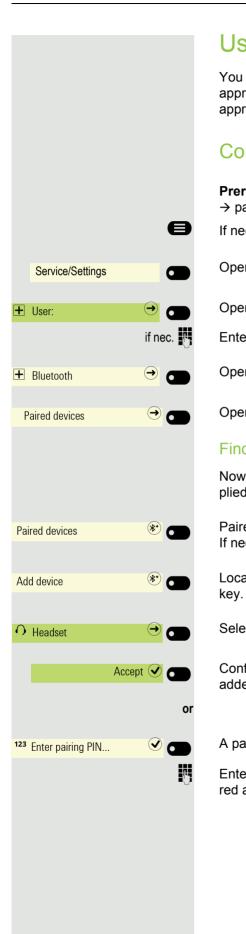

Pairing NFC-enabled devices

If your Bluetooth device has an NFC reader (Near Field Communication), it can be very easily connected to your OpenScape CP600 (often smartphones, but not headsets).

The NFC transmitter on the OpenScape CP600 is located in the top right area of the display, to the left of the Presence key and below the "N" logo.

To pair the Bluetooth device, hover over this logo and follow the instructions (see instructions for Bluetooth device).

Using a Bluetooth headset

You can connect a Bluetooth headset to your OpenScape CP600, which is approved for use with the OpenScape CP600. Ask your administrator about approved headset types.

Connecting the Bluetooth headset

Prerequisite: The Bluetooth function on your OpenScape CP600 is activated → page 128.

If nec. Press Main Menu key.

Open using the Softkey.

Open using the Softkey.

Enter and confirm the User password.

Open using the Softkey.

Open using the Softkey.

Finding and connecting the Bluetooth headset

Now switch your Bluetooth headset to pairing mode (see the user manual supplied with the device).

Paired devices are displayed. Start the search for new devices with the Softkey. If nec. Start or set the paging function on the Bluetooth device if appropriate.

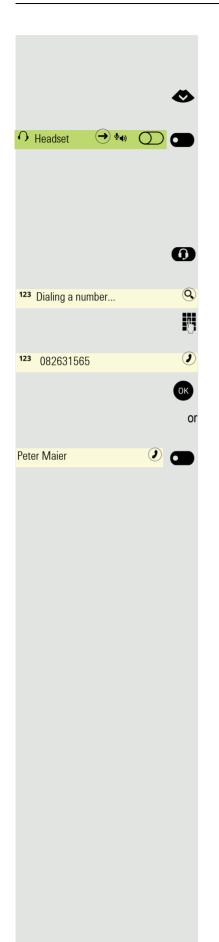

Located devices are displayed. Repeat the search if appropriate with the Soft-

Select the relevant headset and open with the Softkey.

Confirm the pairing prompt with the Softkey. The Bluetooth device is paired and added to the list.

A pairing PIN is requested

Enter the pairing PIN and confirm with the Softkey. The Bluetooth device is paired and added to the list.

Connecting a Bluetooth headset to OpenScape CP600

The Bluetooth headset must now be connected to the OpenScape CP600.

Select the Bluetooth headset in the list.

Confirm with the Softkey to connect. You will receive a corresponding confirmation. The connection is immediately established and the headset is ready for operation.

Testing a Bluetooth headset

Press key. You should now hear the on-hook signal in the headset.

The input field is opened.

Enter the phone number.

Confirm when the complete number has been entered.

The required contact is shown in the list. Confirm with the Softkey. The connection is set up.

If nec. Set-up call volume on headset.

Transferring contacts

The Bluetooth function on your OpenScape CP600 allows you to transfer contacts in **vCard format** (file extension: vcf) from other Bluetooth devices to your OpenScape CP600 and save them in the Conversations list. You can also send entries from the Conversations list as vCards to other Bluetooth-enabled devices.

Due to the diverse range of PCs, smartphones and PDA devices currently available, we are unable to provide universal instructions on how to transfer vCard files in this manual.

The instructions for data transfer via Bluetooth provided in the relevant manufacturer documentation should be observed.

Receiving a vCard

Prerequisite: The Bluetooth function on your OpenScape CP600 is activated → page 128. A vCard file is stored on your Bluetooth-enabled device (PC, tablet, mobile telephone, etc.). Start the data transfer.

If a vCard is transmitted, you will be prompted to accept the data transfer.

Example:

Press the Softkey to allow the data transfer.

Saving contacts

Press the Softkey again to save the vCard(s) to the contact list. You will receive confirmation.

Sending a vCard

Sending to a paired device

Prerequisite: The receiving device is included in the list of paired devices, Bluetooth is activated on the device and can receive vCards.

Select the required contact from the Conversations menu.

The selected contact is highlighted.

Open the contact.

Press the Softkey. The menu for paired devices opens. A search is initiated for devices.

Use the Softkey to confirm sharing on the relevant paired device. The vCard for the entry is sent. (You will receive confirmation).

Perform the necessary steps on the destination device to save the vCard data.

Sending to an unpaired device

Prerequisite: Bluetooth is activated on the device and the device can receive vCards.

Select the required contact from the Conversations menu.

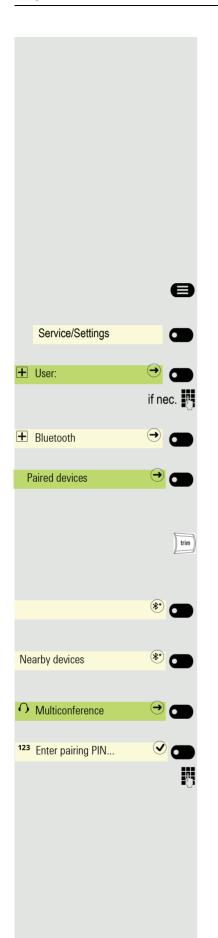

The selected contact is highlighted.

Open the contact.

Press the Softkey . The menu for paired devices opens. A search is initiated for devices. Wait until the relevant unpaired device appears.

Use the Softkey to confirm sharing on the relevant device. The vCard for the entry is sent (you will receive confirmation).

Perform the necessary steps on the destination device to save the vCard data. Detected devices are then deleted from the list.

Using a Bluetooth conference phone

You can connect a Bluetooth conference phone to your OpenScape CP600, which is approved for use with the OpenScape CP600. Ask your administrator about approved conference devices.

Connecting a Bluetooth conference phone

Below is an example of connecting and operating a conference phone.

Prerequisite: The Bluetooth function on your OpenScape CP600 is activated → page 128. The conference phone is ready for use but **switched off** (see conference device User Guide).

If nec. Press Main Menu key.

Open using the Softkey.

Open using the Softkey.

Enter and confirm the User password.

Open using the Softkey.

Open using the Softkey.

Finding and pairing the Bluetooth conference phone

Hold down the **trim** key on the conference phone for two seconds until the blue display light flashes (Warning: the device must be switched off first – observe the instructions in the operating instructions of the conference equipment).

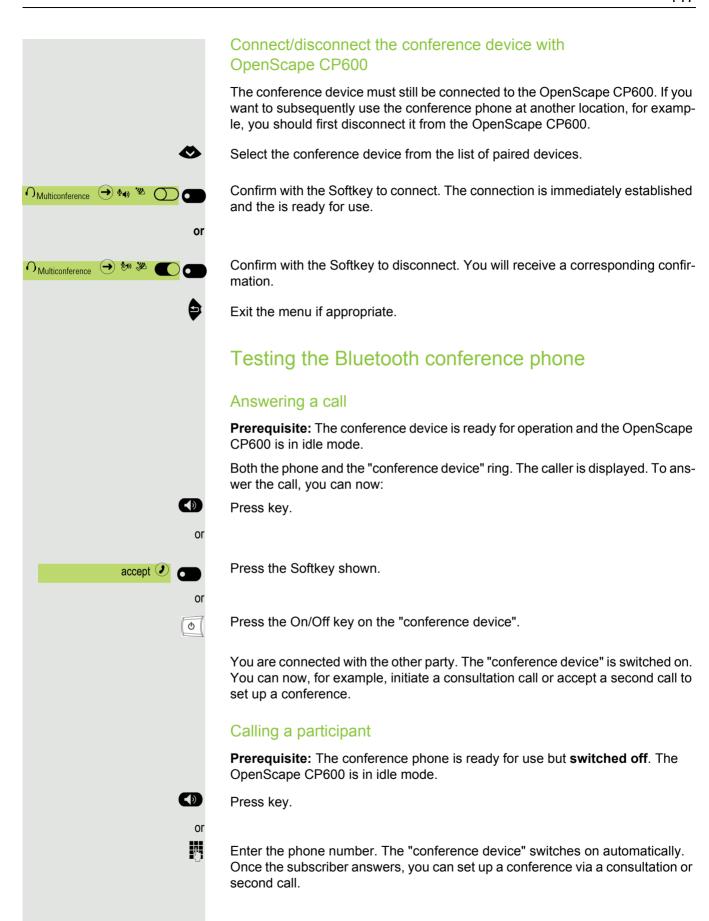

Start the search for new devices with the Softkey. If nec. Start or adjust the paging function on the Bluetooth device.

Located devices are displayed. Repeat the search if appropriate with the Softkey.

Select the conference phone and press Softkey to open.

Pairing PIN for the conference equipment is requested.

Enter the pairing PIN ("0000") and confirm with the Softkey. Following successful pairing, the device is added to the list of paired devices. You hear a short confirmation tone from the conference device before it switches itself off again.

Using a Bluetooth device

You can control calls on the HFAG (hands-free audio gateway, e.g. mobile device) from your OpenScape CP 600 phone via Bluetooth.

Incoming HFAG call

Bluetooth status bar icon indicates an HFAG call.

For more information about how to proceed during incoming call, see "Receiving a call" \rightarrow Page 82.

Connected HFAG call

Bluetooth status bar icon indicates an HFAG call. The "End audio" button transfers the HFAG call audio from the OpenScape CP 600 to the HFAG.

The "Pull audio" button reroutes the audio stream from HFAG back to Open-Scape CP 600.

The "Move to mobile" button reroutes the audio stream from OpenScape CP 600 to the HFAG. Call is removed from the CP phone.

For more information about how to proceed during a call, see "During the call" → Page 102.

Outgoing HFAG call

Outgoing Call Dialling

Bluetooth status bar icon indicates an HFAG call.

Failure in dialling the outgoing HFAG call is indicated by the HFAG by one of the unsolicited extended response indication codes:

- NO CARRIER
- BUSY
- NO ANSWER
- DELAYED
- BLACKLISTED

Outgoing Call Ringing

HFAG call states in Main Menu Screen

Incoming HFAG call in the Main menu screen

The icon with the Bluetooth rune index indicates incoming HFAG call.

The icon with the Bluetooth rune index indicates connected HFAG call.

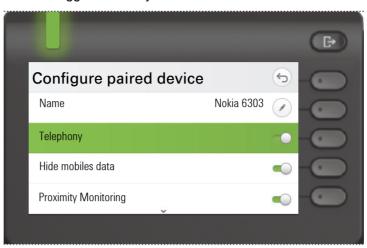

HFAG call states in Conversations Screen

Connected HFAG calls are displayed in the conversation list. The HFAG call is distinguished from native calls by a special call state icon under the user name.

Anonymous mode

As a User, you are able to configure "Hide mobiles data". In this mode, no celler information will be presented, only presence and state of the call. All Bluetooth calls are logged to Anonymous conversation.

Using Bluetooth keyboard

Bluetooth keyboard can be paired with phone in User section under "Paired devices". After successful pairing keyboard appears in paired devices list.

There can be only one Keyboard device connected at the same time.

Special "keyboard" icon should be shown in status bar when Bluetooth keyboard is connected.

Parallel usage of Bluetooth keyboard and phone keypad is possible. Phone interface differentiates between events from Bluetooth keyboard and phone's keypad and shows speller and its settings only for phone's keypad.

Supported languages

- German, English, French, Italian and Spanish
- · For other languages, English layout will be used.

Navigation keys

Navigation keys work as following:

- Direction keys → should work as direction keys on 5-way navigator
- Enter \rightarrow OK
- Backspace → Back
- Esc → Go to landing screen
- Volume keys → Volume keys
- Mute key → Microphone mute
- Page down key → moves highlight down by the number of screen lines. Since this is only CP600 that is equivalent to 5 down nav. key presses
- Page Up key → equivalent to 5 up navigation key presses
- Home key → equivalent to long press Up navigation key presses
- End key → equivalent to long press Down navigation key presses

When phone is in Idle state, pressing number keys on keyboard initiate dialing in the same way as number keys on keypad do.

When phone is in call, pressing number keys on keyboard sends DTMF tones in the same way as number keys on keypad do.

Keyboard pairing modes

Keyboard initiates pairing and sets the pairing mode. The pairing mode differs depending on the keyboard type and manufacturer.

There are three possible pairing modes supported:

- Simple pairing (passkey entry) if keyboard initiates "simple pairing", PIN is generated by keyboard and CP600 shows this PIN on display and waits until the number is typed on the keyboard.
- Legacy (numeric comparison) if keyboard initiates "legacy" pairing, CP600 generates random number, displays it to user and waits until the number is rewritten on the keyboard.
- Just works if keyboard initiates "just works" pairing, CP600 displays Bluetooth keyboard pairing request and waits until it is confirmed.

Using Bluetooth "Remote button"

Bluetooth Remote button can be paired with the phone in User section under "Paired devices". After successful pairing, the Remote button is shown with a keyboard profile in paired devices list.

The Remote button device behaves as Bluetooth keyboard device until the user configures it to be a Remote button. When Remote button is enabled then the device appears, and behaves, as a Bluetooth Remote button device.

By pressing the Remote button, you can trigger certain action (e.g. under the Function keys or on OpenScape Key Module 600E) configured by you on your OpenScape CP 600. You can choose from the following keys:

- · Function keys s.
- · Key Module keys

Please note that the shifted level function of an Function keys cannot be selected.

Using the Configuration option leads to the Configuration Menu for that device. The device name is "Selfie" in the screens shown.

In this Configuration Menu the device can be identified as a Bluetooth Remote button device via the "Remote button" status. The action of the entry allows the Bluetooth Remote button device to be configured.

Selecting the "Remote button" menu above leads to the screen that allows this Bluetooth Remote button device (called Selfie) to be configured. The Function keys s are identified by their key label in the "Select key" screen.

Selecting the "Select key" menu above leads to the screen that allows the Function keys for this Bluetooth Remote button device to be configured.

Only a Function keys with a function configured can be selected to be triggered by the Bluetooth Remote button click. All unallocated keys are hidden.

Function keys s from any attached Key Module are potentially available to be selected. No shifted level keys can be selected.

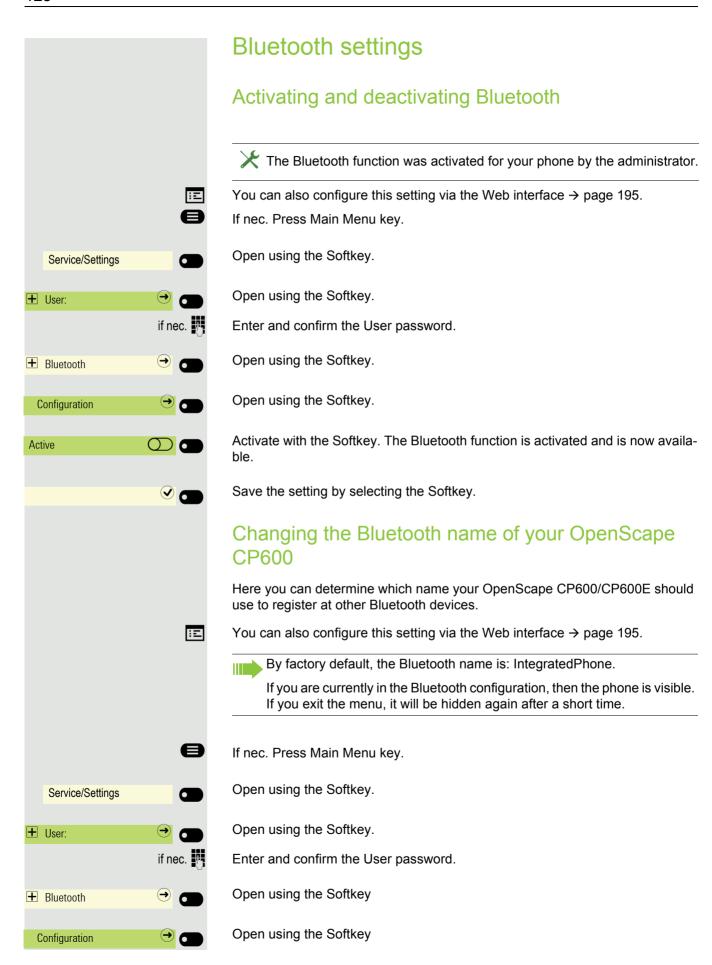

The "Configure remote button" screen now shows the label for the Function keys that has been configured to be triggered by this Bluetooth Remote button device.

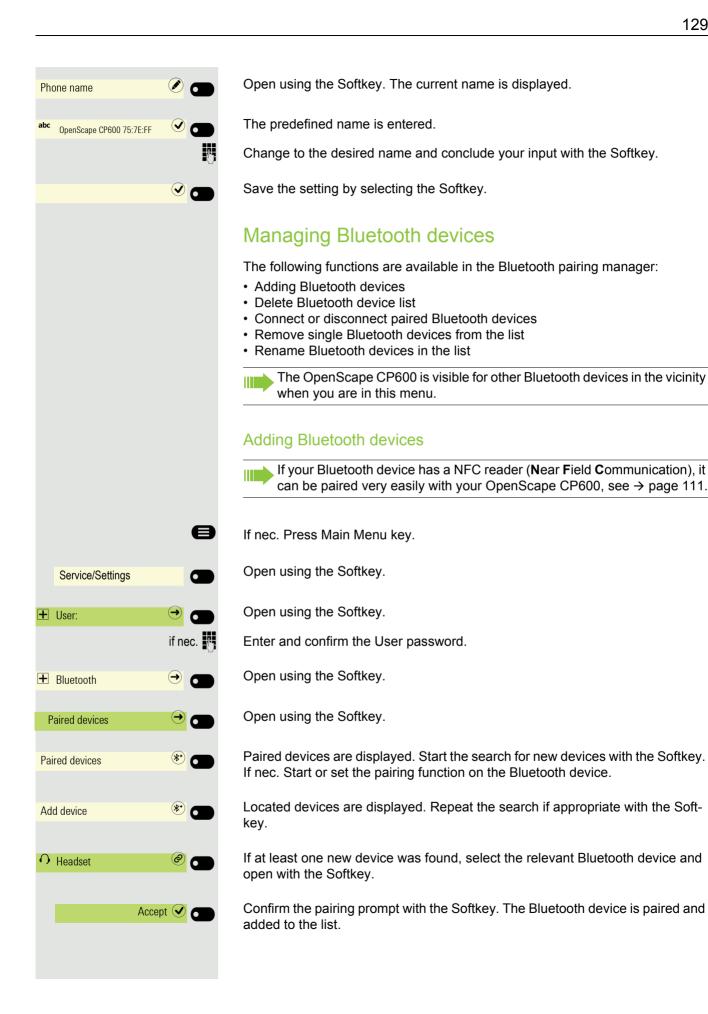

Trigger on reconnect

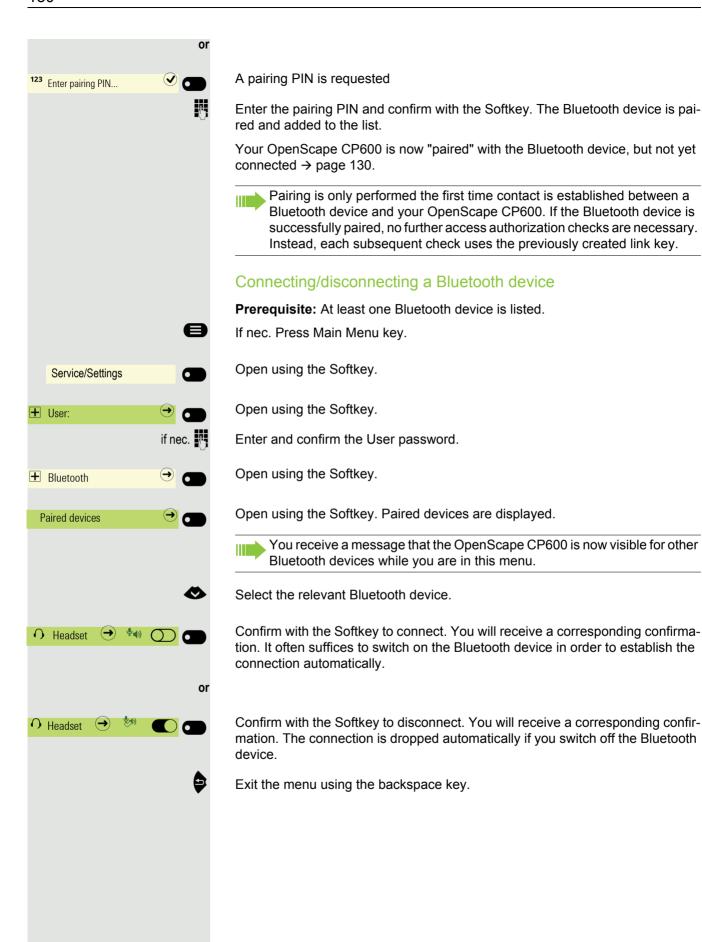

If the Bluetooth Remote button is disconnected (e.g. the device is in energy saving mode) and you want to reconnect it, the following may happen based on the settings of the functionality "Trigger on reconnect".

- If enabled, the remote button will connect and trigger the configured Function key at the same time. You need to press the Remote button only once.
- If disabled, you need to press the Remote button twice. First time it will reconnect and second it will trigger the configured Function key.

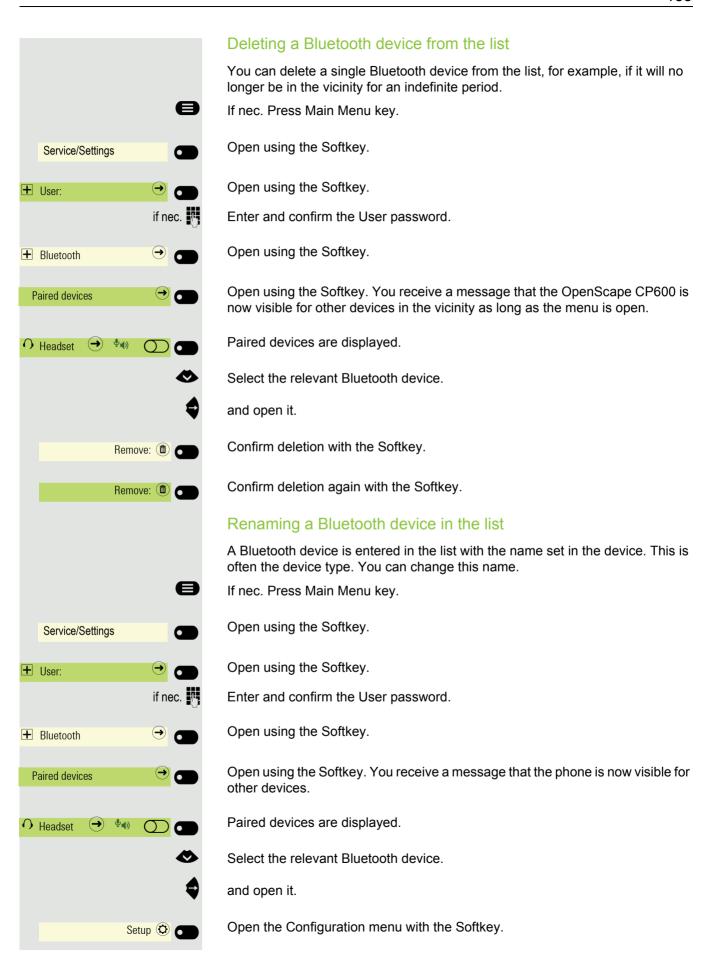

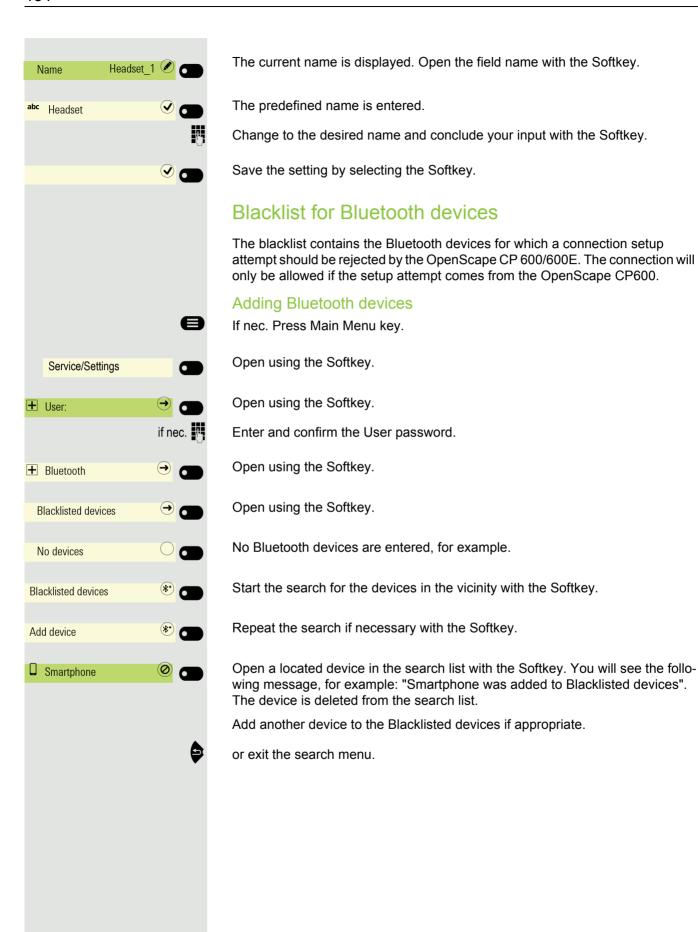

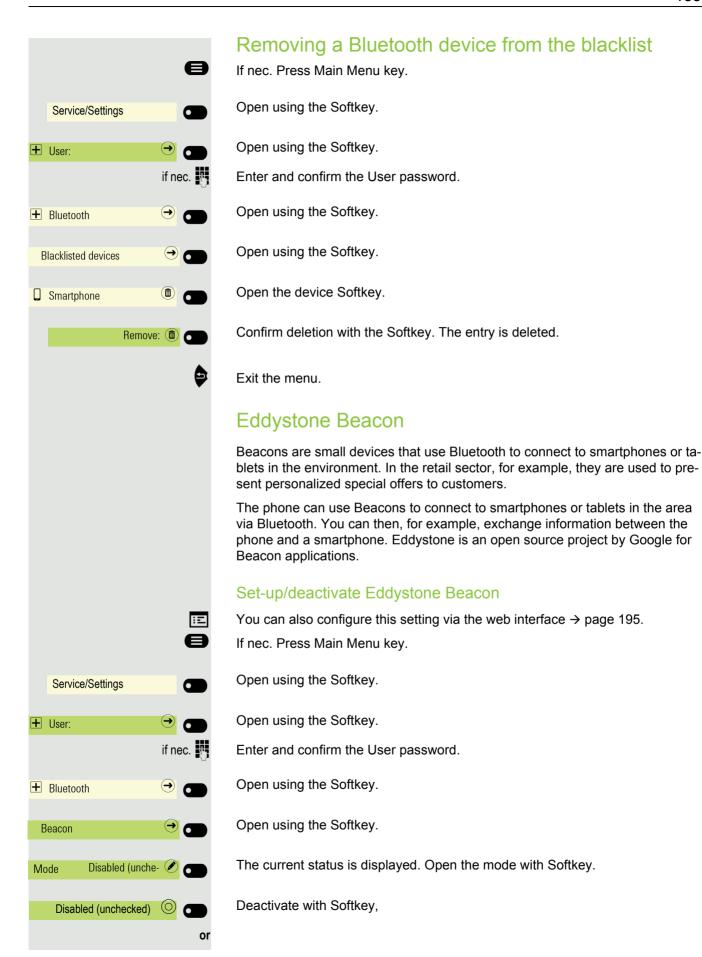

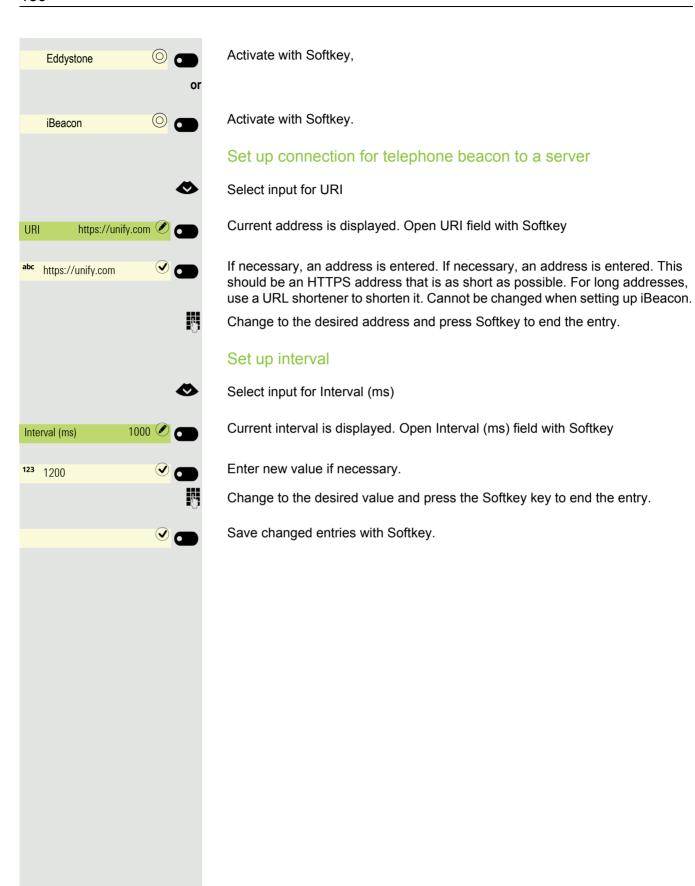

Making calls in the team/manager/ secretary's office

When configured (ask relevant Administrator), you will belong to a team of members with multiple lines. Line/trunk keys (MULAP keys) → page 138 are available on your phone.

Trunks

A distinction is made here between primary, secondary, and phantom lines. Each of these line types can be used on a private or shared basis → page 137.

Primary line

All multi-line telephones have a primary line. This line can be reached in the usual manner via your public phone number. Incoming calls to your number are signaled on this line.

Secondary line

A secondary line on your phone is used as a primary line by another participant. Your primary line, which is configured on another telephone, simultaneously functions as the secondary line on that telephone.

Private line

A line that is used by a single telephone. This line cannot be used as a secondary line by another telephone.

Shared line

A line that is configured on multiple telephones. The line status is displayed for all telephones that share this line. If, for example, a shared line is being used by a telephone, a status message indicating that this line is busy is displayed on all other telephones sharing the line.

Direct call line

A line with a direct connection to another telephone. You can see the status of the line from the LED.

Line Seizure

The line assignment is dependent on the configuration (ask your responsible Administrator). If the automatic line seizure is configured, a line is automatically assigned upon lifting the handset or pressing the loudspeaker key.

Ln

Ln

Line/trunk keys

On a MultiLine phone the freely programmable keys function as line/trunk keys. Every key configured as a "line/trunk key" (key marking: Ln: X) corresponds to a line.

As a team member, you yourself can assign the following functions to keys → page 76:

- · Direct station selection (DSS)
- Group call on/off (not for main phone in the management/administration team)
- Ring transfer on/off (only in management/administration team)

Otherwise, you can assign a key with the "MULAP forwarding" (call forwarding) function for each line.

LED displays for line/trunk keys

LED		Meaning
	Off	- the line is in idle mode.
<u>\\\</u>	flashes ¹	Incoming call on the line"Hold reminder" is activatedthe line is on "Hold".
•	On	- the line is busy.

Flashing keys are represented by this icon in this manual, without reference to the frequency of flashes. The flashing interval represents different statuses, which are described in detail in the corresponding sections of the manual.

Accepting calls on the line/trunk keys

Requirement: Your phone rings and/or the line/trunk key flashes quickly.

Lift the handset.

With handset on hook: Speakerphone mode.

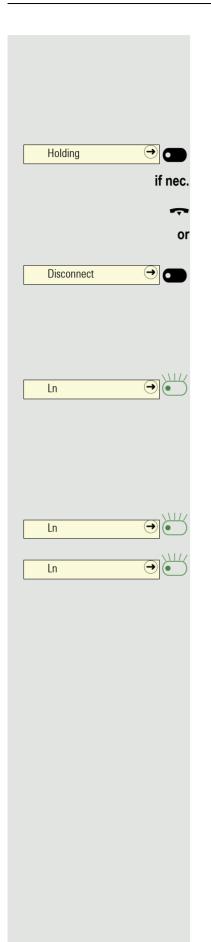

Dialing with line/trunk keys

Press the free line/trunk key of the OpenScape Key Module 600E or via which you wish to establish your connection.

Dial phone number.

If the participant answers: Lift the handset.

With handset on hook: Speakerphone mode.

Hold a call on a line/trunk key and then accept again

Prerequisite: You are conducting a call via one of your group's lines.

Holding

Press the key if it is set up.

Replace the handset.

Press the key if it is set up.

As required per configuration (ask relevant Administrator), so that other team members can also accept the call on hold.

Accept again

Press the slowly flashing line/trunk key.

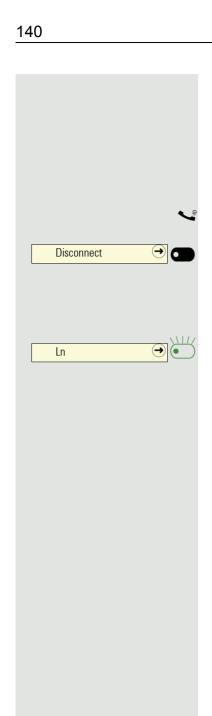

Alternately phone on several lines

Prerequisite: You are conducting a call via one of your group's lines. Another line key flashes.

Press the flashing line key. The first call partner is waiting on the other line.

Press the slowly flashing line/trunk key. Second call partner waiting.

You can change as often as you like. Press the slowly flashing line key.

MULAP conference release

If authorized (ask relevant Administrator), you can assign the "MULAP conference Released by:" function to a key on your phone → page 76.

Setting up a conference via the menu is no longer required in this case. Your team partner simply has to press the flashing line/trunk key for your line on his/her phone and can then immediately take part in the conference.

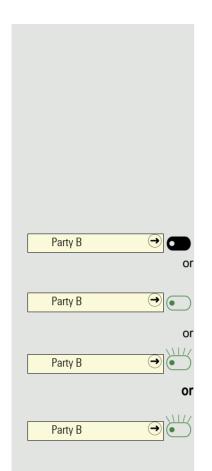

You are conducting a call.

Press key. LED lights up.

Up to 3 team members can now enter the conference.

Prerequisite: The line on which you are speaking is configured as a line/trunk key on the other phone.

Press the flashing line key.

Direct station selection keys

Each team member has a DDS key for every other team member.

As a result, each team member is directly accessible to the other team members by the simple press of a key.

Unlike a name key, a DSS key signals to you the status of the other extension via the LED.

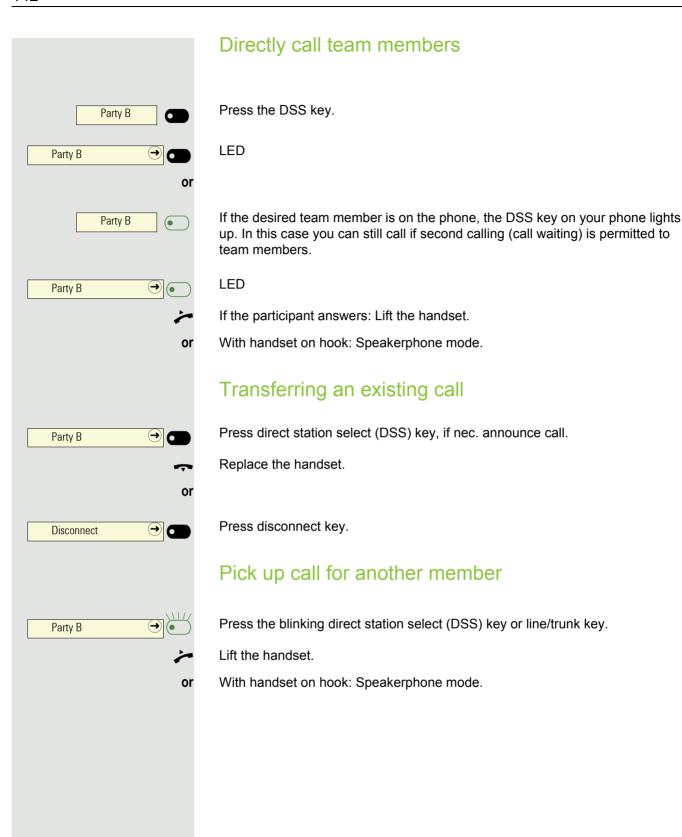

Understanding DSS key LED notifications

LED on the DSS key is dark – no team member is phoning.

LED on the DSS key lights up - a team member is phoning or has activated DND.

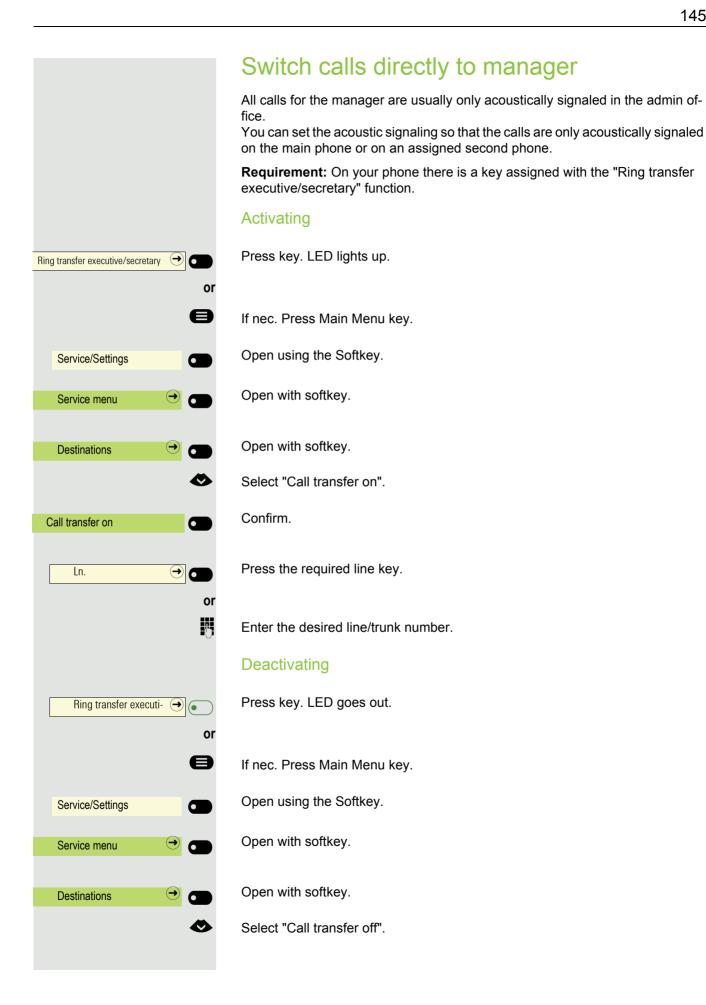

LED on the DSS key flashes quickly – I am being called, please accept.

LED on the DSS key flashes **slowly** – another team member is being called and has not yet answered.

Forwarding calls for lines You can immediately forward internal and/or external calls to your lines to different internal or external phones (destinations). If you activate call forwarding for a line, this shall apply to all line keys of your group for this line. If nec. Press Main Menu key. Open using the Softkey. Service/Settings Open with softkey. Service menu Open with softkey. Destinations Select "Frwrdng, MULAP on". Confirm. Frwrdng. MULAP on If available, press the key. (You have incompletely saved the "Fwd. MULAP" key Fwd. MULAP \rightarrow without type and destination of the forwarding \rightarrow page 76). Press the required line key. Ln. \rightarrow or Enter and confirm the desired line/trunk number. Confirm. 1=all calls or Select "2=only external calls". Confirm the option shown 2=only external calls or Select "3=only internal calls". Confirm. 3=only internal calls Enter the destination number. Confirm. save or If available, press the key. (You have also saved the type and destination of the Fwd. MULAP Θ forwarding to the "Fwd. MULAP" key, → page 76.)

Confirm.

Press the required line key.

Enter the desired line/trunk number.

Group calls / hunt group

If configured (ask relevant Administrator), your connection is part of a team. The team consists of internal phone connections that can make use of particular functions.

Group call on/off

If your phone is connected to a system network via LAN, pay attention to specific features → page 177!

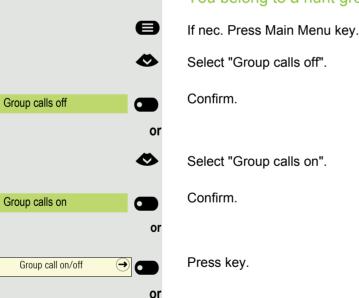

If this has been configured (ask relevant Administrator), you will belong to one or more groups of members who can be reached via a hunt group or group call phone number.

Calls are signaled on all telephones in the group either in succession (=hunt group) or simultaneously (=group call), until a member of the group answers the call.

Every party in the group can also remain available under his/her own phone number.

You can activate and deactivate the call for the hunt group, group call, or for the individual lines of a group.

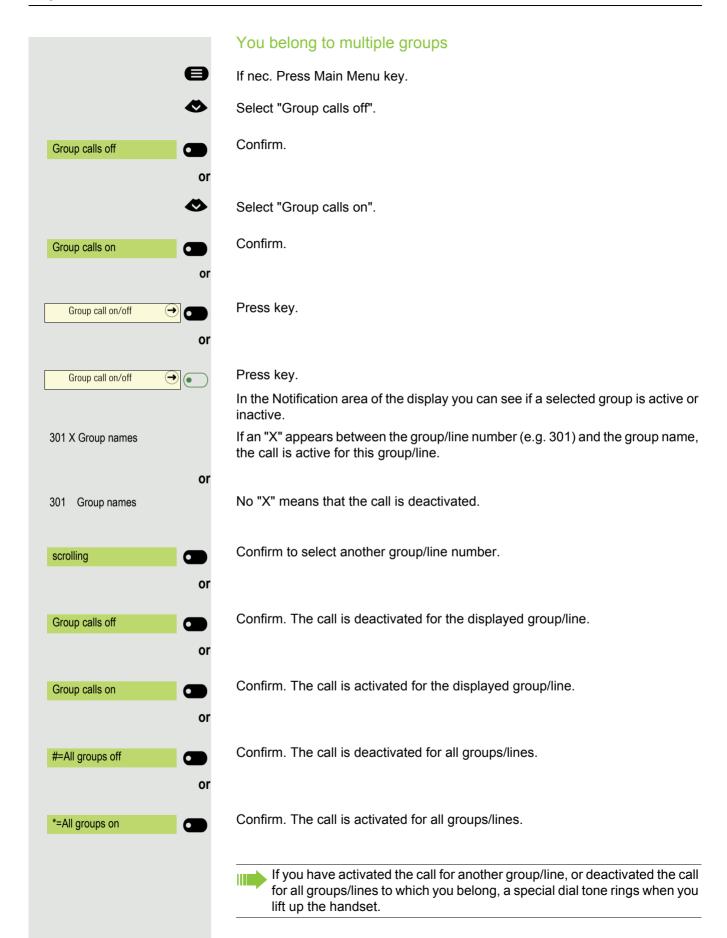

You belong to a hunt group or group call group

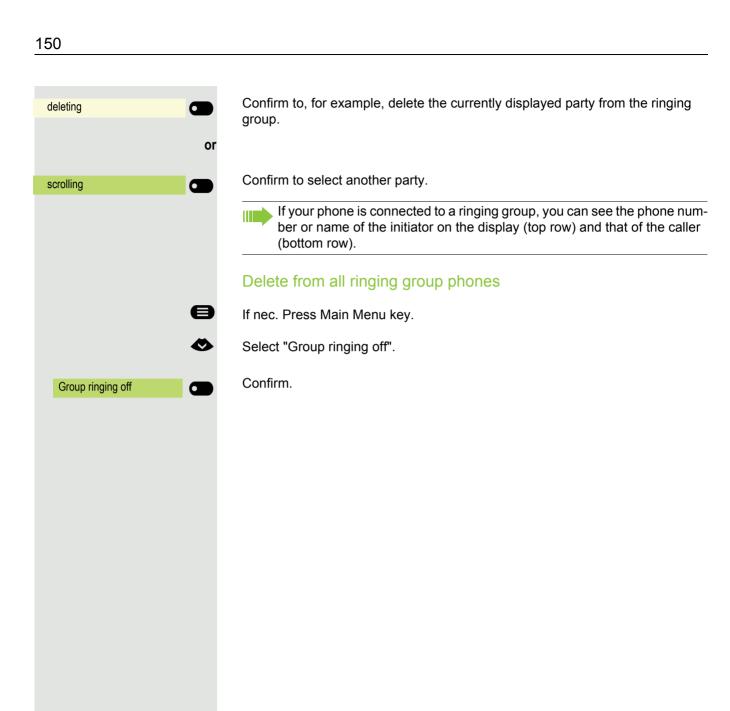

()

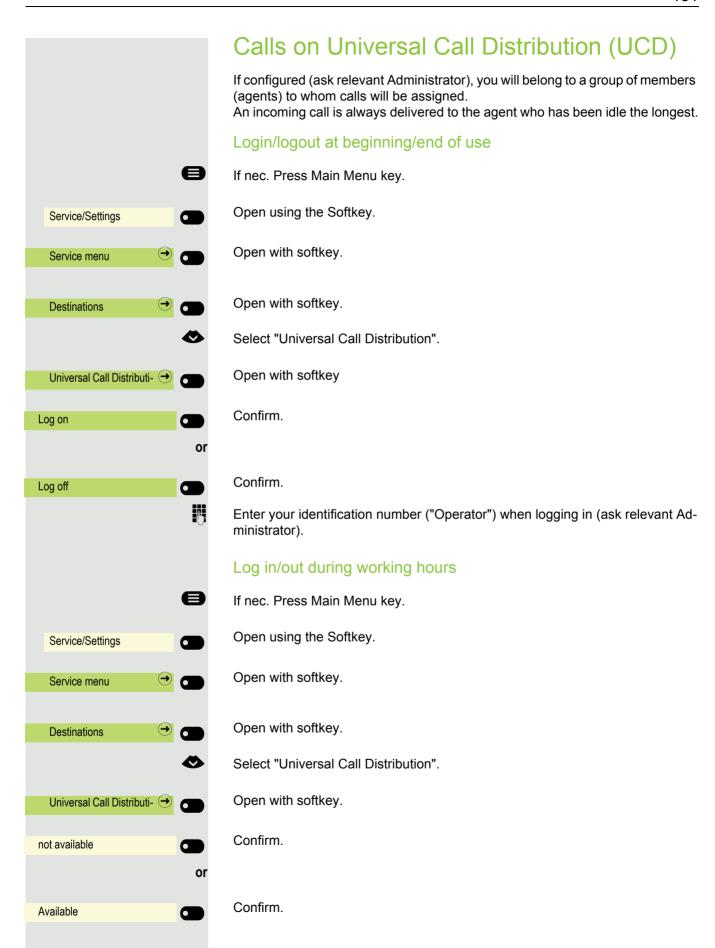

Group call on/off

Press key.

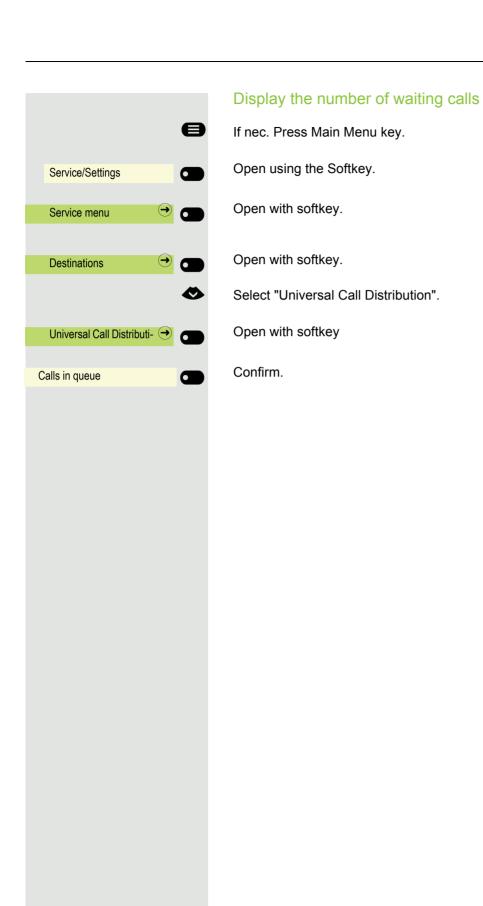

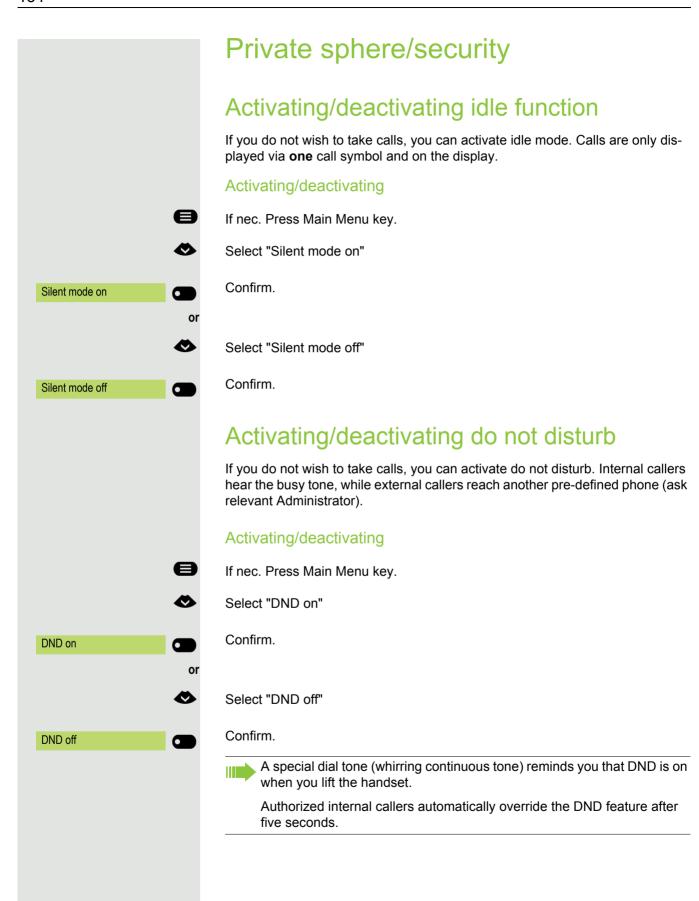

Accepting calls for a colleague in the team You can pick up calls for phones within a team (Call pickup group; ask relevant Administrator), on your phone; also during a call. In contrast to the direct station select function, you do not need any configured direct station select (DSS) to do this, see Page 141. Prerequisite: Your phone rings briefly. In the top row of the display, "Call with:" appears, with the phone number or name of the initiator and, on the bottom row, the phone number of name of the caller. Confirm to pick up the call for your colleagues. Call pickup in pickup Connecting call You can have calls to your handset signaled acoustically on up to five other telephones. The call is received by the person who answers the call first. If your phone is connected to a system network via LAN, pay attention to specific features → page 180! Saving/displaying/deleting phone for group ringing If nec. Press Main Menu key. Open using the Softkey. Service/Settings Open with softkey. Service menu Open with softkey. **Destinations** Select "Group ringing". Confirm. Group ringing Confirm. Connect TIn Enter the internal phone number of the party to be added. The party name is displayed. Confirm. if nec. Confirm to add further parties. connect further TIn or Confirm to display or delete parties. display/delete

Caller ID suppression

You can stop your phone number or name from appearing on the display of those you phone externally. This remains active until you reverse it.

Activating

If nec. Press Main Menu key.

Select "Block phone number"

Block phone number Confirm.

Deactivating

If nec. Press Main Menu key.

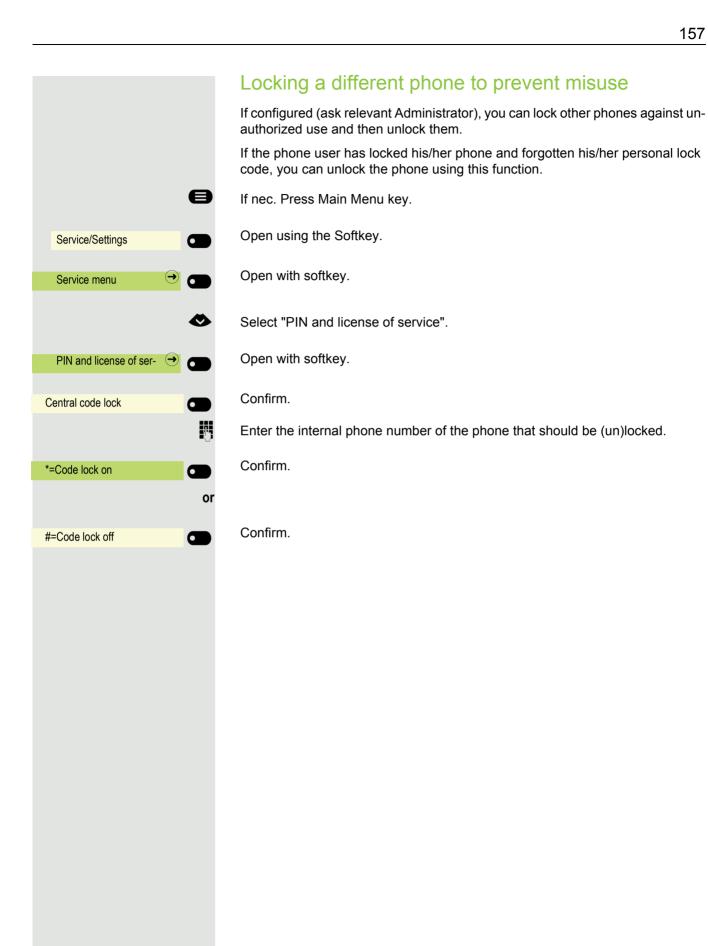

Select "Forward phone number"

Forward phone number Confirm.

X

The relevant Administrator can activate/deactivate phone number suppression for all phones.

Security Protecting the phone from misuse You can stop unauthorized parties from using certain functions on your phone while you are away. E.g. the dialing of external phone numbers and access to your mailbox can be prevented. Ask your Administrator which functions are lo-Locking the phone If nec. Press Main Menu key. Select "Lock phone" Confirm. The Functions dialog opens. Lock phone Enter code (lock code) → page 158. In locked mode a special dial tone rings when you lift the handset. You can dial internal numbers as usual. Your phone can also be (un)locked from an authorized station → page 157. Unlocking the phone If nec. Press Main Menu key. Select "Open phone" Confirm. The Functions dialog opens. Open phone Enter code (lock code) → page 158.

Saving personal lock code For the functions Locking the phone to prevent misuse → page 156 Using a different phone in the same way as your own → page 168 in order to assign, you must enter a personal code which you can define yourself. If nec. Press Main Menu key. Open using the Softkey. Service/Settings Open with softkey Service menu Select "PIN and license of service". Open with softkey. PIN and license of ser-Confirm. Change lock code Request for current code. previous code: Enter current 5-digit code. If you have still not assigned a code, on first input use "00000". Request for new code. new code: Enter the new code. Request for repetition of the new code Please repeat: Re-enter the new code. If you have forgotten your code, contact the relevant Administrator for help. Your PIN can be reset to "00000".

User password

Your User password protects your user settings. You can also use the User password to fully lock your telephone → page 161.

The administrator may have configured the following settings:

- The password is deactivated: You do not have the option of configuring user settings. The message "Password is deactivated" is displayed.
- The password is temporarily locked: You do not have the option of configuring user settings at this time. The message "Password is blocked" is displayed.
- After initially logging on to a user area, you may have to replace the default password with a new password.
- A password can have a predefined period of validity: You will have to create a
 new password when the period ends. The message "Change password (x
 days remaining)" will alert you to this at the appropriate time. The message
 "Password has expired" appears when the validity period has expired. Confirm
 "Change password" and change the password as described in this section.
- If you repeatedly enter the wrong password (2 to 5 times), additional attempts are blocked. You can make another attempt after a predefined time.
- It is possible that you will not be able to re-use a previously used password for a period of time, which means you have to create another "new password".
- Your administrator can tell you about the rules for what and how many characters can or must be used in the password.

You can also configure this setting via the Web interface → page 195.

If nec. Press Main Menu key.

Open using the Softkey

Open using the Softkey.

Enter and confirm the User password.

Select "Changing the user password".

Open using the Softkey

Open using the Softkey

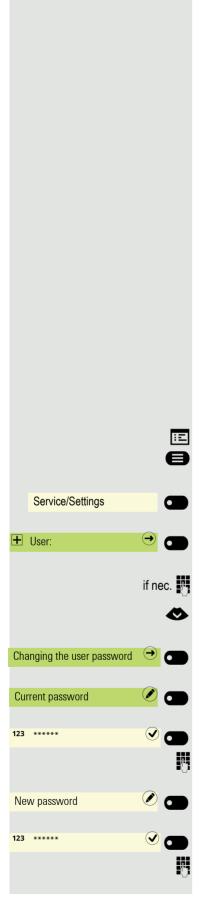

The input field is displayed.

Enter the current password and conclude your input with the Softkey.

Open using the Softkey

The input field is displayed.

Enter the new password (at least 6 characters) and conclude your input with the Softkey.

Save your input. The password is now deactivated.

Locking the phone

To protect the phone against unauthorized access, you can lock the phone so that nobody can make calls or change settings without knowing the User password.

You can only lock the phone if you set a User password → page 159. The password for this must **not** be the default setting "000000". Check, if necessary, whether the telephone lock function has been activated for you by the administrator.

Activating the phone lock

Hold down the key shown until the "Lock phone" message appears.

Press the Softkey to activate the lock.

Dial emergency number

If an emergency number is entered on the phone by the administrator, Emergency call appears on the display for selection when you have activated the lock. You can also enter the emergency number via the dial pad.

Press the Softkey . The saved emergency number is dialed.

The number will be dialed automatically without pressing the button. An empty option on the screen will be shown, therefore if you accidentally press the button, the call will not be canceled.

Unlocking the phone

The display shows: Phone locked.

Press the Softkey.

Enter and confirm the User password, the lock is released if the password was correct.

Press the Softkey.

Enter the administrator password if you do not know the User password. Confirm with the Softkey. The phone is unlocked if the password is correct.

If the telephone is locked, an emergency number entered by the administrator can be input using the dial pad or dialed with the Emergency call option. If the phone is locked, selected dialing keys (see → page 89) cannot be used. This also applies if the emergency number is saved on this key.

Other settings and functions

Connection costs

Display connection costs for your phone (not for U.S.)

For the current call:

If the costs are to be displayed continuously during an outgoing call, this function must be requested from the relevant Administrator of the network operator.

The display of the call costs must be applied by the network operator and configured by the relevant Administrator.

Depending on the setting, call costs are displayed during or after the call. Depending on the network provider, no-charge external calls will also be displayed. On the display, "no charge" appears before or during the call. If no cost display is set up, the phone number dialed and/or the call length appear in the display.

If a call is transferred, the costs are assigned to the phone to which the call was transferred.

For all calls and for the last call held

First the call charges for the last charged call are displayed. After five seconds the connection charges incurred (total) are displayed.

If nec. Press Main Menu key.

Open using the Softkey.

Open with softkey.

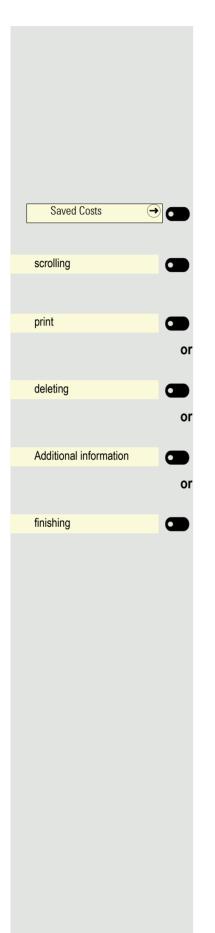

Select "more features".

Open with softkey.

Confirm. The costs are displayed.

Query connection costs for another phone (not for U.S.)

If configured (ask relevant Administrator), you can also display the fee-based calls from other phones and print these too.

Requirement: You have programmed a key with the "Check costs" function → page 76.

If the LED lights up, a chargeable call has been made since the last query.

Press key. The fee-based calls are displayed.

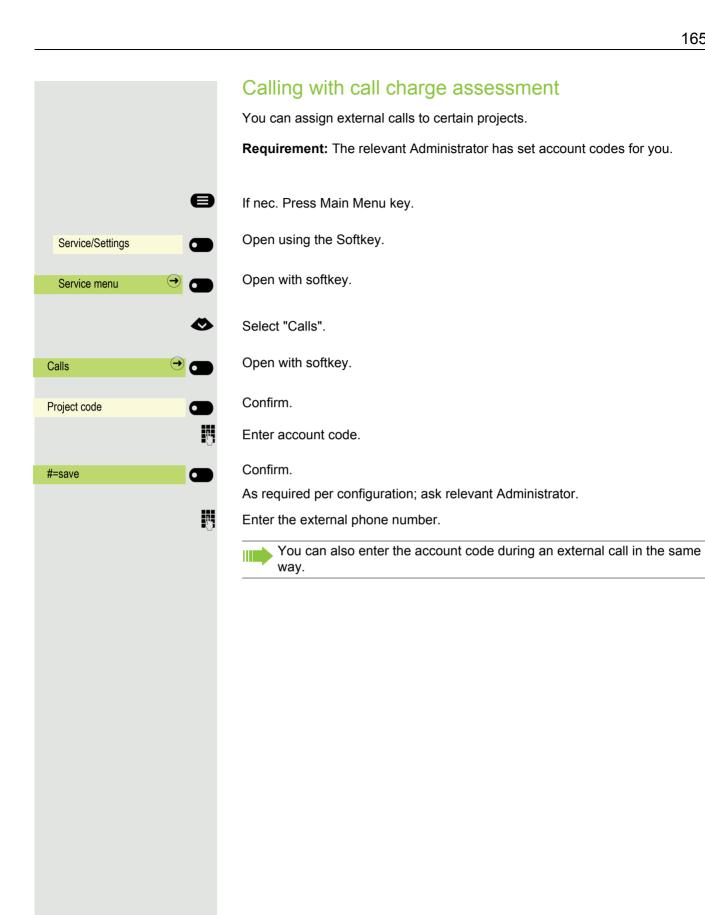

Also confirm to display further fee-based connections.

Confirm with softkey.

Confirm with softkey.

Open with softkey.

Confirm with softkey.

Appointment function You can arrange for the communications system to remind you of an appointment → page 167. For this to happen, you need to save the desired times of the calls. This is possible for a period of up to 24 hours in advance or for a daily repeating appointment. Save appointment If nec. Press Main Menu key. Open using the Softkey. Service/Settings Open with softkey. Service menu Select "Timed reminder on". Confirm. Timed reminder on Enter a 4-figure time, e.g. 0905 for 9.05 a.m. or 1430 for 2.30 p.m. if nec. 2 ABC or 7 PORS With the "American" language setting (setting → page 57) you can enter Code 2 for "a.m." or 7 for "p.m." (default = "a.m."). Confirm. once-off or Confirm. daily Confirm. save Deleting/querying a saved appointment If nec. Press Main Menu key. Open using the Softkey. Service/Settings Open with softkey. Service menu Select "Timed reminder off". Confirm. Timed reminder off Confirm. deleting Confirm. finishing

Appointment at 1200

Using timed reminders

Requirement: You have saved an appointment → page 166. The saved time arrives.

The phone rings. The appointment time is displayed.

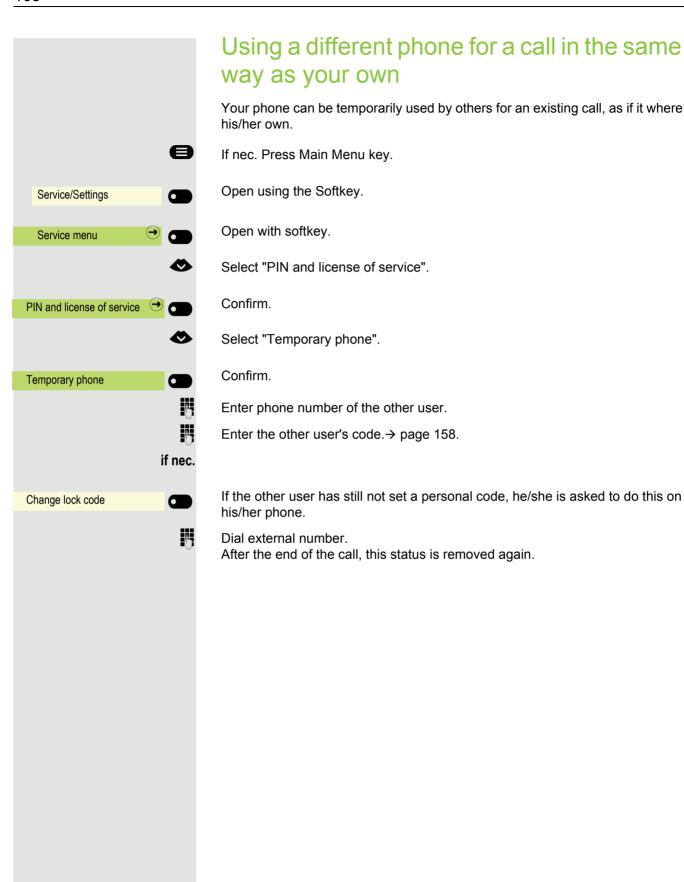

Press key twice.

Lift the handset and put it back down.

If you do not accept the arranged call, this will be repeated five times before the appointment is deleted.

Using a mobile connection to a different phone

You can configure a mobile connection that your relevant technician has set up for you on a OpenScape CP 600/600E prepared for it on the system. The original connection to the "guest phone" is deactivated. The mobile connection remains available for as long as you are logged into the "guest phone".

Most of the functions and features (phone number, key assignment, authorizations) of your phone are available to you following login.

Mobility variants

There are two variants available for mobility:

- Basic
- Data privacy

Configuration is carried out by the technician.

Basic

When "logging on" to the "guest telephone", the following settings are transmitted from the mobile connection:

- · Key assignment
- Authorizations
- Call forwarding

In addition, outstanding messages or texts are signaled.

"Guest phone" conversations are visible and can be used.

The conversations you have made in the meantime are automatically deleted from the phone following logging off.

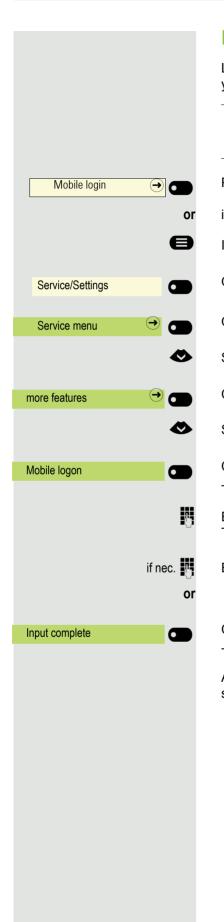

Data privacy

When "logging on" to the "guest telephone", the following settings are transmitted from the mobile connection:

- · Key assignment
- · Call forwarding
- Authorizations (apart from user password)

In addition, outstanding messages or texts are signaled. The user password is not transferred, so you have to create a new password on the phone.

An empty conversation list is available to you which will be automatically deleted again after logging off from this phone.

Logging on to the "guest phone"

Log on to mobile connection to "guest phone". The phone thereby behaves like your own as regards cost allocation, key programming, call forwarding etc.

Requirement: A mobile connection with your own number and a password has been set up for you (ask relevant Administrator). The "Mobile login" key is configured on the OpenScape CP600/CP600E if nec.

Press the "Mobile login" key.

if no key is configured,

If nec. Press Main Menu key.

Open using the Softkey.

Open with softkey.

Select "more features".

Confirm.

Select "Mobile logon".

Confirm.

The "New phone no.:" request is displayed

Enter the "mobile phone number".

The request "Code for **nnn**" is displayed (e.g. 834):

Enter the code word and confirm it.

Confirm.

The login procedure starts.

After correct login you will see your mobile phone number on the left of the screen.

Mobile login or Service/Settings Service menu more features Mobile logoff

Transfer connection to next phone

If you want to transfer your connection from the first "guest phone" to a second "guest phone", log in to the second "guest phone" as normal (see → page 170).

If you log in to another phone with your PIN number, without first logging out of the other phone, logout will take place automatically.

Logging off from the "guest phone"

If you no longer require a connection to the "guest phone", and/or if you want to change to another phone, log off the "guest phone".

Press the "Mobile login" key.

if no key is configured,

If nec. Press Main Menu key.

Open using the Softkey.

Open with softkey.

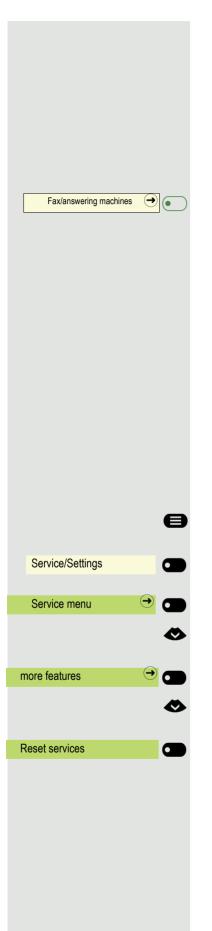

Select "more features".

Confirm.

Select "Mobile logoff".

Confirm. The logoff procedure starts.

The "guest phone" is now once more available with its original phone number, features, and functions. Any call forwarding that may have been set up can be removed.

Incoming fax message/message on the answering machine

If a fax or answering machine is connected to your system, and you have assigned the "Fax/answering machines information." function to a free key → page 76, this key lights up when a fax or message arrives.

Switching signaling off

Press the illuminated key "Fax/answering machines information.". LED goes out.

Resetting services/functions (complete phone deletion)

There is a general reset procedure for set functions. The following functions are deleted, if activated:

- · Forwarding on
- · Response text on
- · Group ringing
- · Block phone number
- · Waiting tone off
- · DND on
- · Silent mode on
- · Display messages
- Callback requests

If nec. Press Main Menu key.

Open using the Softkey.

Open with softkey.

Select "more features".

Confirm.

Select "Reset services".

and confirm.

Activating functions for another phone If configured (ask relevant Administrator), you can activate or deactivate the following functions for other phones (assoc. Services): DND on/DND off, Code *97/#97 → page 154 • Forwarding on, Code *11, *12, *13/#1 → page 95 Lock phone/Open phone, Code *66/#66 → page 156 • Group ringing, Code *81/#81 → page 147 Response text on/Response text off, Code *69/#69 → page 93 Group calls on/Group calls off, Code *85/#85 → page 147 • Reset services, Code #0 → page 172 Night answer on/Night answer off, Code *44/#44 → page 179 Timed reminder on/Timed reminder off, Code *46/#46 → page 166 If nec. Press Main Menu key. Open using the Softkey. Service/Settings Open with softkey. Service menu Select "more features". Confirm. more features Select "assoc. Services". Confirm. assoc. Services Enter the internal phone number of the phone for which the function is to be activated. Enter code – e.g. *97 for DND on. Follow the user prompting on the display for any possible further input.

Using system functions externally DISA (Direct Inward System Access)

If configured (ask relevant Administrator), you can establish an outgoing external connection via your OpenScape Business both externally and as an internal party. Otherwise the following functions of your system can be activated and deactivated:

- Reset services, Code #0 → page 172
- Forwarding on/Forwarding off, Code *1/#1 → page 95
- Lock phone/Open phone, Code *66/#66 → page 156
- Change lock code, Code *93 → page 158
- Send message/Display messages, Code *68/#68 → page 91
- Response text on/Response text off, Code *69/#69 → page 93
- Group ringing/Group ringing off, Code *81/#81 → page 147
- Group calls on/Group calls off, Code *85/#85 → page 147
- Block phone number/Forward phone number, Code *86/#86 → page 155
- Waiting tone off/Waiting tone on, Code *87/#87 → page 72
- Door opener, Code *61 → page 85
- Door opener on/Door opener off, Code *89/#89 → page 73
- DND on/DND off, Code *97/#97 → page 154
- Silent mode on/Silent mode off, Code *98/#98 → page 154
- Select speed-dial number, Code *7 → page 90
- assoc. Services, Code *83 → page 173

Prerequisite: You have a phone with tone dialing (DTMF transmission) or you can switch your phone to tone dialing. The phone is not connected to OpenScape Business.

Wait for continuous tone (if nec. switch phone to tone dialing), then enter the internal phone number assigned to you and the associated personal locking code.

Enter code (only necessary if programmed in system).

Wait for dialing tone and enter code – e.g. *97 for DND on. If nec. make further entries, see also user guide for pulse/DTMF phones).

or

Dial external number.

Each time only one function or one working call may be carried out.

Following the successful activation of a function, the connection is immediately interrupted.

The connection is ended in an external call as soon as one of the call partners leaves.

Controlling connected computers/programs/ phone information service If configured (ask relevant Administrator), you can control, for example, hotel services or information systems with the computer connected to your telephone or its programs. Requirement: You have established a connection. If nec. Press Main Menu key. Select "Open phone" Confirm. You will now be prompted by the connected computer to input the data Telephone data service but you must, depending on the configuration (ask relevant Administrator) enter your input in one of two ways: Input in block mode: 0 + ... 9 wxyz Enter data. Confirm. Input complete Input in online mode: or The connected computer directly processes your input. Enter code. 0 + 9 wxyz Enter data.

Searching for people (not for U.S.)

If radio paging equipment (RPE) is switched on in your system (ask relevant Administrator), you can search for people via your pocket receiver. The pocket receiver signals the call request to the sought-after person. The sought-after person can go to the nearest phone and answer.

Searching for people

To ensure you can be searched for, you must have activated a ringing group \rightarrow page 149, call forwarding \rightarrow page 95 or alternative call forwarding (service engineer) to the internal party phone number of your RPS. A call request is then automatically signaled.

React to a search request

Lift the handset.

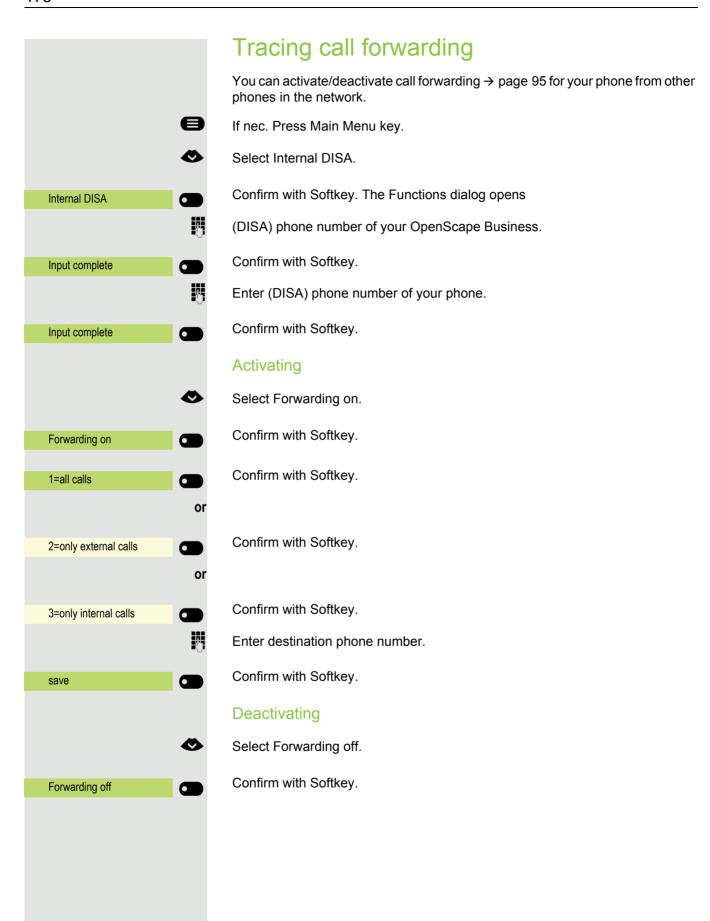

Enter code.

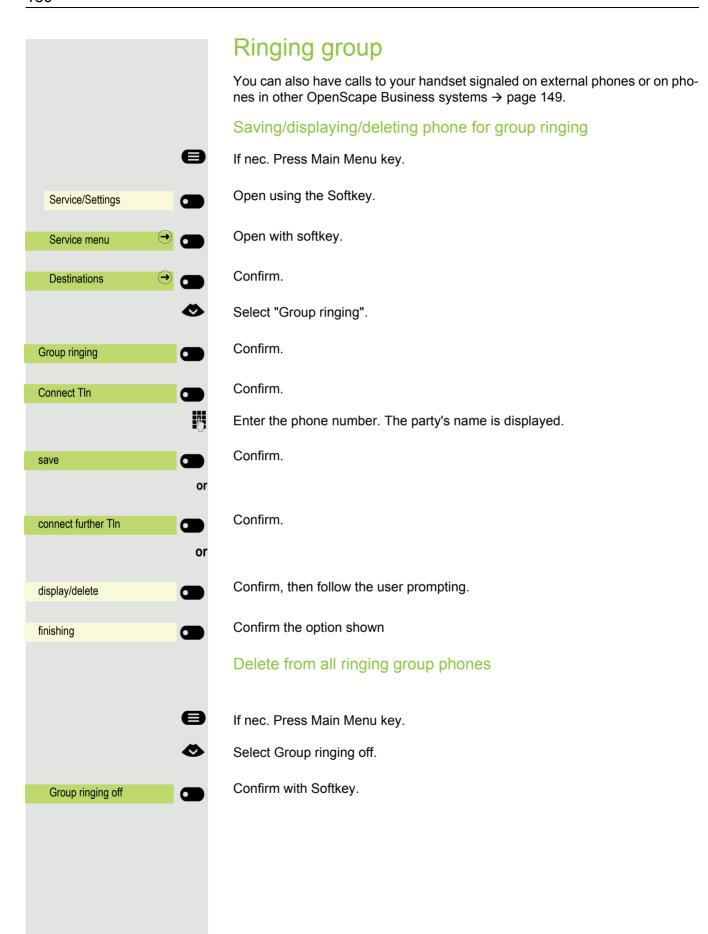

Enter your own phone number.

Special functions with networking If the phone is integrated into an environment in which several OpenScape Business are connected in the one network, you will carry out calls via the network. If this is the case, you must take note of the specific features of some functions. These are described below. Logging out from hunt group/group call **Prerequisite:** You belong to the hunt group/group call → page 147 of another OpenScape Business If nec. Press Main Menu key. Select Internal DISA. Confirm with Softkey. The Functions dialog opens Internal DISA Enter (DISA) phone number of the other OpenScape Business. Confirm with Softkey. Input complete 7-Enter (DISA) phone number of your phone. Confirm with Softkey. Input complete Confirm with Softkey. Group calls on or Confirm with Softkey. Group calls off You belong to multiple groups of another OpenScape Business 7--Enter group number for "targeted login/logout".

Using night service If authorized (ask relevant Administrator), you can also set phones on other OpenScape Business systems as night destinations. If nec. Press Main Menu key. Select Internal DISA. Confirm with Softkey. The Functions dialog opens Internal DISA P. Enter (DISA) phone number for the OpenScape Business to which the night destination phone is connected. Confirm with Softkey. Input complete Enter (DISA) phone number of the phone from which you are activating/deactivating night answering. Confirm with Softkey. Input complete Activating Select Night answer on. Confirm with Softkey. The Functions dialog opens. Night answer on H Enter destination number (= temporary night answer). Confirm with Softkey. save Deactivating Select Night answer off. Confirm with Softkey. Night answer off

Releasing the door If configured (ask relevant Administrator), you can also activate the door release → page 85 from other OpenScape Business systems. If nec. Press Main Menu key. Select Internal DISA. Confirm with Softkey. The Functions dialog opens Internal DISA Enter (DISA) phone number for the OpenScape Business to which the night destination phone is connected. Confirm with Softkey. Input complete Enter (DISA) phone number of the phone from which you are activating the door release. Confirm with Softkey. Input complete Confirm with Softkey. Door opener Enter door terminal phone number. Confirm with Softkey. Input complete

The display shows the current setting

Local phone settings

Set the volume here, for instance, for the loudspeaker, handset, or headset.

You can preset different volumes for the following microphones and signals in

You can also configure this setting via the Web interface → page 195.

Use the Softkey to increase the volume.

Set local ringtones

Select and configure call type

The ringer mode "local ringtone" is set. Not all of the following types have to be used:

- 1: Internal
- · 2: External
- 3: Notification call 2

Select the desired call type and configure it according to your requirements.

You can also configure this setting via the Web interface → page 195.

If nec. Press Main Menu key.

Open using the Softkey

Open using the Softkey.

Enter and confirm the User password.

Open using the Softkey.

Open using the Softkey.

Open with Softkey to e.g. execute settings for the internal ringtone.

Open using the Softkey.

Confirm with the Softkey to e.g. select this tone file.

Save setting.

If you have selected the "Pattern" instead of a ringer file, you can still set the values for "Sample melody" and "Sample sequence".

Service/Settings + User: if nec. + Ringer Ringtone mode HiPath (*) Mode Local ringtone

Ringtone mode

With both Ringtone mode options

- HiPath
- · Local ringtone

determine who generates the ringer on the phone. With the "HiPath" setting the system emits the ringtone type and the related ringtone, which you can adjust later \rightarrow page 182.

If "local ringer" is selected, the phone sends the ringer type and the you determine which ringer should ring with the respective ringer type in the "local ringer" menu yourself → page 183.

You can also configure this setting via the Web interface \rightarrow page 195.

If nec. Press Main Menu key.

Open using the Softkey

Open using the Softkey.

Enter and confirm the User password.

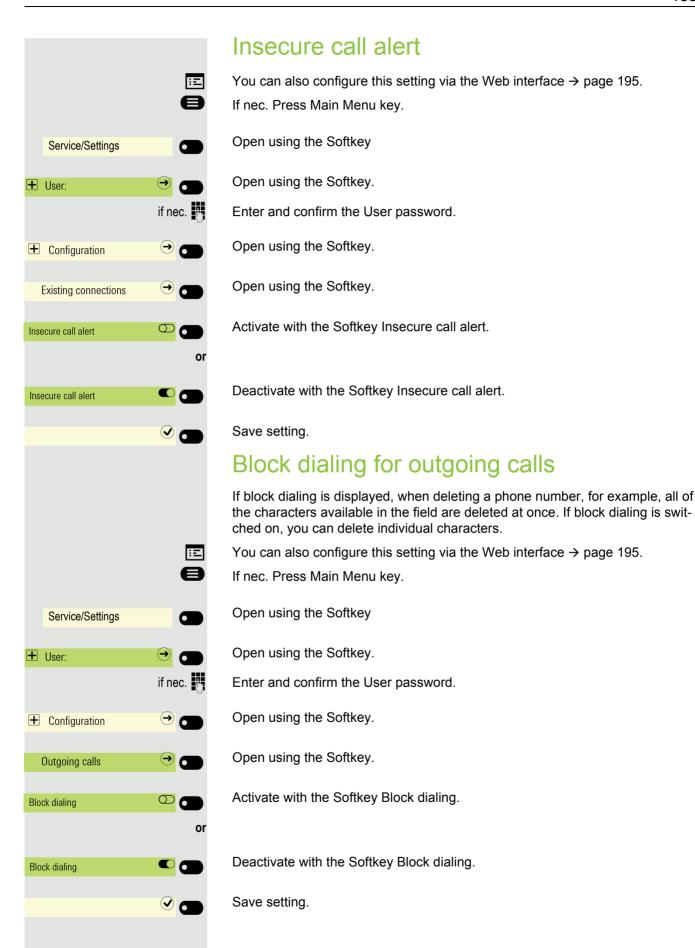

Open using the Softkey.

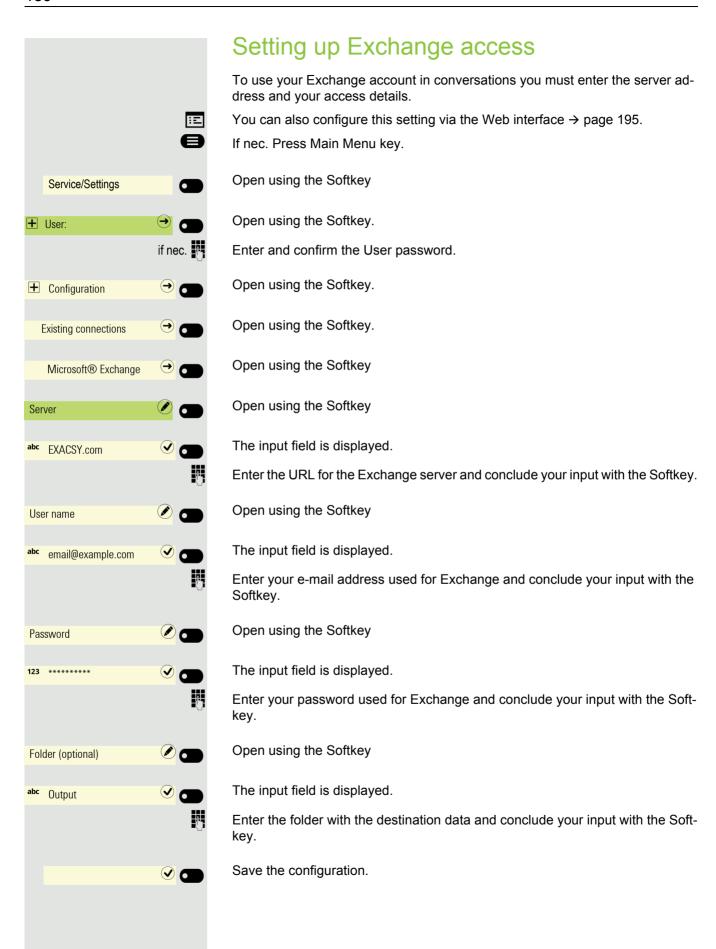

Open using the Softkey.

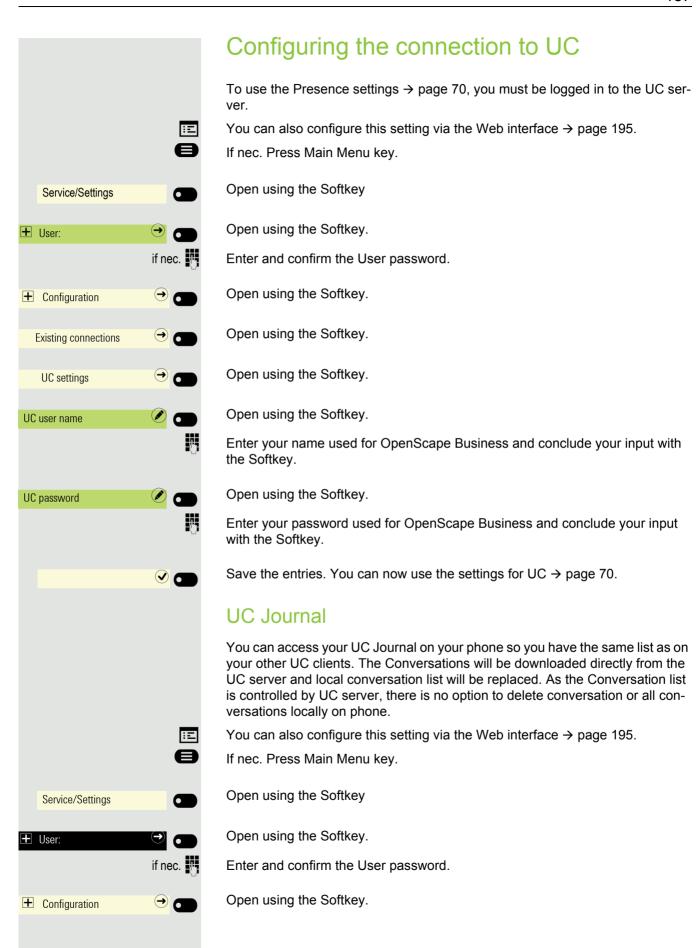

Open using the Softkey.

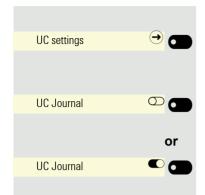

Confirm with the Softkey to set "Local ringtone".

Save setting.

Open using the Softkey

Activate with the Softkey.

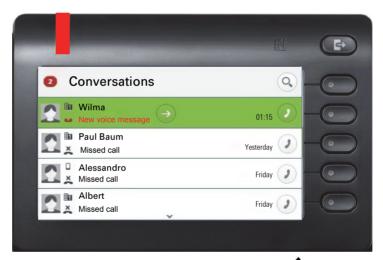

Deactivate with the Softkey.

OpenScape UC Voicemail

Prerequisite: UC mode is configured → page 187, and "Allow UC Journal" is enabled → page 187.

When the OpenScape UC Voicemail is activated, the UC server provides all necessary data, including voice streams when playing messages.

When there are new voicemails from a contact, voicemail notifications are shown in the Conversation list.

To show the list of voice messages for the particular contact, press the "Voice messages". The Voice messages screen will be displayed.

The selected new voice message will be displayed with different options.

Select the desired option, e.g. "Play message".

The Voice message playback screen appears. You can stop the message during playing.

Error messages

- The UC Presence (→ page 24) must be in "Office" state, otherwise playing voice message is not allowed by UC Suite. CallMe state also does not allow to play the voice message.
 - In this case when "Play message" command is selected, the display will stay in the Voice Message screen and show a standard error toast notification with the following text: "Not possible. Presence is not Office. To play voicemails your presence has to be Office".
- If the phone is not in idle state (e.g. because of the previous call and handset is still offhook), it is not possible to create voicemail call. You will get an error notification "Phone is busy".

SD-Card

You only see status information at present for a possible SD card. Usage is not yet possible.

Please note that SD slot is available only on CP600.

If nec. Press Main Menu key.

Open using the Softkey

Open using the Softkey.

Enter and confirm the User password.

Select "Phone".

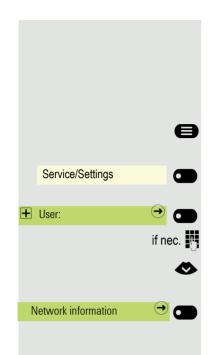

Open using the Softkey.

Open using the Softkey.

The current status is displayed.

The current status is displayed.

Exit the menu.

Displaying network information

This information overview in the user area of the service menu provides you with information about the IP address or name of the phone and the HTML address of the web interface. It also provides real-time data about the network activity of the phone.

If nec. Press Main Menu key.

Open using the Softkey

Open using the Softkey.

Enter and confirm the User password.

Select the "Network information" menu.

Open using the Softkey.

You can browse the following overview:

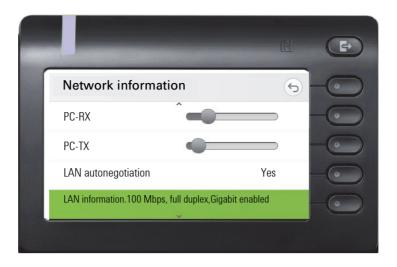

Scroll

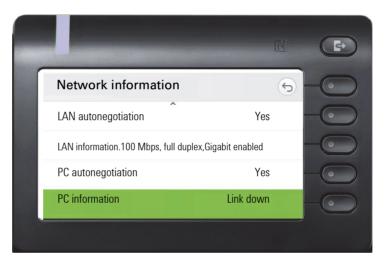

Scroll

Scroll

DNS name: Name or number of telephone.

URL: HTTP address of the web interface. This address is specified in the address line of the Internet browser and is used to call up the web interface of the phone in the browser.

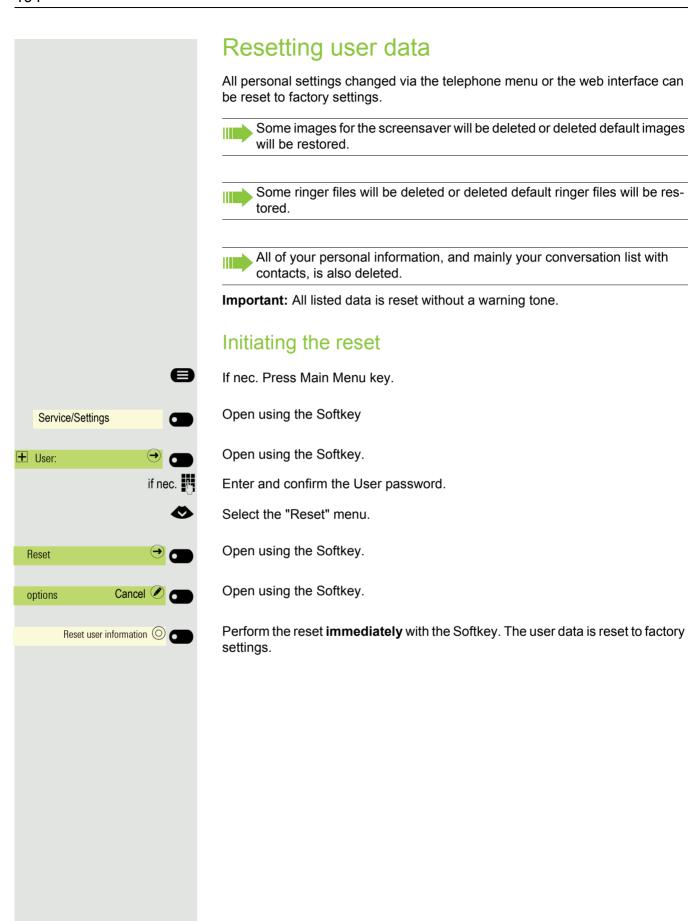

IPV4 Address: Display of the IP address or name that was assigned to the phone in the network.

LAN-RX/PC-RX: The network or PC interface data packets received are illustrated dynamically in graphical form.

LAN-TX/PC-TX: The network or PC interface data packets sent are illustrated dynamically in graphical form.

LAN autonegotiation/PC autonegotiation [Yes)|No]: Displays whether the network or PC interface data transfer rate is set to automatic (Yes) or manual (No).

LAN information/PC information: [10|100|1000] Mbit/s: Data transfer rate of the network or PC interface. If an interface is not in use, Link down is displayed.

Web interface

General

You can configure a number of settings for your phone via the web interface. Communication occurs via a secure HTTPS connection. Access to the web interface must be activated by your administrator.

Launching the web interface

For more information on the IP address, the web interface address, and how to connect the telephone to the network, refer to the section entitled "Network information" → page 192.

To launch the interface, open a web browser and enter the following:

https://[IP address of the phone]

[IP address of the phone] is the IP address of your phone.

or

https://[Name of the phone]

[Name of the phone] that was assigned by the administrator.

You might receive a certificate notification from the browser. Follow the instructions to download the certificate.

You will be prompted to configure a user password the first time you call up the web interface
→ page 158. You must log in with this password in future every time you want to open the User pages.

Licenses

This area provides you with the information about EULA (End User License Agreement) and Open Source licenses. For further information, consult your administrator or refer to the administration manual.

Administrator pages

This area lets you configure settings for administering your phone and the network environment. Access to the Administrator pages is protected by the admin password. For further information, consult your administrator or refer to the administration manual.

User pages

All entries under the user menu on the web interface can also be found under the user menu on the telephone \rightarrow page 48.

You will be prompted to configure a user password the first time you call up the web interface
→ page 158. You must log in with this password in future every time you want to open the User pages.

- Click a menu heading to display the individual menu entries. Click the menu heading again to close the menu.
- · Click a menu entry to open the corresponding website.
- · Make the desired changes.
- · Click the corresponding button to save or discard your changes.

Button functions

- · "Login": Log in to the phone after you have entered the user password
- "Save": Applying changes
- "Reset": Reset original values
- "Update": Update the values
- · "Log out": Log out from the phone

Diagnostic information

Fixing problems

Responding to error messages on the display

Possible causes: Incorrect input

Number is not correct.

Possible response:

Enter correct number.

No authorization Possible cause:

Locked function attempted.

Possible response:

Apply for authorization to execute function from manager.

Currently not possible Possible cause:

Dialing a non-existent number. Phone you are trying to reach is not in use.

Possible response:

Enter correct number. Call again later.

Phone number invalid Possible cause:

Own number entered.

Possible response:

Enter correct number.

Key memory is full Possible cause:

External phone number memory space in system currently full.

Possible response:

Try again later.

Possible 1st cause:

If "delete other level" shows in menu:

You have tried to save a function or internal phone number with LED-display using a key on an already occupied level (e.g. an external phone number).

Possible response:

Confirm "delete other level" to save the phone number/function.

Conflict on another level

Possible 2nd cause:

If "clear LED support" shows in menu:

You have tried to save a number without LED-display or an external number using a key that already has an internal number with LED-display.

Possible response:

Confirm "clear LED support" to save the call number. The existing internal number remains on the other level without LED-display.

Pressed key does not respond:

Check if the key is stuck.

Phone doesn't ring when called:

Check if your phone is on silent (silent icon appears on status screen → page 23). If so, turn off silent mode.

To correct any other problems:

Contact your administrator if a fault persists for more than 5 minutes, for example. Pass on the message displayed in the red field, if appropriate, as shown in the next example. Problems that cannot be corrected should be referred to Customer Service.

Contact partner in case of problems

Contact your administrator if a fault persists for more than 5 minutes, for example.
